Pengelolaan Benturan Kepentingan Direksi

Benturan kepentingan maupun yang berpotensi menjadi benturan kepentingan atau segala sesuatu yang dapat menghambat Direksi untuk bertindak independen harus diungkapkan oleh Direksi. Benturan kepentingan merupakan suatu kondisi adanya konflik antara kepentingan ekonomis perusahaan dan kepentingan ekonomi individu. Dalam hal terdapat benturan kepentingan dalam pengambilan keputusan, Direksi harus mengutamakan kepentingan Bank.

Dalam hal terjadi benturan kepentingan, anggota Direksi dilarang mengambil tindakan yang dapat merugikan Perseroan atau merugikan keuntungan Perseroan dan wajib mengungkapkan benturan kepentingan dimaksud dalam setiap keputusan. Pengungkapan benturan kepentingan dicantumkan dalam setiap risalah rapat Direksi, paling kurang mencakup nama Direksi yang memiliki benturan kepentingan, masalah benturan kepentingan dan dasar pertimbangan pengambilan keputusan.

Terkait dengan pengambilan keputusan dalam rapat Direksi, Direksi yang memiliki benturan kepentingan diperkenankan untuk mengungkapkan ide dan pendapat, akan tetapi tidak disertakan dalam pengambilan keputusan, baik dalam musyawarah maupun pengambilan suara terbanyak. Hal tersebut harus dicatat dalam risalah rapat Direksi.

Dalam hal Perseroan mempunyai benturan kepentingan dengan kepentingan pribadi seorang anggota Direksi, maka Perseroan akan diwakili oleh anggota Direksi lainnya dan dalam hal Perseroan mempunyai kepentingan yang bertentangan dengan kepentingan seluruh anggota Direksi, maka dalam hal ini Perseroan diwakili oleh Dewan Komisaris.

Independensi Direksi

Direksi senantiasa bertindak independen, dalam arti tidak mempunyai benturan kepentingan yang dapat mengganggu kemampuannya untuk melaksanakan tugas secara mandiri dan kritis, baik dalam hubungan satu sama lain maupun hubungan terhadap Dewan Komisaris.

Rapat Direksi

Kebijakan Rapat

Direksi wajib mengadakan rapat Direksi secara berkala paling kurang 1 (satu) kali dalam setiap bulan. Rapat Direksi dapat dilangsungkan apabila dihadiri mayoritas dari seluruh anggota Direksi. Direksi wajib mengadakan rapat Direksi bersama Dewan Komisaris secara berkala paling kurang 1 (satu) kali dalam 4 (empat) bulan. Direksi harus menjadwalkan rapat untuk tahun berikutnya sebelum berakhirnya tahun buku.

Management of Conflicts of Interest In The Directors

Conflicts of interests as well as those that have the potential to become a conflict of interest or anything that can prevent the Directors from acting independently must be disclosed by the Directors. Conflict of interest is a condition of conflict between the economic interests of the company and individual economic interests. In the event of a conflict of interest in decision making, the Directors must prioritize the interests of the Bank.

In the event of a conflict of interest, members of the Directors are prohibited from taking actions that could harm the Company or harm the Company's profit and must disclose the conflict of interest referred to in each decision. Disclosure of conflicts of interest is included in each minutes of the Directors' meeting, at least covering the names of Directors who have a conflict of interest, conflict of interest issues and the basis for decision making.

Related to decision making in Directors' meetings, Directors who have a conflict of interest are allowed to express their ideas and opinions, but they are not included in decision making, both in deliberations and the majority of votes. This must be noted in the minutes of the Directors' meeting.

If the Company has a conflict of interest with the personal interests of a member of the Directors, then the Company will be represented by other members of the Directors and in the event that the Company has an interest that conflicts with the interests of all members of the Directors, then in this case the Company is represented by the Board of Commissioners.

Board of Directors' Independence

The Board of Directors always acts independently, in the sense that it does not have a conflict of interest that could interfere with its ability to carry out its duties independently and critically, both in relation to each other and to the Board of Commissioners.

Meeting of The Directors

Meeting Policy

The Board of Directors is obliged to hold regular Board of Directors meetings at least 1 (one) time every month. A Board of Directors meeting can be held if attended by a majority of all members of the Board of Directors. The Board of Directors is obliged to hold regular meetings between the Board of Directors and the Board of Commissioners at least once every 4 (four) months. The Board of Directors must schedule meetings for the following year before the end of the financial year.

Bahan rapat disampaikan kepada peserta paling lambat 5 (lima) hari sebelum rapat diselenggarakan. Dalam hal terdapat rapat yang diselenggarakan di luar jadwal yang telah disusun, bahan rapat disampaikan kepada peserta rapat paling lambat sebelum rapat diselenggarakan. Setiap kebijakan dan Keputusan strategis wajib diputuskan melalui rapat Direksi. Panggilan rapat Direksi dilakukan oleh anggota Direksi yang berhak mewakili Direksi menurut anggaran dasar.

Rapat Direksi dipimpin oleh Direktur Utama dalam hal Direktur Utama tidak dapat hadir atau berhalangan hal mana tidak perlu dibuktikan kepada pihak Ketiga, maka Rapat Direksi akan dipimpin oleh dan dari anggota Direksi yang hadir. Rapat Direksi adalah sah dan berhak mengambil Keputusan yang mengikat apabila lebih dari setengah bagian dari jumlah anggota Direksi hadir atau diwakili dalam rapat. Hasil rapat dituangkan dalam risalah rapat.

Meeting materials are submitted 5 (five) days before the meeting is held. In the case that a meeting is held outside the prepared schedule, the meeting materials are delivered to the meeting participants no later than before the meeting is held. Every policy and strategic decision must be decided at a Board of Directors meeting. Calls for meetings of the Board of Directors are made by members of the Board of Directors who have the right to represent the Board of Directors according to the articles of association.

The Directors meeting is chaired by the President Director, in the event that the President Director is unable to attend or is unable to attend, which does not need to be proven to a third parties, the Directors meeting will be chaired by someone chosen by and from the present Directors. Directors meetings are valid and have the right to make binding decisions only if more than half of the total members of the Directors are present or represented at the meeting. The results of the meeting are stated in the minutes of the meeting.

Pembidangan Tugas Pengawasan Dewan Komisaris

Untuk mengefektifkan peran Dewan Komisaris, dilakukan pembagian tugas diantara anggota Dewan Komisaris. Pembagian tugas diantara anggota Dewan Komisaris ditujukan agar pelaksanaan tugas masing-masing anggota Dewan Komisaris secara teknis pada aspek yang dibidangi dapat berjalan lancar, efektif dan efisien, sesuai tanggung jawab dan wewenang masing-masing sehingga terdapat kejelasan tentang peran anggota Dewan Komisaris, baik secara kolektif maupun individual.

Berdasarkan salah satu hasil keputusan Rapat Umum Pemegang Saham Luar Biasa Tahun 2022 pada tanggal 25 Mei 2023 terjadi perubahan susunan pengurus, sehingga terjadi perubahan dalam pembagian tugas Dewan Komisaris dan ditetapkan melalui Surat Keputusan Dewan Komisaris PT Bank Pembangunan Daerah Jawa Barat dan Banten, Tbk. Nomor 04/SK/DKO/2023 tanggal 22 Agustus 2023 tentang Pembagian Tugas dan Pelaksanaan Kegiatan Dewan Komisaris sehingga Pembidangan Tugas Dewan Komisaris menjadi sebagai berikut:

The Supervision of the Board of Commissioners' Supervisory Duties

To streamline the role of the Board of Commissioners, division of duties was carried out among members of the Board of Commissioners. The division of duties among the members of the Board of Commissioners was intended so that the implementation of the duties of each member of the Board of Commissioners could technically run smoothly, effectively and efficiently, according to their respective responsibilities and authorities so that there was clarity on the role of members of the Board of Commissioners, both collectively and individually.

Based on one of the results of the 2022 Extraordinary General Meeting of Shareholders on May 25 2023, there was a change in the composition of the management, resulting in a change in the division of duties of the Board of Commissioners and this was determined through a Decree of the Board of Commissioners of PT Bank Pembangunan Daerah Jawa Barat dan Banten, Tbk. Number 04/SK/DKO/2023 dated August 22, 2023 concerning the Division of Duties and Implementation of Activities of the Board of Commissioners, thereby the Division of Duties of the Board of Commissioners is as follows:

Pengelolaan Benturan Kepentingan Dewan Komisaris

1. Anggota Dewan Komisaris dilarang memiliki hubungan keluarga sampai dengan derajat kedua dengan sesama anggota Dewan Komisaris dan/atau anggota Direksi.
2. Dalam hal terjadi benturan kepentingan, anggota Dewan Komisaris dilarang mengambil tindakan yang dapat merugikan Bank atau mengurangi keuntungan Bank dan wajib mengungkapkan benturan kepentingan dalam setiap keputusan.
3. Anggota Dewan Komisaris dilarang memanfaatkan Bank untuk kepentingan pribadi, keluarga dan/atau pihak lain yang dapat merugikan atau mengurangi keuntungan Bank.
4. Anggota Dewan Komisaris dilarang bertindak sebagai kuasa dari Pemegang Saham dalam pemungutan suara di dalam rapat.
5. Anggota Dewan Komisaris dilarang mengambil dan/atau menerima keuntungan pribadi dari Bank selain remunerasi dan fasilitas lain yang ditetapkan berdasarkan keputusan RUPS.

Komisaris Independen

Komisaris Independen adalah anggota Dewan Komisaris yang tidak memiliki hubungan keuangan, kepengurusan, kepemilikan saham dan/atau hubungan keluarga dengan anggota Direksi, anggota Dewan Komisaris lain dan/atau pemegang saham pengendali, atau hubungan dengan bank yang dapat mempengaruhi kemampuan yang bersangkutan untuk bertindak independen. Komisaris Independen berkontribusi dalam diskusi yang jujur, obyektif, aktif dan konstruktif pada rapat Dewan Komisaris.

Jumlah Komisaris Independen sebanyak 50% yaitu 3 (tiga) orang dari 6 (enam) orang Dewan Komisaris. Dengan demikian, jumlah Komisaris Independen tersebut telah memenuhi ketentuan yang ditetapkan Otoritas Jasa Keuangan.

Management of Conflicts of Interest of The Board of Commissioners

1. Members of the Board of Commissioners are prohibited from having family relations up to the second degree with fellow members of the Board of Commissioners and/or members of the Directors.
2. In the event of a conflict of interest, members of the Board of Commissioners are prohibited from taking actions that could harm the Bank or reduce the profit of the Bank and are required to disclose conflicts of interest in every decision.
3. Members of the Board of Commissioners are prohibited from using the Bank for personal, family and/or other parties' interests which may harm or reduce the Bank's profits.
4. Members of the Board of Commissioners are prohibited from acting as proxy from Shareholders in the vote at the meeting.
5. Members of the Board of Commissioners are prohibited from taking and/or receiving personal benefits from the Bank other than remuneration and other facilities determined based on the resolution of the GMS.

Independent Commissioners

Independent Commissioner was a member of the Board of Commissioners who had no financial, management, share ownership and/or family relationship with members of the Directors, other members of the Board of Commissioners and/or controlling shareholders, or a relationship with a bank that might affect the ability of the person concerned to act independently. Independent Commissioners contribute to honest, objective, active and constructive discussions at Board of Commissioners meetings.

The number of Independent Commissioners is 50%, namely 3 (three) people from the 6 (six) Board of Commissioners. Thus, the number of Independent Commissioners has fulfilled the provisions set by the Financial Services Authority.

Program Kerja dan Pelaksanaan Tugas Komite Nominasi dan Remunerasi Tahun 2023

Selama Tahun 2023 Komite Nominasi dan Remunerasi telah melaksanakan tugas dan tanggung jawab terkait dengan fungsi nominasi dan remunerasi, diantaranya:

1. Melakukan Penilaian Kinerja Dewan Komisaris dan Direksi berdasarkan metode *Self Assessment* untuk periode Tahun Buku 2023.

Work Program and Implementation of The Duties of The Nomination and Remuneration Committee of 2023

During 2023 The Nomination and Remuneration Committee has carried out duties and responsibilities related to the nomination and remuneration function, including:

1. Conducting Performance Assessment of the Board of Commissioners and Directors based on Self-Assessment method for the Financial Year of 2023.

2. Melakukan proses nominasi untuk jabatan anggota direksi yang habis masa jabatan pada RUPS Tahunan Tahun Buku 2022 dan Pengangkatan anggota dewan komisaris yang baru pada RUPS Luar Biasa Tahun 2023.
3. Memberikan rekomendasi kepada Dewan Komisaris terkait Pengangkatan dan perpanjangan perjanjian kerja anggota Komite dari pihak independen.
4. Mengevaluasi dan memberikan rekomendasi kepada Dewan Komisaris mengenai kebijakan, skala dan besaran remunerasi Pengurus dan Pegawai.

Seluruh rapat Komite Nominasi dan Remunerasi telah didokumentasikan dengan baik dalam notula rapat dengan memperhatikan jumlah kuorum kehadiran. Anggota Komite Nominasi dan Remunerasi senantiasa diberikan kesempatan untuk mengikuti seminar maupun program pelatihan untuk meningkatkan wawasan dan pengetahuan terkait dengan tugas dan tanggung jawabnya.

Kebijakan Suksesi Direksi

Dalam rangka melanjutkan kepemimpinan yang berkelanjutan, bank **bjb** memiliki mekanisme suksesi untuk posisi Direksi. Pada periode yang telah ditentukan, Dewan Komisaris melalui Komite Nominasi dan Remunerasi menyelenggarakan *talent pool* untuk menjadi kandidat Direksi yang berasal dari internal bank **bjb** dan melakukan perekrutan dari luar bank **bjb**. Dalam melakukan penilaian terhadap para kandidat Direksi, Dewan Komisaris melalui Komite Nominasi dan remunerasi dapat dibantu oleh tim *assessment* independen yang telah ditunjuk bank **bjb**. Penyaringan terhadap para kandidat dilakukan berdasarkan kriteria-kriteria yang relevan dengan jabatan dan kondisi bank **bjb**, sesuai dengan ketentuan yang berlaku. Hasil penyaringan tersebut kemudian direkomendasikan oleh kepada RUPS untuk kemudian diajukan kepada OJK guna melaksanakan *fit and proper test* sesuai dengan jabatan yang dituju. Kandidat dinyatakan efektif menjabat sebagai Direksi apabila dinyatakan lulus *fit and proper test* oleh OJK.

Komite Pemantau Risiko

Sesuai Peraturan Otoritas Jasa Keuangan (POJK) Nomor 55/POJK.03/2016 tentang Penerapan Tata Kelola bagi Bank Umum, Komite Pemantau Risiko merupakan alat kelengkapan Dewan Komisaris yang berfungsi memonitor risiko dan menilai toleransi risiko yang dapat diambil oleh Bank, mengevaluasi perbaikan yang dilakukan atas kebijakan, prosedur dan praktik manajemen risiko Bank guna memastikan telah dilakukannya pengelolaan risiko dengan baik, terutama pada pengelolaan risiko kredit, risiko pasar, risiko likuiditas, risiko operasional, dan risiko bank lainnya.

Dasar Pembentukan Komite Pemantau Risiko

Komite Pemantau Risiko bank **bjb** dibentuk berdasarkan:

1. Peraturan OJK Nomor 55/POJK.03/2016 tanggal 9 Desember 2016 tentang Penerapan Tata Kelola bagi Bank Umum.

2. Performing nomination process for expired term of service of member of the Directors in the Annual GMS for the Financial Year of 2022 and Nomination of new member of the Board of Commissioners in the 2023 Extraordinary GMS.
3. Provide recommendations to the Board of Commissioners regarding the extension of work agreements for Committee members from independent parties.
4. Evaluate and provide recommendations to the Board of Commissioners regarding the remuneration policy of Management and Employees.

All Remuneration and Nomination Committee meetings have been well documented in the minutes of the meeting by taking into account the number of quorum attendance. Members of the Remuneration and Nomination Committee are always given the opportunity to attend seminars and training programs to increase their insight and knowledge related to their duties and responsibilities.

Succession Policy of Directors

In order to continue the sustainable leadership, bank **bjb** owned a succession mechanism for the position of the Directors. In a predetermined period, the Board of Commissioners through the Nomination and Remuneration Committee conducted talent pool to become candidates for the Directors, either from internal bank **bjb** and melakukan perekrutan dari luar bank **bjb**. In assessing candidates for the Directors, the Board of Commissioners through the Nomination and Remuneration Committee could be assisted by an independent assessment team appointed by bank **bjb**. Candidates were screened based on criteria relevant to the position and condition of bank **bjb**, in accordance with applicable regulations. The results of the screening were then recommended by the GMS to be submitted to the OJK in order to carry out a fit and pass test in accordance with the intended position. Candidates were declared to be effective as Directors if they were declared to have passed the fit and proper test by the OJK.

Risk Monitoring Committee

In accordance to OJK Regulations number 55/POJK.03/2016 regarding the implementation of governance for commercial banks, the Risk Monitoring Committee is a board of Commissioners fittings that serves to monitor risk and assess the risk tolerance that can be taken by the Bank, evaluate the improvements made to the Bank's risk management policies, procedures and practices to ensure good risk management is done, especially on the management of credit risk, market risk, liquidity risk, and risk of other banks.

Foundation of Risk Monitoring Committee

The bank **bjb** Risk Monitoring Committee is formed based on:

1. OJK Regulation No. 55/POJK.03/2016 dated December 9, 2016 concerning the implementation of governance for commercial banks.

2. Surat Keputusan Dewan Komisaris PT Bank Jabar Nomor 04A/SK/DK/2007 tanggal 28 Juni 2007 tentang Pembentukan Komite-Komite dan Pedoman Kerja Komite.
 3. Peraturan Otoritas Jasa Keuangan Nomor 17/POJK.04/2014 tentang Penerapan Manajemen Risiko Terintegrasi Bagi Konglomerasi Keuangan.
 4. Peraturan Otoritas Jasa Keuangan Nomor 18/POJK.03/2016 tentang Penerapan Manajemen Risiko Bagi Bank Umum.
 5. Surat Keputusan Dewan Komisaris PT Bank Pembangunan Daerah Jawa Barat dan Banten, Tbk.  - Sistem Informasi Manajemen Audit (SIMA)
 - *Whistleblowing System* (WBS)
 - b. Pendampingan Pemeriksaan Eksternal
SKAI memiliki tugas untuk melakukan pendampingan pemeriksaan yang dilakukan oleh Auditor Eksternal. Pendampingan tersebut dalam ruang lingkup penyediaan data pemeriksaan yang dibutuhkan oleh auditor eksternal.
 - c. Pengembangan Kuantitas dan Kualitas Auditor
 - Pengembangan Kuantitas
Satuan Kerja Audit Internal melakukan penambahan pegawai sesuai dengan *capacity planning* tahun 2023. Selain itu, SKAI melakukan rotasi internal antar grup agar seluruh auditor mendapatkan wawasan, pengetahuan dan pemahaman yang berbeda/ baru.
 - Pengembangan Kualitas
Kualitas auditor merupakan salah satu faktor penting dalam pelaksanaan audit internal. Atas hal tersebut, SKAI melakukan pengembangan kemampuan, kompetensi, pengetahuan dan profesionalisme dengan mengikutsertakan auditor pada pelatihan, *workshop*, sertifikasi auditor berskala nasional maupun internasional sesuai dengan kebutuhan yang disesuaikan dengan kegiatan pemeriksaan serta pengajuannya dikoordinasikan dengan **bjb University**.

METODE AUDIT

SKAI memiliki standar penyelenggaraan audit yang diatur di dalam Kebijakan nomor 0254/SK/DIR-SKA/2022 tanggal 15 Juni 2022 tentang Kebijakan Audit Internal. Penyelenggaraan aktivitas audit diawali dengan pembuatan rencana kerja audit tahunan (*audit plan*) yang disusun menggunakan pendekatan berbasis risiko. *Audit universe* ditinjau berdasarkan berbagai sudut pandang, baik unit kerja (entitas bisnis), proses bisnis. Pemilihan prioritas objek

- a. The general audit was conducted in 5 (five) work units at the Head Office and 25 (twenty-five) work units in the Branch Office Network.
- b. The Information Technology Audit was conducted on 5 (five) systems from the regulators and 1 (one) compliance audit from an international certification body.
- c. The Integrated Internal Audit Inspection was conducted at the beginning and mid-year monitoring activities of the implementation of internal audit in all subsidiaries and related companies, as well as a full scope audit of 4 (four) LJK in the financial conglomerate.
- d. Conducting examinations of fraud indications that may harm bank **bjb** and stakeholders.

2. Other Work Programs

- a. In 2023, SKAI maximized the functionality of data analysis software in the implementation of data analysis in the form of an Irregularities Report. In addition, SKAI conducts periodic development and maintenance as well as the development of the Internal Audit Information System in the following applications:
 - Audit Management Information System (SIMA)
 - Whistle Blowing System (WBS)
- b. External Audit Assistance
SKAI has the task of assisting the audit carried out by External Auditors. The assistance is within the scope of providing audit data needed by external auditors..
- c. Auditor Quantity and Quality Development
 - Quantity Development
The Internal Audit Work Unit added employees in accordance with the 2023 capacity planning. In addition, SKAI conducts internal rotations between groups so that all auditors get different/new insights, knowledge, and understanding.
 - Quality Development
Auditor quality is one of the essential factors in internal audit implementation. For this reason, SKAI developed the auditors' capabilities, competencies, knowledge, and professionalism by registering them in training, workshops, and national and international auditor certifications according to the needs adjusted to audit activities, and the submissions were coordinated with **bjb university**.

AUDIT METHOD

SKAI has audit implementation standards set out in Policy number 0254/SK/DIR-SKA/2022 dated June 15, 2022 concerning Internal Audit Policy. The implementation of audit activities begins with the preparation of an annual audit work plan (audit plan) which is prepared using a risk-based approach. The audit universe is reviewed from various perspectives, namely based on work units (business entities) as well as business processes/operational

audit dilakukan berdasarkan profil risikonya (*risk based internal audit*).

Setiap penugasan audit individual dimulai dengan analisa mendalam pada fase persiapan (*preliminary survey*) sehingga pelaksanaan audit di lapangan dapat berjalan dengan tepat sasaran. Berbagai metode telah digunakan dalam penugasan audit, yaitu teknik pengambilan *sampling*, teknik wawancara, kriteria penyusunan audit *evidence* dan dituangkan secara terstandarisasi dalam kertas kerja audit. Untuk mendukung proses analisa, para auditor dibekali dengan standar perangkat alat kerja yang memadai dan mutakhir.

PELAKSANAAN AUDIT INTERNAL TAHUN 2023

1. Pemeriksaan

Penetapan pemeriksaan terhadap Kantor Cabang, Kantor Pusat, Sistem Aplikasi Teknologi Informasi dan Konglomerasi Keuangan berdasarkan hasil perhitungan *audit rating* terhadap *audit universe* dan *judgment management*. Satuan Kerja Audit Internal (SKAI) setiap tahun menyusun Rencana Kerja dan Anggaran Tahunan sebagai panduan dalam melaksanakan kegiatan pemeriksaan tahunan secara efektif.

Pada tahun 2023, SKAI telah melaksanakan audit pada Realisasi pelaksanaan Kantor Cabang, Kantor Wilayah, Kantor Pusat, Sistem Aplikasi Teknologi Informasi dan Konglomerasi Keuangan sebagaimana rencana kerja serta audit tematik dan *compliance review* ISO. Adapun jumlah rencana dan realisasi pemeriksaan oleh SKAI di Tahun 2023 sebagai berikut:

Jenis Pemeriksaan Type of Audit	Rencana Planned	Realisasi Realized

activities. Priority selection of audit objects is carried out based on their risk profile (risk based internal audit).

Each individual audit assignment begins with an in-depth analysis during the preliminary survey so that the field audit can be carried out on target. Various methods have been used in audit assignments, namely sampling techniques, interview techniques, criteria for preparing audit evidence and set forth in a standardized manner in audit working papers. To support the analysis process, the auditors are provided with adequate and up-to-date work tool standards.

INTERNAL AUDIT IMPLEMENTATION IN 2023

1. Audit

The audit of Branch Offices, the Head Office, Information Technology Application Systems, and the Financial Conglomerate was based on the results of the audit rating calculation of the audit universe and judgment management. The Internal Audit Work Unit (SKAI) annually prepares an Annual Work Plan and Budget as a guide in effectively carrying out annual audit activities.

In 2023, SKAI had conducted audits on the actual implementation of Branch Offices, Regional Offices, Head Offices, Information Technology Application Systems and Financial Conglomerates as per work plans as well as thematic audits and ISO compliance reviews. The number of planned and actual inspections by SKAI in 2023 was as follows:

Sehubungan dengan adanya penyesuaian pada Struktur Organisasi terbaru dengan adanya Unit Kerja baru dalam hal ini adalah Divisi Manajemen Risiko Operasional, maka pada Triwulan IV tahun 2023 sesuai dengan Struktur Organisasi tersebut Kontrol Internal Wilayah dan Cabang telah berpindah ke Divisi Manajemen Risiko Operasional sehingga pemenuhan rencana audit pada Triwulan IV tahun 2023 menjadi kewenangan Divisi Manajemen Risiko Operasional.

Pelaksanaan Tugas Divisi Manajemen Risiko Kredit, Pasar & Terintegrasi Serta Divisi Manajemen Risiko Operasional Tahun 2023

Pada tahun 2023, Divisi Manajemen Risiko Kredit, Pasar & Terintegrasi bersama dengan Divisi Manajemen Risiko Operasional telah menjalankan peran sebagai Satuan Kerja Manajemen Risiko di bank **bjb** dengan mengkoordinasikan pelaksanaan Strategi dan Kerangka Manajemen Risiko yang mencakup 4 (empat) pilar penerapan manajemen risiko, yaitu:

1. Pengawasan Aktif Dewan Komisaris dan Direksi;
2. Kecukupan Kebijakan dan Prosedur Manajemen Risiko serta Penetapan Limit Risiko;
3. Kecukupan Proses Identifikasi, Pengukuran, Pemantauan dan Pengendalian Risiko serta informasi Manajemen Risiko; serta
4. Sistem Pengendalian Internal yang Menyeluruh.

Dalam rangka penerapan manajemen risiko yang efektif, upaya pengembangan penerapan manajemen risiko dilakukan terhadap aspek serta unsur yang melekat pada organisasi Perseroan dengan penguatan struktur organisasi manajemen risiko, memastikan proses manajemen risiko operasional yang terdapat pada *Risk Taking Unit*, pemantauan terhadap *dedicated operational risk officer* melalui fungsi KIC/KIW sebagai pihak yang melakukan pengawasan dan review ulang atas aktivitas operasional di Kantor Cabang dan tindak lanjut alert FDS (*Fraud Detection System*) serta turut pula menjadi *Strategic Supporting Unit* yang secara intensif mengembangkan budaya sadar risiko pada seluruh jenjang organisasi, di internal maupun pada Konglomerasi Keuangan Bank.

Implementation of Duties of The Credit, Market and Integrated Risk Management Division and The Operational Risk Management Division in 2023

In 2023, the Credit, Market & Integrated Risk Management Division together with the Operational Risk Management Division carried out their role as the Risk Management Work Unit at bank **bjb** by coordinating the implementation of the Risk Management Strategy and Framework which includes 4 (four) pillars of risk management implementation, namely:

1. Active supervision of the Board of Commissioners and Directors;
2. Adequacy of Risk Management Policies and Procedures and Determination of Risk Limits;
3. Adequacy of Risk Identification, Measurement, Monitoring and Control Processes as well as Risk Management information; as well as
4. Comprehensive Internal Control System.

In order to implement effective risk management, efforts to develop the implementation of risk management are carried out on aspects and elements inherent in the Company's organization by strengthening the risk management organizational structure, ensuring the operational risk management process contained in the Risk Taking Unit, monitoring the dedicated operational risk officer through the function KIC/KIW is the party that carries out supervision and review of operational activities at Branch Offices and follows up on FDS (*Fraud Detection System*) alerts and is also a Strategic Supporting Unit that intensively develops a risk awareness culture at all levels of the organization, internally and externally at Bank Financial Conglomeration.

TUGAS, WEWENANG, DAN TANGGUNG JAWAB KOMITE PENGARAH TEKNOLOGI INFORMASI

Tugas, wewenang dan tanggung jawab Komite Pengarah Teknologi Informasi adalah memberikan rekomendasi kepada Direksi yang paling kurang terkait dengan:

- Rencana Strategis Teknologi Informasi (*Information Technology Strategic Plan*) yang searah dengan rencana strategis kegiatan usaha Bank. Dalam memberikan rekomendasi, Komite Pengarah Teknologi Informasi hendaknya memperhatikan faktor efisiensi, efektivitas serta hal-hal sebagai berikut:
 - Rencana pelaksanaan (*roadmap*) untuk mencapai kebutuhan Teknologi Informasi yang mendukung strategi bisnis Bank. *Roadmap* terdiri dari kondisi saat ini (*current state*), kondisi yang ingin dicapai (*future state*) serta langkah-langkah yang akan dilakukan untuk mencapai *future state*;
 - Sumber Daya yang dibutuhkan;
 - Manfaat yang akan diperoleh saat rencana diterapkan;
 - kendala yang mungkin timbul dalam penerapan *information technology strategic plan*.
- Perumusan kebijakan Teknologi Informasi sebagaimana diatur pada arsitektur kebijakan dan prosedur.
- Kesesuaian antara proyek Teknologi Informasi yang disetujui dengan *information technology strategic plan*, serta menetapkan status prioritas proyek teknologi operasional Bank.
- Kesesuaian antara pelaksanaan proyek Teknologi Informasi dengan rencana proyek yang disepakati (*project charter*). Komite Pengarah Teknologi Informasi harus melengkapi rekomendasi dengan hasil analisis dari proyek Teknologi Informasi yang utama sehingga memungkinkan Direksi mengambil keputusan secara efisien.
- Kesesuaian antara Teknologi Informasi dengan kebutuhan sistem informasi manajemen serta kebutuhan kegiatan usaha.
- Efektivitas langkah-langkah dalam meminimalkan risiko atas investasi pada sektor Teknologi Informasi.
- Pemantauan atas kinerja Teknologi Informasi, dan upaya peningkatannya misalnya dengan mendeteksi keusangan Teknologi Informasi dan mengukur efektivitas dan efisiensi penerapan kebijakan pengamanan Teknologi Informasi.

DUTIES, AUTHORITIES, AND RESPONSIBILITIES OF INFORMATION TECHNOLOGY STEERING COMMITTEE

The task, authority and responsibility of the Director of the Information Technology Committee is to provide recommendations to the board of Directors as related to:

- The Information Technology Strategic Plan which was in line with the strategic plan for the Bank's business activities. In providing recommendations, the Information Technology Steering Committee should pay attention to efficiency, effectiveness as well as the following:
 - The implementation plan (*roadmap*) to achieve the need for Information Technology that supported the Bank's business strategy. The roadmap consisted of the current state, the future state and the steps that should be taken to achieve the future state;
 - Resources required;
 - The benefits that would be obtained when the plan was implemented;
 - constraints that might arise in the application of the strategic information technology plan.
- The formulation of Information Technology policies as stipulated in the policy architecture and procedures.
- Conformity between the approved Information Technology project and the information technology strategic plan, as well as determining the priority status of the Bank's operational technology projects.
- The conformity between the implementation of the Information Technology project and the agreed project plan (*project charter*). The Information Technology Steering Committee had to complement its recommendations with analysis results from major Information Technology projects so as to enable the Directors to make decisions efficiently.
- Conformity between Information Technology and the needs of management information systems as well as the needs of business activities.
- The effectiveness of measures in minimizing the risk of investment in the Information Technology sector.
- Monitoring the performance of Information Technology, and efforts to improve it, for example by detecting obsolescence of Information Technology and measuring the effectiveness and efficiency of implementing Information Technology security policies.

8. Upaya penyelesaian berbagai masalah terkait Teknologi Informasi yang tidak dapat diselesaikan oleh satuan kerja pengguna dan dan penyelenggara Teknologi Informasi secara efektif, efisien dan tepat waktu.
9. Kecukupan dan alokasi sumber daya yang dimiliki, dalam hal sumber daya yang dimiliki tidak memadai dan perseroan akan menggunakan jasa pihak lain dalam penyelenggaraan Teknologi Informasi maka Komite Pengarah Teknologi Informasi harus memastikan perseroan telah memiliki kebijakan dan prosedur yang dibutuhkan.

8. Efforts to resolve various problems related to Information Technology that cannot be resolved by the work unit for users and operators of Information Technology in an effective, efficient and timely manner.
9. Adequacy and allocation of resources owned, in the event that the resources owned are inadequate and the company will use the services of other parties in the implementation of Information Technology, the Information Technology Steering Committee must ensure that the company had the necessary policies and procedures.

Implementation of Governance In Provision of Remuneration For Commercial Banks In Accordance With OJK Regulation 45/ POJK.03/2015

Basis of Remuneration Determination

The basis for the preparation of the determination of remuneration, namely:

1. Law Number 40 of 2007 dated August 16, 2007 concerning Limited Liability Companies;
2. OJK Regulation number 55/POJK.03/2016 dated December 9, 2016 concerning the Implementation of Good Corporate Governance for Commercial Banks.
3. OJK Regulation number 45/POJK.03/2016 dated December 23, 2016 concerning the implementation of good governance in the provision of remuneration for commercial banks.
4. OJK Circular Letter Number 40/ SEOJK.03/2016 dated September 26, 2016 concerning Implementation of Good Governance in Providing Remuneration for Commercial Banks;
5. Articles of Association.

Remuneration and Nomination Committee

The description regarding the Remuneration and Nomination Committee is explained in the Sub Chapter of Organs and Committees Under the Board of Commissioners Chapter of Corporate Governance in this Annual Report.

The Remuneration paid to Members of the Remuneration and Nomination Committee from Independent Parties NonCommissioners was in accordance with the Cooperation Agreement for Implementation as Committee Members and Remuneration (KNR) Number 030/PKS/DIR-CSE/2020 dated February 28, 2020 as follows:

Proses Penyusunan Kebijakan Remunerasi

Proses penyusunan kebijakan Remunerasi yang meliputi:

1. Tinjauan mengenai latar belakang dan tujuan kebijakan Remunerasi;

Kebijakan remunerasi disusun dan ditetapkan dengan tujuan mengembangkan kualitas jajaran manajemen dengan tetap memperhatikan ketahanan dan keberlangsungan usaha bank **bjb**.

Kebijakan sistem remunerasi dengan berpedoman pada konsep Merit System dan Kinerja Pegawai baik dari sisi penyesuaian remunerasi yang bersifat tetap maupun variabel.

Di sisi remunerasi yang bersifat tetap, strategi dilakukan dengan tetap memperhatikan kemampuan dan skala usaha, *effective best practice* di industri perbankan yang dibandingkan terhadap market. Perseroan telah rutin mengikuti setiap tahun survei mengenai Total *Reward Survey* perbankan melalui konsultan independen yang memang profesional dan telah diikuti oleh mayoritas perbankan di Indonesia. Hal ini dilakukan sebagai bahan referensi dan masukan bagi penyesuaian remunerasi di bank **bjb** agar tetap menarik dan kompetitif. Selain itu, bank **bjb** juga selalu memastikan telah memenuhi ketentuan yang berlaku dan berada di atas standar Upah Minimum yang berlaku di wilayah operasional bank **bjb**. Untuk remunerasi yang bersifat variabel, pemberian remunerasi juga memperhatikan faktor risiko dalam kegiatan usaha dan dampak terhadap pendapatan bank **bjb**.

2. Pelaksanaan kaji ulang atas kebijakan Remunerasi pada tahun sebelumnya, beserta perbaikannya

bank **bjb** melakukan kaji ulang atas kebijakan remunerasi secara berkala dengan menyesuaikan pada ketentuan serta *best practice* maupun evaluasi sesuai ketentuan kebijakan dan prosedur yang berlaku. Kaji ulang kebijakan remunerasi dilakukan terhadap Surat Keputusan Direksi No. 1500/SK/DIR-CS/2018 tanggal 14 Desember 2018 tentang Pedoman Penghasilan, Tunjangan dan Fasilitas bagi Dewan Komisaris dan Direksi PT Bank Pembangunan Daerah Jawa Barat dan Banten, Tbk.

3. Mekanisme untuk memastikan bahwa Remunerasi bagi Pegawai di unit kontrol bersifat independen dari unit kerja yang diawasinya

Untuk memastikan independensi penerapan remunerasi bagi pegawai di unit kontrol, penilaian kinerja di unit kontrol tidak dikaitkan dengan pencapaian target kinerja dari unit kerja yang diawasinya, hal ini dipastikan melalui pemisahan struktur organisasi unit kontrol agar independen, termasuk mengenai persetujuan penetapan *goal setting* kinerja unit kerja maupun pegawai.

Remuneration Policy Development Process

Remuneration policy formulation process which includes:

1. Review of the background and objectives of the Remuneration policy;

The remuneration policy is formulated and determined with the aim of developing the quality of the management while taking into account the resilience and sustainability of bank **bjb**'s business.

The remuneration system policy is guided by the concept of the Merit System and Employee Performance, both in terms of fixed and variable remuneration adjustments.

In terms of fixed remuneration, the strategy is carried out by taking into account the capabilities and business scale, effective best practice in the banking industry compared to the market. The Company regularly participates in a survey on the Total Reward Survey of banking through an independent consultant who is professional and has been followed by the majority of banks in Indonesia. This is done as reference material and input for remuneration adjustments at bank **bjb** so that it remains attractive and competitive. Also, bank **bjb** always ensures having satisfied the applicable provisions and above Regional Minimum Wages standard prevailing in bank **bjb** operational region. For variable remuneration, the remuneration granting also considers risk factor in business activity and impact to bank **bjb** incomes.

2. The implementation of a review of the Remuneration policy in the previous year, along with its improvements

bank **bjb** conducts periodic reviews of remuneration policies by adjusting to the provisions and best practices as well as evaluations in accordance with applicable policies and procedures. A review of the remuneration policy was carried out on the Decree of the Directors No. 1500/SK/DIR-CS/2018 dated December 14, 2018 regarding Guidelines for Income, Allowances and Facilities for the Board of Commissioners and Directors of PT Bank Pembangunan Daerah Jawa Barat dan Banten, Tbk.

3. A mechanism to ensure that the remuneration for employees in the control unit is independent from the work units they supervise

To ensure the independence of remuneration implementation for employees in the control unit, performance appraisal in the control unit is not linked to the achievement of performance targets of the work units it supervises, this is ensured through the separation of the organizational structure of the control unit so that it is independent, including the approval of setting goals for the performance of the work unit and employee.

Cakupan Kebijakan Remunerasi dan Implementasinya

Kebijakan remunerasi pegawai pada Surat Keputusan Direksi Nomor 0500/SK/DIR-HCA/2021 tentang Perubahan Surat Keputusan Direksi PT Bank Pembangunan Daerah Jawa Barat Dan Banten, Tbk. Nomor 0303/SK/DIR-HCA/2021 tentang Standar Operasional Prosedur Pengelolaan Penghasilan dan Fasilitas Kepegawaian mencakup bagi pegawai pada seluruh unit kerja, pada perusahaan anak dan pada Badan Hukum yang terafiliasi dengan Bank. Khusus untuk remunerasi pada Perusahaan Anak diatur lebih lanjut pada Pedoman Penugasan Pegawai pada investee SK Dir No 0261/SK/DIR-HCA/2021 tanggal 29 Maret 2021.

Saat ini bank **bjb** belum memiliki perwakilan kantor maupun perusahaan anak yang berlokasi di luar negeri, sehingga kebijakan remunerasi tidak mencakup hal tersebut.

Remunerasi Dikaitkan dengan Kinerja

Remunerasi dikaitkan dengan risiko yang meliputi:

1. Jenis risiko utama (*key risk*) yang digunakan dalam menerapkan Remunerasi.
Risiko utama Perseroan di saat ini adalah Risiko Kredit.
2. Kriteria untuk menentukan jenis risiko utama, termasuk untuk risiko yang sulit diukur.
Jenis transaksi dan bisnis yang paling signifikan dalam menghasilkan profit dan keputusan yang diambil diberikan untuk suatu keputusan bisnis yang berdampak besar pada bisnis Perseroan.
3. Dampak penetapan risiko utama terhadap kebijakan Remunerasi yang Bersifat Variabel.
Dengan adanya penetapan jenis risiko utama akan berdampak ke penentuan KPI dan berdampak pada pemberian remunerasi yang bersifat variabel.
4. Perubahan penentuan jenis risiko utama dibandingkan dengan tahun lalu.
Belum terdapat perubahan jika dibandingkan tahun lalu.

Pengukuran Kinerja Dikaitkan dengan Remunerasi

Pengukuran kinerja dikaitkan dengan Remunerasi yang meliputi:

1. Tinjauan mengenai kebijakan Remunerasi yang dikaitkan dengan penilaian kinerja
 - a. Prestasi kerja masing-masing individu.
 - b. Kinerja keuangan Perseroan.
 - c. *Benchmark* industri.
 - d. Risiko yang mungkin timbul di kemudian hari sehingga menyebabkan kerugian bagi Perseroan.
2. Metode dalam mengaitkan Remunerasi individu dengan kinerja Bank, kinerja unit kerja dan kinerja individu

Scope of Remuneration Policy and Its Implementation

The employee remuneration policy in the Decree of the Board of Directors Number 0500/SK/DIR-HCA/2021 concerning Amendments to the Decree of the Board of Directors of PT Bank Pembangunan Daerah Jawa Barat Dan Banten, Tbk. Number 0303/SK/DIR-HCA/2021 concerning Standard Operating Procedures for Management of Income and Personnel Facilities applies to employees in all work units, subsidiaries and Legal Entities affiliated with the Company. Regarding remuneration in subsidiaries, it is further stipulated in the Guidelines for Employee Assignment in investee SK Dir No 0261/SK/DIR-HCA/2021 dated March 29, 2021.

Currently, bank **bjb** does not have representative offices or subsidiaries located abroad, so the remuneration policy does not include this.

Remuneration Associated With Performance

Remuneration is associated with risks that include:

1. The type of main risk (*key risk*) used in implementing the Remuneration.
The Company's main risk at this time is Credit Risk.
2. Criteria for determining the main types of risk, including those that are difficult to measure.
The types of transactions and businesses that are most significant in generating profits and the decisions taken are given to a business decision that has a major impact on the Company's business.
3. The impact of determining the main risk on the Variable Remuneration policy.
The determination of the main types of risk will have an impact on the determination of KPIs and have an impact on the provision of variable remuneration.
4. Changes in the determination of the main risk types compared to last year.
There has been no change compared to last year.

Performance Measurement Associated With Remuneration

Performance measurement remuneration is linked to remuneration which includes:

1. Review of Remuneration policy related to performance appraisal
 - a. The work performance of each individual.
 - b. Company's financial performance.
 - c. Industry benchmarks.
 - d. Risks that may arise in the future causing losses to the Company.
2. Methods in linking individual Remuneration with Company performance, work unit performance and individual performance

Kinerja Perseroan akan memengaruhi penentuan besarnya remunerasi khususnya yang bersifat variabel, serta kinerja individu dan kinerja unit kerja dilakukan *review* setiap 3 (tiga) bulan sekali maupun 1 (satu) tahun sekali. Hasil penilaian kinerja individu dan unit kerja tersebut menjadi dasar bagi perusahaan memberikan apresiasi dalam bentuk bonus, promosi *grade/jabatan*, dan kenaikan gaji tahunan.

3. Metode yang digunakan Bank untuk menyatakan bahwa kinerja yang disepakati tidak dapat tercapai sehingga perlu dilakukan penyesuaian atas remunerasi serta besarnya penyesuaian remunerasi jika kondisi tersebut terjadi

Pengukuran kinerja berdasarkan kinerja yang disepakati di awal tahun. Pemberian bonus berdasarkan penilaian kinerja individu dimana penentuannya sudah ditetapkan berdasarkan Surat Keputusan dan Surat Edaran.

Penyesuaian Remunerasi Dikaitkan Dengan Kinerja dan Risiko

Remunerasi yang bersifat variabel sebagaimana diatur pada POJK Nomor 45/POJK.03/2015 tentang Penerapan Tata Kelola dalam Pemberian Remunerasi bagi Bank Umum, dapat diberikan dalam bentuk Tunai dan/atau Saham. Selain hal tersebut, Bank wajib menetapkan pihak yang menjadi *Material Risk Takers (MRT)*, sebagaimana yang telah diatur dalam ketentuan internal Bank pada Surat Keputusan Direksi Nomor 0380/SK/DIR-CSE/2022 tanggal 22 Juli 2022 tentang Standar Operasional Prosedur Pengelolaan Penghasilan, Tunjangan dan Fasilitas bagi Dewan Komisaris dan Direksi. Selanjutnya kepada pihak yang menjadi MRT, pemberian remunerasi variabelnya wajib ditangguhkan Bank sebesar persentase tertentu.

1. Bank telah menetapkan yang menjadi MRT adalah seluruh Direksi. Tantiem untuk MRT diberikan dengan proporsi sebagai berikut:
 - a. 90% tunai dan diberikan secara langsung;
 - b. 10% ditangguhkan sebagai *Long Term Incentive (LTI)*, terdiri dari:
 - 5% dalam bentuk tunai; dan
 - 5% dalam bentuk saham.
2. Tantiem Bagi Dewan Komisaris diberikan sebagai berikut:
 - a. Komisaris Utama Independen dan Komisaris Independen diberikan seluruhnya secara langsung dalam bentuk tunai.
 - b. Komisaris diberikan 3% dalam bentuk saham dan sisanya diberikan tunai secara langsung.
3. Penundaan pembayaran remunerasi yang bersifat variabel. Malus diterapkan terhadap remunerasi yang bersifat variabel yang masih ditangguhkan dengan jangka waktu penangguhan selama 3 (tiga) tahun. Malus terjadi apabila MRT terindikasi melakukan *fraud*.

The Company's performance will affect the determination of remuneration, especially those that are variable, as well as individual performance and work unit performance, which is reviewed every 3 (three) months or once a year. The results of the individual and work unit performance assessments become the basis for the company to give appreciation in the form of bonuses, grade promotions/positions, and annual salary increases.

3. A description of the method used by the Bank to state that the agreed performance cannot be achieved so that it is necessary to make adjustments to the remuneration and the amount of remuneration adjustment if such conditions occur

Performance measurement based on agreed performance at the beginning of the year. The awarding of bonuses is based on individual performance assessments where the determination has been determined based on Decrees and Circular Letter.

Remuneration Adjustment Associated With Performance and Risk

Variable remuneration stipulated in POJK Number 45/POJK.03/2015 concerning the Implementation of Governance in the Provision of Remuneration for Commercial Banks can be given in the form of Cash and/or Share. In addition to this, the Company is obliged to determine the parties who become Material Risk Takers (MRT), as regulated in the Company's internal provisions in the Decree of Board of Directors Number 0380/SK/DIR-CSE/2022 dated July 22, 2022, concerning Standard Operating Procedures for the Management of Income, Allowances and Facilities for the Board of Commissioners and Directors. Furthermore, to the parties who become MRTs, the variable remuneration must be deferred by the Bank by a certain percentage.

1. The Bank has determined that the MRTs are all Directors. Tantiem for MRTs is given in the following proportion:
 - a. 90% cash and given directly;
 - b. 10% deferred as Long Term Incentive (LTI), consisting of:
 - 5% cash; and
 - 5% share.
2. Tantiem for the Board of Commissioners is given as follows:
 - a. Cash is entirely given to Independent President Commissioner and Independent Commissioner.
 - b. 3% of shares are given to Commissioners and the rest is given directly in cash.
3. Postponement of payment of variable remuneration. Malus is applied to variable remuneration which is still suspended with a suspension period of 3 (three) years. Malus occurs if MRT is suspected of committing fraud.

Kebijakan pembayaran (*vesting*) atas penangguhan yang dilakukan antara lain jangka waktu pembayaran. Jangka waktu penangguhan yaitu 3 (tiga) tahun sejak pertama kali remunerasi yang bersifat variabel dibayarkan. Pengungkapan faktor yang menentukan perbedaan remunerasi yang bersifat variabel yang ditangguhkan di antara Pegawai atau Kelompok Pegawai. Bank belum memiliki remunerasi dikaitkan dengan kinerja dan risiko yang diberlakukan untuk pegawai.

Kebijakan Pemberian Kompensasi Jangka Panjang Berbasis Kinerja

Program Kepemilikan Saham oleh Pegawai dan/atau Manajemen (ESOP/MSOP)

Pada tahun 2010, bank **bjb** melakukan aksi korporasi berupa *Initial Public Offering* (IPO). Dalam IPO tersebut, bank **bjb** mengeluarkan program EMSA (*Employee and Management Stock Allocation*) yaitu penjualan saham Perseroan kepada karyawan tetap, anggota Direksi dan anggota Dewan Komisaris (kecuali Komisaris Independen) Perseroan pada saat Penawaran Umum dengan jumlah sebanyak-banyaknya 10% (sepuluh persen) dari jumlah saham yang ditawarkan dalam Penawaran Umum atau sebanyak-banyaknya 242.407.250 lembar saham. Jangka Waktu pelaksanaan EMSA yaitu 6 bulan sejak pelaksanaan IPO. Tidak terdapat persyaratan khusus untuk karyawan tetap yang dapat mengikuti program EMSA. Dalam hal jumlah saham yang dipesan dalam program EMSA kurang dari 10% (sepuluh persen) saham, maka sisa saham akan ditawarkan kembali kepada masyarakat. Berdasarkan hasil penawaran awal (*book building*), jumlah pemesan saham program EMSA adalah sebesar Rp46.360.200.000 atau 77.267.000 lembar saham, setara dengan 3,2% dari jumlah saham yang ditawarkan ke publik. Saham yang dibeli dalam program EMSA tidak dapat dijual dalam periode 6 (enam) bulan terhitung sejak tanggal pencatatan saham Perseroan di BEI, dengan *exercise price* sesuai harga pada saat Penawaran Umum, yaitu Rp600 per lembar saham. Setelah program EMSA pada saat IPO tersebut, bank **bjb** belum melaksanakan program EMSA kembali.

Akuntan Publik

Penerapan Fungsi Audit Ekstern

Agar proses audit sesuai dengan Standar Profesional Akuntan serta perjanjian kerja dan ruang lingkup audit yang telah ditetapkan dan selesai sesuai dengan target waktu yang telah ditetapkan, secara rutin dilakukan pertemuan-pertemuan yang membahas beberapa permasalahan penting yang signifikan.

Performance-Based Long-Term Compensation Policy

Employee and/or Management Share Ownership Program (ESOP/MSOP)

In 2010, bank **bjb** undertook a corporate action in the form of an Initial Public Offering (IPO). In this IPO, bank **bjb** introduced the EMSA (*Employee and Management Stock Allocation*) program, which involved the sale of company shares to permanent employees, members of the Board of Directors, and members of the Board of Commissioners (except Independent Commissioners) at the time of the Public Offering, with a maximum of 10% (ten percent) of the total shares offered in the Public Offering or up to 242,407,250 shares. The EMSA implementation period is 6 months from the IPO implementation. There were no specific requirements for permanent employees to participate in the EMSA program. If the number of shares subscribed in the EMSA program was less than 10% (ten percent), the remaining shares would be re-offered to the public. Based on the initial offering (*book building*) results, the number of shares subscribed in the EMSA program amounted to IDR46,360,200,000 or 77,267,000 shares, equivalent to 3.2% of the total shares offered to the public. Shares purchased under the EMSA program could not be sold for a period of 6 (six) months from the date of the company's share listing on the IDX, with an exercise price equal to the price at the time of the Public Offering, which was IDR600 per share. Following the EMSA program at the time of the IPO, bank **bjb** has not implemented the EMSA program again.

Risk Management System

The Bank implemented a risk management system based on 4 (four) pillars as follows:

Pengawasan aktif Direksi dan Dewan Komisaris

Direksi dan Dewan Komisaris bertanggung jawab atas efektivitas penerapan Manajemen Risiko Bank. Untuk itu Direksi dan Dewan Komisaris harus memahami Risiko yang dihadapi oleh Bank dan memberikan arahan yang jelas, melakukan pengawasan dan mitigasi secara aktif serta mengembangkan budaya Manajemen Risiko dalam organisasi Bank. Dalam rangka mendukung penerapan Manajemen Risiko secara efektif, Direksi secara aktif terlibat dalam *Risk Management Committee (RMC)*, Komite Manajemen Risiko Terintegrasi (KMRT) serta pembentukan Komite dalam struktur Dewan Komisaris seperti Komite Pemantau Risiko (KPR), Komite Audit dan Komite Tata Kelola (KTT).

Kecukupan kebijakan, prosedur dan penetapan limit sebagai pedoman penerapan manajemen risiko

Dalam rangka pengendalian Risiko secara efektif, kebijakan dan prosedur yang dimiliki Bank didasarkan pada strategi Manajemen Risiko yang dilengkapi dengan toleransi Risiko dan limit Risiko. Penetapan toleransi Risiko dan limit Risiko dilakukan dengan memperhatikan tingkat Risiko yang akan diambil dan strategi Bank secara keseluruhan. Penerapan Manajemen Risiko yang efektif telah didukung dengan kerangka yang mencakup kebijakan dan prosedur Manajemen Risiko serta limit Risiko yang ditetapkan secara jelas sejalan dengan visi, misi, dan strategi bisnis Bank. Penyusunan kebijakan dan prosedur Manajemen Risiko tersebut dilakukan dengan memperhatikan antara lain: jenis, kompleksitas kegiatan usaha, profil Risiko, risk appetite dan *risk tolerance*, keterkaitan antar Risiko, serta peraturan yang ditetapkan otoritas dan/atau praktik perbankan yang sehat. Selain itu, penerapan kebijakan dan prosedur Manajemen Risiko yang dimiliki Bank harus didukung oleh kecukupan permodalan dan kualitas SDM. Hal-hal yang perlu diperhatikan dalam penetapan kerangka Manajemen Risiko termasuk kebijakan, prosedur dan limit, antara lain:

1. Strategi Manajemen Risiko

Strategi manajemen risiko merupakan acuan terhadap pendekatan mengenai cara pencapaian tujuan Manajemen Risiko. Bank merumuskan strategi Manajemen Risiko sesuai strategi bisnis secara keseluruhan dengan memperhatikan risk appetite, risk tolerance dan risk limit. Strategi Manajemen Risiko disusun untuk memastikan bahwa eksposur risiko Bank berada pada atau di bawah tingkat eksposur risiko yang ditetapkan sesuai dengan kebijakan, prosedur internal Bank, peraturan perundang-undangan dan ketentuan lain yang berlaku. Strategi Manajemen Risiko disusun berdasarkan prinsip-prinsip umum berikut:

- a. Strategi Manajemen Risiko harus berorientasi jangka panjang untuk memastikan kelangsungan usaha Bank dengan mempertimbangkan kondisi atau siklus ekonomi;
- b. Strategi Manajemen Risiko secara komprehensif dapat mengendalikan dan mengelola risiko Bank dan Perusahaan Anak; dan

Active supervision of the Board of Directors and Board of Commissioners

The Board of Directors and Board of Commissioners were responsible for the effectiveness of the Company's Risk Management implementation. For this reason, the Board of Directors and Board of Commissioners had to understand the risks faced by the Bank and provide clear directions, carry out active monitoring and mitigation as well as develop a culture of risk management within the Company's organization. In order to support the implementation of effective Risk Management, the Board of Directors was actively involved in the Risk Management Committee (RMC), Integrated Risk Management Committee (KMRT) and the establishment of Committees within the Board of Commissioners structure such as the Risk Monitoring Committee (KPR), Audit Committee and Governance Committee (summit).

Adequacy of policies, procedures and setting limits as guidelines for the implementation of risk management

In order to control Risk effectively, the Bank's policies and procedures were based on the risk management strategy complemented by risk tolerance and Risk limits. Determination of Risk tolerance and risk limits was carried out by taking into account the level of Risk to be taken and the overall strategy of the Bank. Effective implementation of risk management was supported by a framework that included risk management policies and procedures as well as Risk limits that were clearly defined in line with the Company's vision, mission and business strategy. The preparation of risk management policies and procedures was carried out by taking into account type, complexity of business activities, risk profile, risk appetite and risk tolerance, interrelationships between risks, as well as regulations stipulated by the authorities and/or sound banking practices. In addition, the implementation of risk management policies and procedures owned by the Bank had to be supported by adequate capital and quality human resources. Things that needed to be considered in determining the Risk Management framework including policies, procedures and limits were:

1. Risk Management Strategy

The risk management strategy was a reference to the approach regarding how to achieve the objectives of risk management. The Bank formulated a risk management strategy according to the overall business strategy by taking into account risk appetite, risk tolerance and risk limits. The risk management strategy was structured to ensure that the Bank's risk exposure was at or below the risk exposure level set in accordance with the Company's policies, internal procedures, laws and regulations and other applicable provisions. The risk management strategy was prepared based on the following general principles:

- a. The risk management strategy had to be long-term oriented to ensure the continuity of the Company's business by taking into account conditions or economic cycles;
- b. Comprehensive risk management strategy could control and manage the risks of the Company and Subsidiaries; and

- c. Mencapai kecukupan permodalan yang diharapkan disertai alokasi sumber daya yang memadai.

Strategi Manajemen Risiko disusun dengan mempertimbangkan faktor-faktor berikut:

- a. Kondisi ekonomi serta dampaknya pada risiko Bank;
- b. Organisasi Bank, termasuk kecukupan sumber daya manusia dan infrastruktur pendukung;
- c. Kondisi keuangan Bank, organisasi Bank, kemampuan untuk menghasilkan laba dan kemampuan mengidentifikasi, memantau, dan mengendalikan risiko yang timbul sebagai akibat perubahan faktor internal dan eksternal;
- d. Diversifikasi portofolio Bank.

Strategi Manajemen Risiko di review secara berkala dan dikomunikasikan secara efektif kepada seluruh jenjang organisasi agar memahami secara jelas pendekatan yang telah ditetapkan serta mematuhi seluruh aspek yang terkait.

- 2. Tingkat Risiko yang akan diambil (*Risk Appetite*), Toleransi Risiko (*Risk Tolerance*) dan Limit (*Risk Limit*)

Risk Appetite merupakan tingkat risiko yang bersedia diambil oleh Bank dalam rangka mencapai sasaran atau tingkat laba yang diharapkan. *Risk Appetite* tercermin dalam strategi dan sasaran bisnis Bank serta mencerminkan harapan Pemangku Kepentingan. Toleransi Risiko (*risk tolerance*) merupakan tingkat dan jenis Risiko yang secara maksimum ditetapkan oleh Bank. *Risk tolerance* merupakan penjabaran dari *risk appetite*. Direksi memberikan arahan yang jelas mengenai *risk appetite*, *risk tolerance* dan *risk limit* Bank.

Bank telah menetapkan *risk appetite statement* dan *risk tolerance* terhadap 8 (delapan) risiko melalui Surat Keputusan Direksi nomor 0363/SK/DIR-MRP/2023 Tanggal 29 September 2023 Tentang *Risk Appetite Statement* dan *Risk Tolerance* PT. Bank Pembangunan Daerah Jawa Barat dan Banten, Tbk.

Penetapan *Risk Appetite*, *Risk Tolerance* dan *Risk Limit* harus dapat mengakomodir tujuan seluruh *stakeholder* bank yang meliputi Regulator, Pemegang Saham, Investor, Direksi, Karyawan maupun Nasabah. Adapun tujuan dari *stakeholder* meliputi pemenuhan atas aspek kepatuhan, risiko, permodalan, return, maupun pertumbuhan yang berkelanjutan. Mengingat sifatnya yang menyeluruh, maka penetapan dan pengelolaan *Risk Appetite*, *Risk Tolerance* dan *Risk Limit* memerlukan komitmen bersama seluruh lini bank. *Risk Appetite*, *Risk Tolerance* dan *Risk Limit* yang telah ditetapkan oleh bank bertujuan untuk menunjang pencapaian strategi bisnis bank dengan tingkat risiko yang dapat diterima. Dalam implementasinya, akan dilakukan pemantauan secara berkala atas tingkat eksposur risiko aktual terhadap posisi pencapaian strategi bisnis bank. Adapun aspek tata kelola (*governance*) terdiri dari tiga aspek, antara lain:

- c. Achieve the expected capital adequacy accompanied by adequate allocation of resources.

The risk management strategy was prepared by considering the following factors:

- a. Economic conditions and their impact on Company risk;
- b. Company organization, including the adequacy of human resources and supporting infrastructure;
- c. The financial condition of the Company, the organization of the Company, the ability to generate profits and the ability to identify, monitor and control risks that arise as a result of changes in internal and external factors;
- d. Company portfolio diversification.

The risk management Strategy was regularly reviewed and communicated effectively to all levels of the organization in order to clearly understand the established approach and comply with all related aspects.

- 2. Risk Appetite, Risk Tolerance and Risk Limit

Risk Appetite is the level of risk that is willing to be taken by the Bank in order to achieve the target or expected profit level. *Risk Appetite* is reflected in the Bank's business strategy and objectives and reflects the expectations of Stakeholders. *Risk tolerance* is the maximum level and type of risk determined by the Company. *Risk tolerance* is a description of *risk appetite*. The Board of Directors provided clear directions regarding the Bank's *risk appetite*, *risk tolerance* and *risk limits*.

The Bank has determined a *risk appetite statement* and *risk tolerance* for 8 (eight) risks through the Decree of the Board of Directors number 0363/SK/DIR-MRP/2023 dated September 29, 2023 concerning the *Risk Appetite Statement* and *Risk Tolerance* of PT. Bank Pembangunan Daerah Jawa Barat dan Banten, Tbk.

Determination of *risk appetite*, *risk tolerance* and *risk limit* had to be able to accommodate the objectives of all bank stakeholders which included Regulators, Shareholders, Investors, Directors, Employees and Customers. The objectives of stakeholders included compliance with aspects of compliance, risk, capital, return, and sustainable growth. Given its comprehensive nature, the determination and management of *risk appetite*, *Risk tolerance* and *risk limit* required a joint commitment from all lines of the bank. *Risk Appetite*, *Risk Tolerance* and *Risk Limits* that had been set by the bank aimed to support the achievement of the bank's business strategy with an acceptable level of risk. In its implementation, regular monitoring was carried out on the level of actual risk exposure to the position of achieving the bank's business strategy. The governance aspect consisted of three aspects, including:

- a. *Strategic Level*
Strategic Level merupakan jenjang kewenangan yang melekat pada Direksi melalui Komite Manajemen Risiko. Direksi berwenang menentukan selera risiko yang diinginkan (*Risk Appetite*) selaras dengan strategi bisnis bank. Disamping itu, Direksi juga berwenang untuk memberikan persetujuan atas besaran nilai *Risk Tolerance* dan nilai *Risk Limit* dengan merujuk pada *Risk Appetite* yang telah ditentukan.
- b. *Tactical Level*
Pengelolaan *Risk Appetite*, *Risk Tolerance* dan *Risk Limit* pada jenjang *Tactical Level* merupakan kewenangan Satuan Kerja Manajemen Risiko dalam hal mengembangkan metodologi *Risk Tolerance* untuk setiap jenis risiko secara *bankwide*.
- c. *Operational Level*
Operational Level merupakan kewenangan dan dibentuk oleh setiap *Risk Taking Unit* dimana perannya adalah dalam menentukan besaran *Risk Limit* yang dapat diterima dan hasilnya dikoordinasikan dengan Satuan Kerja Manajemen Risiko. Besaran *Risk Limit* yang diusulkan, selanjutnya disampaikan kepada Satuan Kerja Manajemen Risiko untuk dilakukan *review* terkait metode perhitungan serta dalam rangka melakukan sinkronisasi dengan hasil perhitungan *Risk Tolerance* maupun *Risk Appetite*.

Cekucupan proses identifikasi, pengukuran, pemantauan dan pengendalian risiko serta sistem informasi manajemen.

Identifikasi, pengukuran, pemantauan dan pengendalian Risiko merupakan bagian utama dari proses penerapan Manajemen Risiko. Identifikasi Risiko bersifat proaktif, mencakup seluruh produk dan aktivitas bisnis Bank dan dilakukan dalam rangka menganalisa sumber dan kemungkinan timbulnya Risiko serta dampaknya terhadap kelangsungan bisnis bank. Selanjutnya perlu dilakukan pengukuran Risiko yang telah diidentifikasi sesuai dengan karakteristik dan kompleksitas kegiatan usaha Bank. Atas hasil pengukuran tersebut perlu dilakukan pemantauan yang dilakukan oleh *Risk Taking Unit* (RTU) yang berkoordinasi dengan Satuan Kerja Manajemen Risiko (SKMR) selaku pihak yang independen. Selain itu, guna mendukung efektivitas penerapan Manajemen Risiko perlu didukung pula oleh pengendalian risiko dan sistem informasi manajemen risiko yang memadai.

Sistem informasi Manajemen Risiko merupakan bagian dari sistem informasi manajemen yang dimiliki dan dikembangkan sesuai dengan kebutuhan Bank, mencakup laporan atau informasi paling sedikit mengenai:

1. Eksposur Risiko;
2. Kepatuhan terhadap kebijakan dan prosedur Manajemen Risiko serta penetapan Limit Risiko; dan
3. Realisasi pelaksanaan Manajemen Risiko dibandingkan dengan target yang ditetapkan.

- a. Strategic Level
Strategic Level was a level of authority attached to the Board of Directors through the Risk Management Committee. The Board of Directors had the authority to determine the desired risk appetite (Risk Appetite) in line with the bank's business strategy. In addition, the Board of Directors was also authorized to give approval on the amount of risk tolerance and risk limit values by referring to the predetermined risk appetite.
- b. Tactical Level
Management of risk appetite, risk tolerance and risk limit at the tactical level level was the authority of the Risk Management Work Unit in terms of developing a risk tolerance methodology for each type of risk bankwide.
- c. Operational Level
The operational level was the authority and was formed by each risk taking Unit where its role is in determining the amount of acceptable risk limit and the results were coordinated with the Risk Management Work Unit. The amount of the proposed risk limit was then submitted to the Risk Management Work Unit for review regarding the calculation method and in order to synchronize with the calculation results of risk tolerance and risk appetite.

Adequacy of risk identification, measurement, monitoring and control processes as well as management information systems.

Risk identification, measurement, monitoring and control are the main parts of the process of implementing risk management. Risk identification is proactive in nature, covers all products and business activities of the Company and is carried out in order to analyze the sources and likelihood of Risks occurring and their impact on the continuity of the Company's business. Furthermore, it is necessary to measure the risks that have been identified in accordance with the characteristics and complexity of the Company's business activities. The results of these measurements need to be monitored by the Risk Taking Unit (RTU) in coordination with the Risk Management Work Unit (SKMR) as an independent party. In addition, in order to support the effectiveness of the implementation of risk management, it is also necessary to be supported by adequate risk control and risk management information systems.

The risk management information system is part of the management information system owned and developed according to the needs of the Company, including reports or information at least on:

1. Risk Exposures;
2. Compliance with Risk Management policies and procedures, as well as the determination of Risk Limits; and
3. Realization of the Risk Management implementation in comparison with the set target.

Sistem informasi Manajemen Risiko digunakan untuk mendukung pelaksanaan proses identifikasi, pengukuran, pemantauan dan pengendalian Risiko sebagai bagian dari proses penerapan Manajemen Risiko yang efektif. Beberapa hal yang harus diperhatikan agar penerapan sistem informasi Manajemen Risiko berjalan efektif maka diperlukan kemampuan untuk menghasilkan informasi yang tepat waktu, akurat, konsisten, komprehensif, relevan dan informatif sehingga dapat digunakan oleh Direksi, Dewan Komisaris dan satuan kerja terkait dalam penerapan Manajemen Risiko untuk menilai, memantau dan memitigasi Risiko yang dihadapi bank dalam proses pengambilan keputusan. Selain itu, sistem informasi Manajemen Risiko harus dapat mendukung pelaksanaan pelaporan kepada regulator.

Sistem pengendalian internal yang menyeluruh.

Proses penerapan Manajemen Risiko yang efektif harus dilengkapi dengan sistem pengendalian internal yang andal. Penerapan sistem pengendalian internal secara efektif dapat membantu pengurus Bank menjaga aset Bank, menjamin tersedianya pelaporan keuangan dan manajerial yang dapat dipercaya, meningkatkan kepatuhan Bank terhadap ketentuan dan peraturan perundang-undangan serta mengurangi Risiko terjadinya kerugian, penyimpangan dan pelanggaran aspek kehati-hatian. Terselenggaranya sistem pengendalian internal Bank yang andal dan efektif menjadi tanggung jawab dari seluruh *Risk Taking Unit* dan satuan kerja pendukung serta Satuan Kerja Audit Internal. Hal-hal yang perlu diperhatikan dalam pelaksanaan sistem pengendalian internal antara lain:

1. Pelaksanaan sistem pengendalian internal secara efektif dalam penerapan Manajemen Risiko mengacu pada kebijakan dan prosedur yang telah ditetapkan;
2. Pelaksanaan sistem pengendalian internal dilakukan secara efektif terhadap pelaksanaan kegiatan usaha dan operasional pada seluruh jenjang organisasi Bank, paling sedikit mampu secara tepat waktu mendeteksi kelemahan dan penyimpangan yang terjadi serta wajib memastikan:
 - a. Kepatuhan terhadap peraturan dan perundang-undangan serta kebijakan atau ketentuan internal Bank;
 - b. Tersedianya informasi keuangan dan manajemen yang lengkap, akurat, tepat guna, dan tepat waktu;
 - c. Efektivitas dan efisiensi dalam kegiatan operasional; dan
 - d. Efektivitas budaya Risiko (*risk culture*) pada organisasi Bank secara menyeluruh.
3. Sistem pengendalian internal dalam penerapan Manajemen Risiko paling sedikit mencakup:
 - a. Kesesuaian antara sistem pengendalian internal dengan jenis dan tingkat Risiko yang melekat pada kegiatan usaha Bank;
 - b. Penetapan wewenang dan tanggung jawab untuk pemantauan kepatuhan kebijakan dan prosedur Manajemen Risiko serta penetapan Limit Risiko;
 - c. Penetapan jalur pelaporan dan pemisahan fungsi yang jelas dari *Risk Taking Unit* kepada satuan kerja yang melaksanakan fungsi pengendalian;

The risk management Information system is used to assist in the process of identifying, measuring, monitoring, and controlling risks as part of the implementation of effective risk management, which requires the ability to produce timely, accurate, consistent, comprehensive, relevant, and useful information. It can be used afterward by the Board of Directors, Board of Commissioners, and related work units in carrying out risk management to assess, monitor, and mitigate the risks faced by the Bank in the decisionmaking process. In addition, the risk management Information system must be able to support the implementation of reporting to regulators.

 - b. The determination of authority and responsibility for monitoring compliance with Risk Management policies and procedures and the establishment of Risk Limits;
 - c. The establishment of reporting lines and clear separation of functions from the Risk Taking Unit to the work unit carrying out the control function;

- d. Struktur organisasi yang menggambarkan secara jelas tugas dan tanggung jawab masing-masing unit dan individu;
 - e. Pelaporan keuangan dan kegiatan operasional yang akurat dan tepat waktu;
 - f. Kecukupan prosedur untuk memastikan kepatuhan Bank terhadap ketentuan dan peraturan perundang-undangan;
 - g. Kaji ulang yang efektif, independen dan obyektif terhadap kebijakan, kerangka dan prosedur operasional Bank;
 - h. Pengujian dan kaji ulang yang memadai terhadap sistem informasi manajemen;
 - i. Dokumentasi secara lengkap dan memadai terhadap cakupan, prosedur operasional, temuan audit serta tanggapan pengurus Bank berdasarkan hasil audit; dan
 - j. Verifikasi dan kaji ulang secara berkala dan berkesinambungan terhadap penanganan kelemahan Bank yang bersifat material dan tindakan pengurus Bank untuk memperbaiki penyimpangan yang terjadi.
4. Pelaksanaan kaji ulang terhadap penerapan Manajemen Risiko paling sedikit sebagai berikut:
 - a. Kaji ulang dan Evaluasi dilakukan secara berkala, paling sedikit setiap tahun oleh Satuan Kerja Manajemen Risiko dan Satuan Kerja Audit Internal;
 - b. Cakupan kaji ulang dan Evaluasi dapat ditingkatkan frekuensi atau intensitasnya, berdasarkan perkembangan Eksposur Risiko Bank, perubahan pasar, metode pengukuran dan pengelolaan Risiko;
 - c. Khusus untuk kaji ulang dan Evaluasi terhadap pengukuran Risiko oleh Satuan Kerja Manajemen Risiko, paling sedikit mencakup:
 - Kesesuaian kerangka Manajemen Risiko yang meliputi kebijakan, struktur organisasi, alokasi sumber daya, desain proses Manajemen Risiko, sistem informasi dan pelaporan Risiko Bank dengan kebutuhan bisnis Bank, serta perkembangan peraturan dan best practice terkait Manajemen Risiko;
 - Metode, asumsi dan variabel yang digunakan untuk mengukur Risiko dan menetapkan Limit Eksposur Risiko;
 - Perbandingan antara hasil dari metode pengukuran Risiko yang menggunakan simulasi atau proyeksi pada masa datang dengan hasil aktual;
 - Perbandingan antara asumsi yang digunakan dalam metode dimaksud dengan kondisi yang sebenarnya atau aktual;
 - Perbandingan antara Limit yang ditetapkan dengan eksposur yang sebenarnya atau aktual; dan
 - Penentuan kesesuaian antara pengukuran dan Limit Eksposur Risiko dengan kinerja pada masa lalu dan posisi permodalan Bank saat ini.
5. Pelaksanaan kaji ulang oleh pihak independen yang ditunjuk oleh Bank atau Satuan Kerja Audit Internal Bank antara lain mencakup:
 - d. A clear description of an organizational structure on the duties and responsibilities of each unit and individual;
 - e. Accurate and timely reporting of financial and operational activities;
 - f. Sufficient procedures to ensure the Bank's compliance with laws and regulations;
 - g. Effective, independent, and objective review of the Bank's operational policies, frameworks, and procedures;
 - h. Adequate testing and review of management information systems;
 - i. Complete and adequate documentation of the scope, operational procedures, audit findings, and responses of the Bank's management based on the audit results; and
 - j. Regular and continuous verification and review of the handling of material weaknesses of the Bank and the actions of the Bank's management to resolve irregularities that occur.
4. The implementation of a Risk Management review at least includes:
 - a. Reviews and evaluations are conducted regularly, at least once a year by the Risk Management Work Unit and Internal Audit Work Unit;
 - b. The frequency or intensity of the scope of reviews and evaluations may be increased based on the development of the Bank's Risk Exposures, market changes, measurement methods, and risk management;
 - c. Particularly for the review and evaluation of risk measurement by the Risk Management Work Unit, it should at least include:
 - The suitability of the Risk Management framework that includes policies, organizational structure, resource allocation, Risk Management process design, information systems, and reporting of the Bank's Risk with the Bank's business needs, as well as the development of regulations and best practices related to Risk Management;
 - Methods, assumptions, and variables currently in place to measure Risk and establish the Risk Exposure Limits;
 - Comparison between the results of Risk measurement methods using simulations or future projections and the actual results;
 - Comparison between the assumptions used in the method and the actual conditions;
 - Comparison between the set limits and the actual exposures; and
 - Determination of the appropriateness of the measurement and the Risk Exposure Limits with the Bank's past performance and the Bank's current capital position.
5. The implementation of a review by an independent party appointed by the Bank or the Bank's Internal Audit Unit includes:

- a. Keandalan kerangka Manajemen Risiko yang mencakup kebijakan, struktur organisasi, alokasi sumber daya, desain proses Manajemen Risiko, sistem informasi dan pelaporan Risiko Bank; dan
 - b. Penerapan Manajemen Risiko oleh unit bisnis atau aktivitas pendukung, termasuk kaji ulang terhadap pelaksanaan pemantauan oleh Satuan Kerja Manajemen Risiko.
6. Penyampaian hasil penilaian kaji ulang Satuan Kerja Manajemen Risiko kepada Dewan Komisaris, Satuan Kerja Audit Internal, Direktur yang membawahkan fungsi Kepatuhan dan Direksi terkait lainnya sebagai masukan dalam rangka penyempurnaan kerangka dan proses Manajemen Risiko;
 7. Pemantauan oleh Satuan Kerja Audit Internal terhadap perbaikan atas hasil temuan audit internal maupun eksternal. Temuan audit yang belum ditindaklanjuti harus diinformasikan oleh Satuan Kerja Audit Internal kepada Direksi untuk diambil langkah-langkah yang diperlukan; dan
 8. Tingkat responsif Bank terhadap kelemahan dan/atau penyimpangan yang terjadi terhadap ketentuan internal dan eksternal yang berlaku.
- a. The reliability of the Risk Management framework that includes policies, organizational structure, resource allocation, Risk Management process design, information systems, and reporting of the Bank's risk; and
 - b. The implementation of Risk Management by business units or supporting activities, including a review of the implementation of monitoring by the Risk Management Work Unit.
6. Submission of the Risk Management Working Unit review assessment results to the Board of Commissioners, Internal Audit Working Unit, Director in charge of the Compliance function, and other relevant Directors as input to improve the Risk Management framework and process;
 7. Monitoring the improvement of internal and external audit findings by the Internal Audit Working Unit. Audit findings that have not been followed up must be informed by the Internal Audit Working Unit to the Board of Directors so that necessary steps can be taken; and
 8. The Bank's level of responsiveness to weaknesses and/ or irregularities that occur against applicable internal and external regulations.

Profil Risiko dan Pengelolannya

Terdapat 8 jenis risiko yang dihadapi Perseroan dan harus dikelola dengan baik. Kedelapan jenis risiko tersebut disebut inheren risk yang meliputi: risiko kredit, risiko likuiditas, risiko pasar, risiko operasional, risiko strategis, risiko kepatuhan, risiko hukum dan risiko reputasi. Adapun penjelasan mengenai risiko-risiko tersebut dan upaya pengelolannya adalah sebagai berikut:

1. Risiko Kredit

Terkait proses identifikasi, pengukuran, pemantauan, dan pengendalian risiko kredit, bank **bjb** telah melakukan hal-hal sebagai berikut:

- Bank secara berkala melakukan analisa menyeluruh atas aspek internal dan eksternal bank melalui *Root Cause of Credit Risk* (RCCR) yang berisi analisa penyebab penurunan kolektibilitas debitur yang berdampak pada timbulnya *Non Performing Loan* (NPL).
- Bank melakukan perhitungan *Stress Test* Risiko Kredit yang disampaikan kepada Direksi dan Dewan Komisaris. Pelaksanaan *stress test* dilakukan dengan pendekatan portfolio level dan bertujuan untuk menghitung pengaruh kondisi *shock* makro ekonomi terhadap peningkatan NPL secara *bankwide*. Pelaksanaan perhitungan menggunakan *satellite model* yang meliputi baik kredit produktif maupun kredit non-produktif pada seluruh

Risk Profile and Management

There are 8 (eight) types of risks faced by the Company and must be managed properly. These eight types of risks are called inherently risk which include credit risk, liquidity risk, market risk, operational risk, strategic risk, compliance risk, legal risk and reputational risk. The explanations of these risks and management efforts are as follows:

1. Credit Risk

Regarding the process of identifying, measuring, monitoring, and controlling credit risk, bank **bjb** has carried out the following:

- The bank periodically conducts a thorough analysis of internal and external aspects of the bank through the Root Cause of Credit Risk (RCCR) which contains the analysis of the cause of the borrower's collectibility decrease in the occurrence of Non Performing Loan (NPL).
- The Bank calculates the Credit Risk Stress Test which is submitted to the Directors and the Board of Commissioners. The implementation of stress tests is carried out using a portfolio level approach and aims to calculate the effect of macroeconomic shock conditions on bank-wide NPL increases. The calculation uses a satellite model covering both productive and nonproductive loans in all economic sectors. The satellite model is a multiple

sektor ekonomi. *Satellite model* tersebut merupakan perhitungan regresi *multiple* yang menghubungkan kondisi makro ekonomi sebagai *independent variable* dan NPL sebagai *dependent variable*.

- c. Selanjutnya secara berkala disusun laporan perkembangan eksposur risiko kredit yang disusun dalam rangka mitigasi risiko dan sebagai upaya perbaikan segera sesuai perkembangan tingkat risiko. Pemantauan atas kualitas portofolio kredit yang dilaporkan secara berkala kepada Direksi melalui hal-hal sebagai berikut:
 - *Review* dan evaluasi berkala melalui pelaksanaan *business review* termasuk diantaranya pembahasan mengenai posisi serta kualitas portofolio kredit.
 - Kaji ulang atas potensi risiko dalam aktivitas perkreditan yang dilaporkan secara independen oleh Satuan Kerja Manajemen Risiko.

2. Risiko Pasar

Adapun upaya pengelolaan Risiko Pasar yang telah dilakukan bank **bjb** adalah sebagai berikut:

- a. Bank telah memiliki prosedur dan identifikasi risiko suku bunga *banking book* yang didukung oleh sistem informasi yang sangat memadai dan adanya pelaporan secara harian mengenai pergerakan nilai tukar, suku bunga, dan informasi pasar lainnya ke Direksi termasuk *over limit* (pelampauan limit).
- b. Bank telah memiliki *risk appetite*, *risk tolerance* dan *risk limit* untuk parameter risiko pasar yang ditetapkan oleh Dewan Komisaris dan Direksi.
- c. Bank melakukan proses *review* atau validasi model pengukuran risiko pasar yang dilakukan secara berkala melalui *back testing* dimana model pengukurannya masih valid sesuai hasil *back testing*. Adapun mengenai validasi dan *back testing* tersebut disusun dalam bentuk laporan VaR (*Value at Risk*) dan validasi model.
- d. Bank memiliki prosedur pemantauan limit secara harian sebagai standardisasi pemantauan Divisi Manajemen Risiko Kredit, Pasar dan Terintegrasi terhadap aktivitas *Dealing Room Treasury* termasuk tindak lanjut yang akan dilakukan oleh *risk taking unit* apabila terjadi pelampauan dan dilaporkan kepada Direksi.
- e. Bank melakukan pengendalian risiko pasar melalui *monitoring* terhadap kontrak transaksi dan penilaian kembali kredibilitas *counterparty* secara harian dan dipantau oleh *dedicated person* yang berpengalaman kemudian dalam penetapan *limit counterparty* dilakukan oleh unit kerja lain yang independen dari unit kerja bisnis sehingga proses penetapan limitnya melibatkan *four eyes principle*.
- f. Sebagai upaya meningkatkan informasi atas eksposur risiko pasar yang dihadapi bank, unit kerja terkait telah melaporkan eksposur risiko pasar baik secara harian (utilisasi *treasury*), mingguan (*treasury utilization report*), bulanan (analisis pengukuran risiko pasar & likuiditas),

regression calculation that connects macroeconomic conditions as the independent variable and NPL as the dependent variable.

- c. Further compiled reports on the progress of credit risk exposure that are arranged in order to mitigate risk and as an effort to repair immediately according to the development of risk level. Monitoring of the quality of credit portfolio reported periodically to the directors through the following matters:
 - Periodic Review and evaluation through the implementation of the business Review including the discussion on the position and quality of the credit portfolio.
 - Review of the potential risks in the crediting activity that is reported independently by the risk management Unit.

2. Market Risk

The Market Risk management efforts that have been carried out by bank **bjb** are as follows:

- a. The Bank has had procedures and identification of interest rate banking book which is supported by a very adequate information system and the daily reporting of exchange rate movements, interest rates, and other market information to the Directors including over limit.
- b. The Bank has had risk appetite, risk tolerance and risk limit for the market risk parameters established by the Board of Commissioners and Directors.
- c. The Bank performs a review or validation of the market risk measurement model conducted periodically through the back testing with the size of the model is still valid according to the results of back testing. As for the validation and back testing is compiled in the form of VaR (*Value at Risk*) and model validation.
- d. The Bank has daily limit monitoring procedures as a standardized monitoring of the risk management division of the Dealing Room Treasury activities including followup to the risk taking unit in the event of a disappearance and reported to the directors.
- e. The Bank conducts the control of market risk through monitoring of transaction contracts and revaluation of counterparty credibility on a daily basis and monitored by experienced dedicated person later in the determination of counterparty limit Other work units that are independent of the business work unit so that the limitation of the determination process involves 4 (four) Eyes principle utilization).
- f. As an effort to increase information on exposure market risks faced by banks, related work units have report good market risk exposure on a daily basis (treasury utilization report), weekly (treasury utilization report), monthly (market and liquidity risk measurement analysis),

semesteran (*market risk stress test*), kepada Direksi dan pejabat eksekutif sehingga diharapkan adanya tindak lanjut perbaikan dan proses mitigasi untuk meminimalisir potensi risiko yang akan datang.

- g. Bank telah memiliki Komite ALCO sebagai perangkat organisasi dalam mendukung manajemen risiko pasar yang efektif.
- h. Dalam proses pengukuran, pemantauan yang dilakukan satuan kerja manajemen risiko melalui pelaporan atas aktivitas unit kerja *treasury* masih dilakukan secara manual dan belum tersistem namun demikian mempertimbangkan eksposur transaksi bank yang belum kompleks, potensi risiko yang dihadapi bank masih dapat termitigasi dengan baik.
- i. Terdapat proses *mark to market* secara harian bagi instrumen yang aktif serta pengembangan model bagi instrumen yang kurang aktif dan tidak aktif di pasar dengan menggunakan *mark to model* terhadap transaksi trading bank untuk mengetahui kerugian/keuntungan bank dan bank pun memiliki metode dalam proses *mark to market*-nya termasuk perhitungan valuasi model internal serta prosedur *contingency plan* dalam proses *mark to market*-nya apabila terjadi kondisi di luar normal yang dilakukan oleh unit kerja terkait.

3. Rasio Likuiditas

Adapun upaya pengelolaan Risiko Likuiditas yang telah dilakukan bank **bjb** adalah sebagai berikut:

- a. Bank melakukan analisis terhadap seluruh sumber risiko likuiditas baik dari sisi internal maupun eksternal seperti produk dan aktivitas perbankan yang mempengaruhi sumber penggunaan dana secara komprehensif, kecukupan pendanaan melalui pasar, serta analisis risiko didukung dengan sistem informasi dan kecukupan data yang memadai.
- b. Bank telah memiliki *risk appetite*, *risk tolerance*, dan *risk limit* untuk parameter risiko pasar yang ditetapkan oleh Dewan Komisaris dan Direksi.
- c. Bank telah memiliki alat pengukuran yang dapat mengkuantifikasi dan mengidentifikasi risiko likuiditas secara tepat waktu dan komprehensif berdasarkan indikator internal dan eksternal dalam *early warning indicator* berupa pengukuran untuk mengukur risiko inheren mengenai komposisi pendanaan, rasio likuiditas, proyeksi arus kas, *liquidity gap*, *scenario analysis*, dan *stress testing*.
- d. Bank telah mengembangkan *Early Warning Indicator* risiko likuiditas yang merupakan indikator yang digunakan untuk memprediksi potensi krisis likuiditas di masa datang sebagai bentuk identifikasi, pengukuran, dan pemantauan risiko likuiditas secara harian yang bertujuan untuk memitigasi sejak dini apabila ada potensi krisis likuiditas di kemudian hari.
- e. Bank melakukan pemantauan limit secara harian seperti limit (AL+NAB)/NCD, Ekses Likuiditas, LDR, Pinjaman

semiannually (*market risk stress test*), to the Board of Directors and executive officials so that action is expected continue the improvement and mitigation processes to minimize future potential risks.

- g. The Bank has had the ALCO committee as an organizational device in support of effective market risk management.
- h. In the process of measuring, monitoring conducted by the Risk Management unit through reporting on the activity of Trisuri work units is still done manually and not yet been installed but consider the exposure of uncomplicated bank transactions, the potential risk faced by banks can still be mitigated properly.
- i. There is a daily mark to market process of bank trading transactions to determine the loss/ profit of banks and banks also have methods in its mark to market process including the calculation of internal model valuation and contingency plan procedures in its mark to market process in case of normal outside conditions carried out by the working unit.

3. Liquidity Risk

The Liquidity Risk management efforts that have been carried out by bank **bjb** are as follows:

- a. The Bank conducts analysis of all sources of liquidity risk both from internal and external side such as products and banking activities that affect the source of the comprehensive use of funds, adequacy of funding through the market, and others and risk analysis is supported by adequate information systems and adequacy of data.
- b. The Bank has had risk appetite, risk tolerance and risk limit for the market risk parameters established by the Board of Commissioners and Directors.
- c. The Bank has a measurement tool that can quantify and identify the liquidity risk in a timely and comprehensive manner based on internal and external indicators in the form of an early warning indicator measurement to measure the risk is inherently about funding composition, liquidity ratio, cash flow projection, liquidity gap, scenario analysis, and stress testing.
- d. Bank has developed an Early Warning Indicator liquidity risk which is an indicator used to predict potential future liquidity crisis as a form of identification, measurement, and monitoring of liquidity risk on a daily basis that aims to mitigate early when there is potential liquidity crisis in the future.
- e. The Bank monitors limits on a daily basis such as (AL+NAB)/NCD limits, Excess Liquidity, LDR, Overnight Loans, Excess

Overnight, Ekses Reserve GWM Primer, Ekses Reserve GWM Sekunder, *excess reserve* GWM Primer, PLM, LCR dan (AL+NAB)/NCD terhadap *threshold* yang telah ditetapkan oleh regulator termasuk tindak lanjut yang akan dilakukan oleh *risk taking unit* apabila terjadi pelampauan dan dilaporkan kepada Direksi.

- f. Bank telah memiliki prosedur dalam hal rencana pendanaan darurat ketika bank menghadapi kondisi krisis likuiditas (*Contingency Funding Plan/CFP*) serta bank telah melakukan skenario uji coba *CFP-Framework* apabila terjadi krisis likuiditas dikemudian hari.
- g. Bank telah melakukan perhitungan Basel III terkait risiko likuiditas yaitu perhitungan *Net Stable Funding Ratio* (NSFR) dan *Liquidity Coverage Ratio* (LCR).

4. Risiko Operasional

Adapun upaya pengelolaan risiko operasional yang telah dilakukan bank **bjb** adalah sebagai berikut:

- a. Bank melakukan proses pengukuran risiko operasional dilakukan secara berkala melalui perangkat pengukuran risiko operasional diantaranya *risk control self assessment*, *key risk indicator*, laporan data kerugian risiko operasional pada masing-masing unit kerja serta pengukuran profil risiko operasional *bankwide* yang dilakukan secara periodik. Adapun hasil analisa atas penilaian risiko operasional tersebut dilaporkan kepada pihak manajemen yang dilakukan secara berkala seperti pelaporan *monthly report*.
- b. *Risk taking unit* senantiasa melakukan *risk assessment* atas pengembangan Produk dan Aktivitas Baru dalam rangka melakukan penerapan manajemen risiko didalamnya.
- c. Bank berupaya untuk melakukan penyempurnaan *business process* terutama untuk aktivitas perkreditan. Hal tersebut terlihat dari penerapan model bisnis dengan melibatkan beberapa fungsi seperti *Relationship Manager*, *Relationship Officer* dan *Account Officer* dan telah diakomodir dalam Struktur Organisasi serta terdapat beberapa *review* atas prosedur kerja serta penggunaan sistem dalam rangka mendukung proses manajemen risiko yang handal.
- d. Bank senantiasa melakukan peningkatan kualitas SDM khususnya pada aktivitas bisnis utama bank yaitu perkreditan dengan memberikan pendidikan dan pelatihan kepada pegawai.
- e. Dalam menjaga kepentingan bank dan penegakan disiplin, Bank telah melaksanakan pedoman sanksi disiplin dengan cukup efektif termasuk dalam penerapan sistem sanksi kepegawaian.

5. Risiko Hukum

Bank melalui Divisi Hukum senantiasa melakukan penanganan atas kasus yang terjadi, baik yang dilakukan oleh bank secara langsung maupun menggunakan jasa konsultan hukum atas permintaan *risk taking unit*. Upaya yang dilakukan Perseroan dalam mengelola risiko hukum yaitu:

Primary Statutory Reserve Requirement, Excess Secondary Statutory Reserve Requirement, excess Primary Statutory Reserve Requirement, PLM, ETFR (Excess to Total Funding Ratio), LCR and (AL+NAB)/NCD against the threshold set by the regulator including the follow-up that will be carried out by the risk taking unit in the event of an excess and reported to the Board of Directors.

- f. The bank has had procedures in regards to emergency financing plans when the bank faces the liquidity crisis (contingency funding plan) as well as the bank has conducted a CFPframework test scenario in case of the later liquidity crisis.
- g. Bank has done the calculation of Basel III related to liquidity risk, namely the calculation of Net Stable Funding Ratio (NSFR) and Liquidity Coverage Ratio (LCR)..

4. Operational Risk

The Operational Risk management efforts that have been carried out by bank **bjb** are as follows:

- a. The Bank performed the process of measuring operational risk carried out periodically through operational risk measurement tools including risk control self-assessments, key risk indicators, operational risk loss data reports for each work unit as well as periodic bankwide operational risk profile measurements. The results of the analysis on the operational risk assessment were reported to management carried out periodically, such as a monthly report.
- b. The risk taking unit always carried out a risk assessment on the development of new products and activities in order to implement risk management in it.
- c. The Bank strived to make improvements to the business process, especially for lending activities. This could be seen from the application of a business model that involved several functions such as Relationship Managers, Relationship Officers and Account Officers and had been accommodated in the Organizational Structure and there were several reviews of work procedures and use of systems in order to support a reliable risk management process.
- d. The Bank continued to improve the quality of human resources, especially in the main business activity of the bank, namely credit by providing education and training to employees.
- e. In safeguarding the interests of the bank and enforcing discipline, the Bank implemented guidelines for disciplinary sanctions quite effectively including the imposition of a system of employment sanctions.

5. Legal Risk

The Bank, through the legal division work unit, always handles cases that occur, both those carried out by the Bank directly or using the services of a legal consultant at the request of the risk-taking unit. Efforts made by the Company in managing legal risk are:

- a. Divisi hukum melakukan pembinaan dalam bidang hukum secara berkala melalui proses pendampingan perkara hukum, *legal session* kepada *risk taking unit* dengan pembahasan permasalahan-permasalahan hukum yang dihadapi pada kantor cabang, serta melaksanakan *review* terhadap perjanjian-perjanjian kerjasama yang akan dilaksanakan guna melindungi kepentingan bank. Namun masih terdapat kelemahan terkait proses *review* perjanjian yang hanya berdasarkan atas permintaan dari *risk taking unit*.
 - b. Bank melakukan identifikasi dan pengendalian risiko hukum terhadap produk dan aktivitas baru melalui pengkajian terkait aspek hukum serta menyampaikan informasi dan pelaporan yang berkaitan dengan mitigasi risiko hukum kepada Direksi yang membidangi unit kerja hukum.
 - c. Terkait dengan pelaksanaan sistem informasi manajemen risiko hukum telah dilaksanakan dengan baik salah satunya adanya laporan secara berkala terkait dengan pemantauan dan pencatatan atas pelaksanaan pendampingan perkara hukum serta penanganan hukum, *update* perkara hukum yang ditangani oleh Divisi Hukum serta laporan setiap triwulan disajikan dalam bentuk profil risiko hukum.

1. Preparation and improvement of Integrated Risk Management Policy.
2. Improvements or enhancements to the Integrated Risk Management Policy, including refining the Risk strategy and framework based on the results of the evaluation implementation.

Risk Assessment

Based on the results of the bank's self-assessment of bank **bjb**'s overall risk rating every quarter in 2023 is Low to Moderate with a stable risk trend when compared to the previous year. This reflects that the possibility of loss from inherent risk is relatively low for a certain period of time in the future and related to the quality of the implementation of composite risk management in a bank that is adequate, even though there are minor weaknesses, these weaknesses have become the attention of the bank's management. Summary of risk profile during 2023 for 8 (eight) types of risks managed by the bank are as follows:

Tinjauan atas Efektivitas Sistem Manajemen Risiko

Sistem pengukuran risiko yang dipergunakan untuk mengukur eksposur risiko Bank sebagai pedoman untuk melakukan pengendalian dan dilakukan secara berkala. Sistem tersebut paling kurang harus dapat mengukur:

1. Sensitivitas produk/aktivitas terhadap perubahan faktor-faktor yang mempengaruhinya, bank dalam keadaan normal maupun tidak normal.
2. Kecenderungan perubahan faktor-faktor dimaksud berdasarkan fluktuasi yang terjadi dimasa lalu dan korelasinya.
3. Faktor risiko (*Risk Factor*) secara individual.
4. Eksposur risiko secara keseluruhan (*aggregate*) maupun per risiko, dengan mempertimbangkan keterkaitan antar risiko.
5. Seluruh risiko yang melekat pada seluruh transaksi serta produk perbankan, termasuk produk dan aktivitas baru, dan dapat diintegrasikan dalam sistem informasi manajemen Bank.

Metode pengukuran dapat dilakukan secara kuantitatif dan/atau kualitatif. Metode pengukuran tersebut dapat berupa metode yang ditetapkan oleh Bank Indonesia dan Otoritas Jasa Keuangan dalam rangka penilaian risiko dan perhitungan modal (baik berupa metode standar atau metode internal yang dikembangkan sendiri oleh Bank). Dalam rangka mengatasi kelemahan yang dapat timbul atas penggunaan model pengukuran risiko tertentu maka Bank harus melakukan validasi model tersebut. Sistem pengukuran risiko dievaluasi dan disempurnakan secara berkala atau sewaktu-waktu apabila diperlukan untuk memastikan kesesuaian asuransi, akurasi, kewajaran, dan integritas data, serta prosedur yang digunakan untuk mengukur risiko. Dalam melakukan evaluasi atas efektivitas sistem manajemen risiko Perseroan maka satuan kerja manajemen risiko melakukan program pemantauan sebagai berikut:

1. Perseroan memiliki sistem dan prosedur pemantauan antara lain mencakup pemantauan terhadap besarnya eksposur risiko, kepatuhan limit internal dan hasil *stress testing* maupun konsistensi dengan kebijakan dan prosedur yang ditetapkan.
2. Pemantauan dilakukan baik oleh unit pelaksana (*risk taking unit*) maupun oleh Satuan Kerja Manajemen Risiko Hasil pemantauan disajikan dalam laporan berkala yang disampaikan kepada manajemen dalam rangka mitigasi risiko dan tindakan yang diperlukan.
3. Perseroan menyiapkan suatu sistem *back up* dan prosedur yang efektif untuk mencegah terjadinya gangguan (*disruptions*) dalam proses pemantauan risiko, dan melakukan pengecekan serta penilaian kembali secara berkala terhadap sistem *back up* tersebut.

Berdasarkan evaluasi atas efektivitas yang telah dilakukan selama tahun 2023, menunjukkan bahwa sistem manajemen risiko pada bank **bjb** telah memadai.

Review of The Effectiveness of The Risk Management System

The risk measurement system used to measure the Bank's risk exposure serves as a guideline for conducting control and is carried out periodically. The system must at least be able to measure:

1. Product/activity sensitivity to changes in the factors that influence it, the bank is in normal or abnormal circumstances.
2. The trend of changes in these factors is based on fluctuations that occurred in the past and their correlations.
3. Risk factors individually.
4. Overall risk exposure (aggregate) as well as per risk, taking into account the interrelationships between risks.
5. All risks inherent in all banking transactions and products, including new products and activities, and can be integrated into the Bank's management information system.

Measurement methods can be carried out quantitatively and/ or qualitatively. The measurement method may be in the form of a method stipulated by Bank Indonesia and the Financial Services Authority for risk assessment and capital calculation (either in the form of a standard method or an internal method developed by the Bank). In order to overcome the weaknesses that may arise from the use of certain risk measurement models, the Bank must validate the model. The risk measurement system is evaluated and refined periodically or at any time if necessary to ensure the suitability of insurance, accuracy, fairness and data integrity, as well as the procedures used to measure risk. In evaluating the effectiveness of the Company's risk management system, the risk management work unit carries out the monitoring program as follows:

1. The Company has monitoring systems and procedures which include monitoring the magnitude of risk exposure, compliance with internal limits and the results of stress testing as well as consistency with established policies and procedures.
2. Monitoring is carried out both by the implementing unit (risk taking unit) and by the Risk Management Work Unit. Monitoring results are presented in periodic reports submitted to management in the context of risk mitigation and necessary actions.
3. The Company prepares an effective back-up system and procedures to prevent disruptions in the risk monitoring process, and periodically checks and reassesses the back-up system.

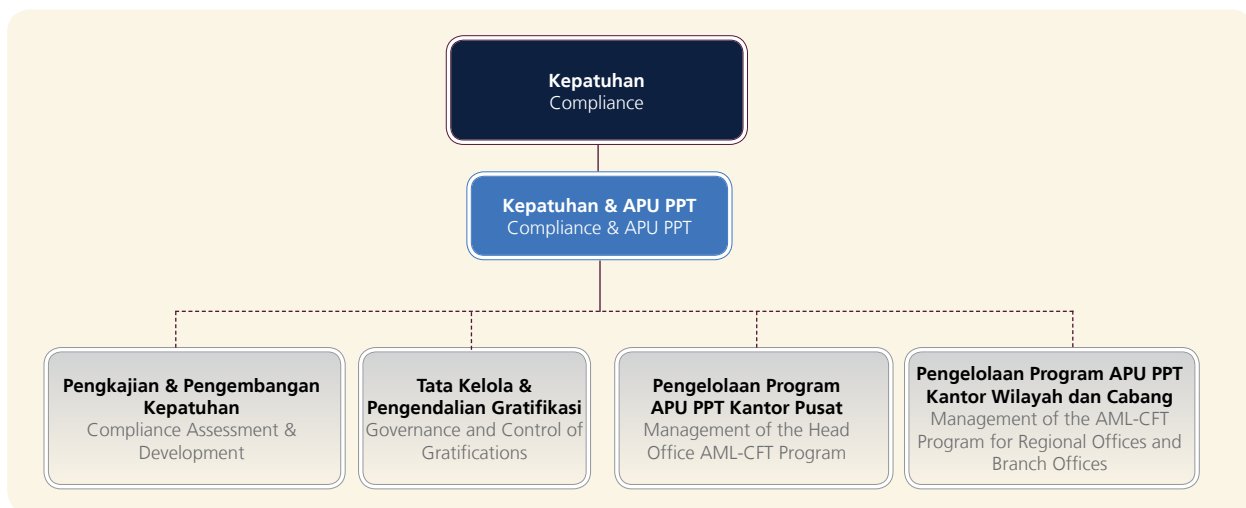

Based on the evaluation of the effectiveness that has been carried out during 2023, it shows that the risk management system at bank **bjb** was adequate.

Pernyataan Direksi dan/atau Dewan Komisaris atau Komite Audit atas Kecukupan Sistem Manajemen Risiko

Direksi dan Dewan Komisaris melalui Komite Pemantau Risiko menilai bahwa selama tahun 2023 kecukupan sistem manajemen risiko telah berjalan memadai yang tercermin hasil *review* atas kelengkapan dan keakuratan identifikasi, pengukuran, pemantauan, pengendalian dan pelaporan risiko, serta atas kecukupan skenario mitigasi yang diusulkan oleh unit kerja operasional telah memadai.

 - d. Satuan Kerja Audit Internal (SKAI)
4. Unit Kerja Penerap SMAP
5. Unit Kerja Pendukung

Anti-Corruption Program

Programs and Procedures in Overcoming Corruption, Kickbacks, Fraud, Bribery and/ or Gratitude Practices

Anti-Bribery Management System (SMAP)

One way to maintain the Bank's commitment to good governance was to implement the provisions of SNI ISO 37001:2016 AntiBribery Management System (SMAP). The implementation of these provisions was a form of bank **bjb**'s commitment to always be clean and with integrity, and free from bribery. The Bank already had SMAP Guidelines ratified through the Directors' Decree number 0500/SK/DIR-KAP/2022 dated September 13 2022 concerning Anti-Bribery Management System Guidelines (SMAP) and Directors' Decree number 0176/SK/DIR-KAP/2023 dated June 6 2023 concerning Changes to Anti-Bribery Management System Guidelines Bribery (SMAP).

Organization

1. Board of Commissioners
2. Directors
3. Anti-Bribery Compliance Function (FKAP TEAM), which consisted of:
 - a. Compliance & AML CFT Division
 - b. Risk Management Division
 - c. Legal Division
 - d. Internal Audit Unit (SKAI)
4. SMAP Implementing Work Unit
5. Supporting Unit

FAKTOR – FAKTOR YANG MEMPENGARUHI IMPLEMENTASI SMAP

Dalam proses pengendalian SMAP, Bank melakukan identifikasi faktor internal dan eksternal melalui proses pemetaan isu berdasarkan:

1. Ukuran, struktur dan pendelegasian pengambilan keputusan.
2. Lokasi dan sektor dimana Bank beroperasi atau melakukan antisipasi pengoperasian.
3. Sifat, skala dan kompleksitas dari aktivitas, operasi serta model bisnis.
4. Entitas dimana Bank mempunyai kendali.
5. Entitas yang menerapkan kendali terhadap Bank.
6. Sifat dan jangkauan interaksi dengan pejabat publik.
7. Peraturan perundang-undangan, regulasi, kontrak serta kewajiban dan tugas professional.

Bank menetapkan ruang lingkup penerapan SMAP berdasarkan analisis faktor internal dan eksternal, kebutuhan dan harapan pemangku kepentingan serta pertimbangan proses bisnis.

PENILAIAN RISIKO PENYUAPAN

Bank menetapkan metode penilaian risiko penyuapan yang meliputi:

1. Identifikasi risiko penyuapan dilakukan oleh unit kerja dengan supervisi dari pimpinan dari unit kerja masing-masing melalui *self assessment* secara berkala dan/atau pada saat terjadi perubahan terhadap struktur organisasi atau proses bisnis yang mempengaruhi tingkat risiko penyuapan.
2. Penilaian risiko dilakukan oleh unit kerja setiap 1 (satu) tahun sekali sehingga perubahan dan risiko baru dapat dinilai secara tepat.
3. Setiap unit kerja wajib melakukan *self assessment* penilaian risiko penyuapan secara jujur dan dapat mencerminkan kondisi yang riil.
4. Divisi Manajemen Risiko melakukan pemantauan risiko secara keseluruhan berdasarkan hasil pengisian risiko penyuapan masing-masing unit kerja melalui mapping risiko penyuapan Bank.
5. Pengendalian risiko dilakukan oleh masing-masing unit kerja sesuai dengan hasil penilaian risiko penyuapan.
6. Evaluasi efektivitas pelaksanaan pengendalian risiko dilakukan melalui Audit Internal SMAP serta rapat tinjauan Direksi dan Dewan Komisaris sebagai salah satu pembahasan efektivitas dalam mengendalikan risiko penyuapan.

Setiap Unit kerja Penerap dan Pendukung menyimpan bukti penilaian risiko untuk memastikan bahwa penilaian risiko penyuapan telah dilaksanakan dan digunakan untuk merancang atau meningkatkan SMAP di Bank. Penilaian secara *self assessment* risiko harus dilakukan minimal 1 (satu) kali dalam 1 (satu) tahun untuk memastikan keefektifan dari rencana pengendalian pada masing-masing risiko.

FACTORS AFFECTING THE IMPLEMENTATION OF SMAP

In the SMAP control process, Company identified internal and external factors through an issue mapping process based on:

1. Size, structure and delegation of decision making.
2. Locations and sectors where the Bank operated or anticipated operations.
3. The nature, scale and complexity of the activities, operations and business models.
4. Entities over which the Bank had control.
5. The entity exercising control over the Bank.
6. The nature and extent of interaction with public officials.
7. Laws and regulations, regulations, contracts and professional obligations and duties.

The Bank determines the scope of SMAP implementation based on an analysis of internal and external factors, stakeholder needs and expectations as well as business process considerations.

BRIBERY RISK ASSESSMENT

The Bank determines the bribery risk assessment method which includes:

1. Identification of bribery risk was carried out by work units with supervision from the leadership of each work unit through periodic self-assessments and/or when changes occurred to the organizational structure or business processes that affect the level of bribery risk.
2. Risk assessment was carried out by the work unit once every 1 (one) year so that changes and new risks could be assessed appropriately.
3. Each work unit was required to conduct a self-assessment of bribery risk assessment honestly and reflect real conditions.
4. The Risk Management Division monitored overall risk based on the results of filling in the bribery risk of each work unit through mapping the Bank's bribery risk.
5. Risk control was carried out by each work unit in accordance with the results of the bribery risk assessment.
6. Evaluation of the effectiveness of the implementation of risk control was carried out through the SMAP Internal Audit and review meetings of the Directors and the Board of Commissioners as one of the discussions on effectiveness in controlling bribery risk.

Each Implementing and Supporting Unit maintained evidence of risk assessment to ensure that the bribery risk assessment had been carried out and used to design or improve the SMAP in the Bank. Risk self-assessment assessment had to be carried out at least 1 (one) time in 1 (one) year to ensure the effectiveness of the control plan for each risk.

Kebijakan Gratifikasi

Dalam upaya melakukan pencegahan Korupsi, Kolusi dan Nepotisme (KKN), bank **bjb** telah membentuk program pengendalian gratifikasi yang sebagaimana tertuang dalam Surat Keputusan Direksi Nomor 0148/SK/DIR-KAP/2022 tanggal 31 Mei 2022 tentang Pedoman Pengendalian Gratifikasi yang memberikan arah serta acuan bagi segenap organisasi Bank di dalam menanggulangi praktik saling memberi (penerimaan, penolakan, maupun pemberian) di lingkungan perseroan sehingga pengelolaan gratifikasi pada Bank dapat sesuai dengan prinsip-prinsip tata kelola perusahaan yang baik. Dengan ditetapkannya pedoman ini, Bank diharapkan dapat mendorong terlaksananya etika bisnis yang tinggi serta mencegah timbulnya benturan kepentingan, kecurangan serta perilaku penyimpangan lain di lingkungan Bank.

bank **bjb** secara berkesinambungan melakukan *monitoring* dan evaluasi program pengendalian gratifikasi sebagai bentuk komitmen bank **bjb** dengan KPK dalam melaksanakan program pengendalian gratifikasi dan perseroan telah melaksanakan sosialisasi yang diselenggarakan dalam bentuk bimbingan teknis kepada seluruh pegawai dengan jabatan *Account Officer* dan *Frontliner* di bank **bjb**.

Program pengendalian gratifikasi adalah sekumpulan perangkat dan rangkaian kegiatan serta mekanisme pengendalian gratifikasi secara berkesinambungan guna menjaga integritas pegawai dari praktik gratifikasi yang dilarang. Rencana Strategis Bank

Arah Kebijakan Bank

Memasuki tahun terakhir dari fase II (*portfolio optimization*) di tahun 2023, bank **bjb** tetap akan melanjutkan inisiatif digitalisasi *tools* per segmen, akuisisi *funding ritel* dan optimalisasi kredit produktif. Peran dari *system intelligence (analytics)* terus dilakukan *enhancement* sehingga dapat memberikan dukungan dalam mendesain *customer profiling* dan *monitoring* melalui pemanfaatan *data analytic*.

The Bank's Strategic Plan

Bank Policy Directions

Entering the final year of phase II (*portfolio optimization*) in 2023, bank **bjb** will continue the initiative of digitizing tools per segment, acquiring retail funding and optimizing productive credit. The role of system intelligence (*analytics*) continues to be enhanced so that it can provide support in designing customer profiling and monitoring using analytical data.

Berdasarkan *roadmap* di tahun 2023, bank **bjb** memasuki fase II (*portfolio optimization*) akhir menuju fase III (*sustainable growth*). Fase *portfolio optimization* di tahun 2023 akan menjadi pondasi untuk fase berikutnya. Untuk itu, digitalisasi *tools* per segmen, akuisisi *funding ritel* dan optimalisasi kredit produktif akan dioptimalkan pada tahun 2023.

bank **bjb** memiliki potensi yang besar untuk menjadikan bisnis komersial dan UMKM sebagai pendorong pertumbuhan kredit produktif. Selain akselerasi pertumbuhan kredit produktif, salah satu target portofolio bank **bjb** adalah peningkatan *funding ritel* melalui peningkatan peran digitalisasi dalam layanan perbankan.

Strategi Jangka Pendek

Uraian strategi jangka pendek bank **bjb** adalah sebagai berikut.

1. Ekspansi Kredit Secara Selektif dengan Mengoptimalkan Ekosistem Bisnis

Strategi Jangka Menengah dan Jangka Panjang

Dalam mencapai target keuangan dan portofolio di tahun 2025 bank **bjb** dihadapkan beberapa *key challenges* yaitu pada segmen *lending* kredit bank **bjb** masih bertumpu pada kredit konsumen ASN dan belum optimalnya sinergi antar divisi dalam peningkatan kredit produktif, pada segmen *funding* komposisi *funding* bank **bjb** masih didominasi oleh nasabah institusi dan rendahnya penetrasi *digital* khususnya *mobile banking* bank **bjb**.

1. Kredit

Untuk mencapai target keuangan 2025 bank **bjb** perlu mengakselerasi pertumbuhan kredit produktif sebesar 25% dan optimalisasi pertumbuhan kredit konsumtif sebesar 6%. Hal ini dikarenakan *market* kredit konsumen (khususnya ASN) sudah menuju fase *mature* dan terbatas, sehingga bank **bjb** hanya perlu mengoptimalkan kredit konsumen, market kredit produktif masih memiliki potensi yang besar sehingga bank **bjb** perlu mengakselerasi pertumbuhan kredit produktif sebagai *main engine growth* demi mencapai target keuangan 2025.

2. Funding

Untuk mengoptimalkan *cost of fund* dan pemenuhan NSFR bank **bjb** harus memprioritaskan *funding* ritel dan CASA untuk pemenuhan target *funding*. Hal ini dikarenakan persentase CASA berpengaruh terhadap persentase *cost of fund* dan persentase *funding ritel* berpengaruh terhadap persentase NSFR.

Dalam mencapai target *positioning* sebagai elit bank, target keuangan, dan juga target portofolio yang telah dijabarkan sebelumnya, bank **bjb** akan menerapkan strategi korporasi yang diilustrasikan melalui *strategy house* bank **bjb** berikut ini.

Medium- and Long-Term Strategies

In achieving financial and portfolio targets in 2025, bank **bjb** is faced with several key challenges, namely in the lending segment, bank **bjb** credit still relies on ASN consumer credit and there is not yet optimal synergy between divisions in increasing productive credit, in the funding segment, bank **bjb**'s funding composition is still dominated by customers institutions and low digital penetration, especially bank **bjb** mobile banking.

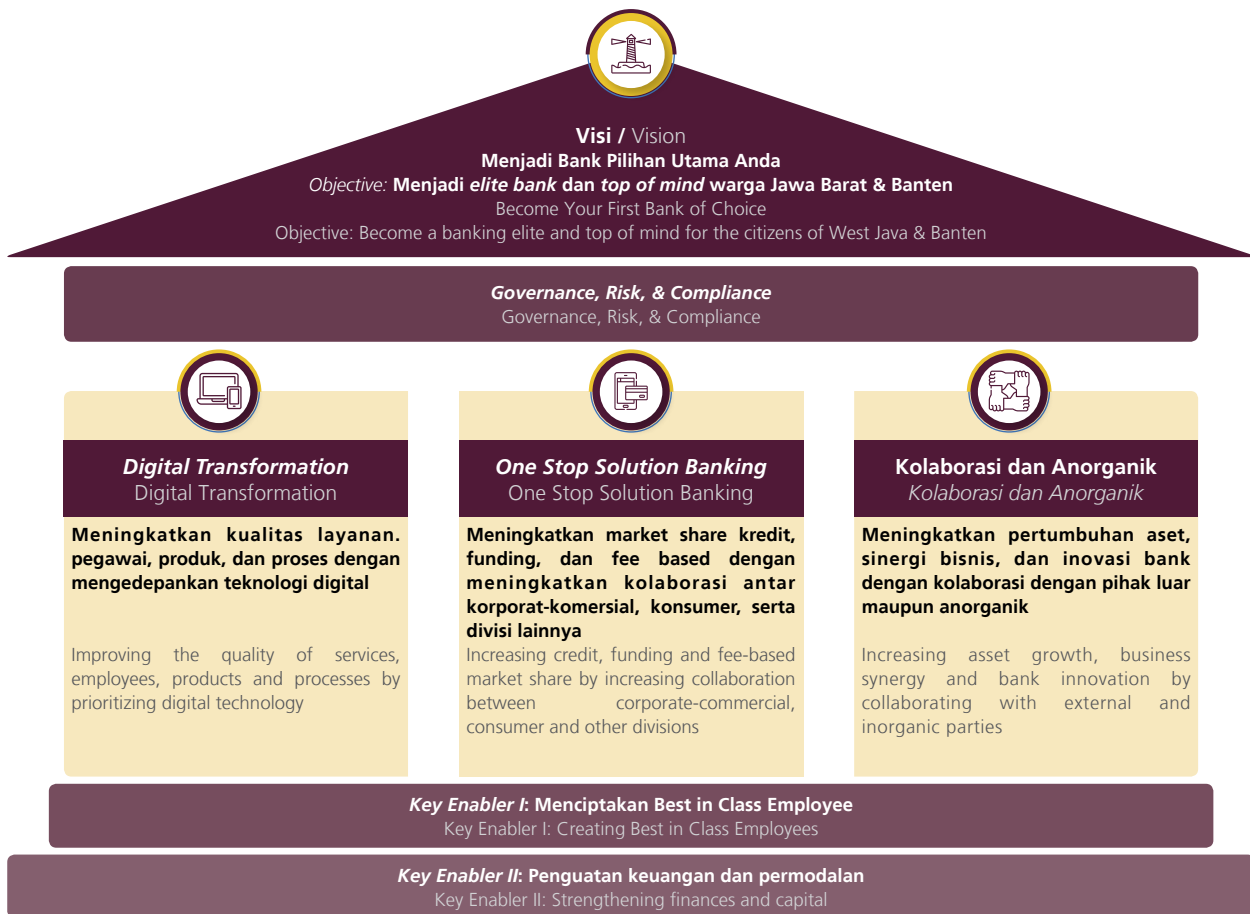

1. Credit

To achieve the 2025 financial target, bank **bjb** needs to accelerate productive credit growth by 25% and optimize consumer credit growth by 6%. This is because the consumer credit market (especially ASN) has entered a mature and limited phase, so bank **bjb** only needs to optimize consumer credit, the productive credit market still has great potential so bank **bjb** needs to accelerate productive credit growth as the main engine of growth to achieve financial targets 2025.

2. Funding

To optimize the cost of funds and fulfil the NSFR, bank **bjb** must prioritize retail funding and CASA to meet funding targets. This is because the CASA percentage influences the cost of funds percentage and the retail funding percentage influences the NSFR percentage.

In achieving the positioning target as an elite bank, financial targets, and portfolio targets that have been described previously, bank **bjb** will implement a corporate strategy which is illustrated through the following bank **bjb** house strategy.

Strategi korporasi bank **bjb** terdiri dari 3 (tiga) pilar strategi bisnis dan 2 (dua) fondasi strategi *enabler*. Masing - masing penjelasan terkait pilar strategi adalah sebagai berikut:

Pilar I – Digital Transformation

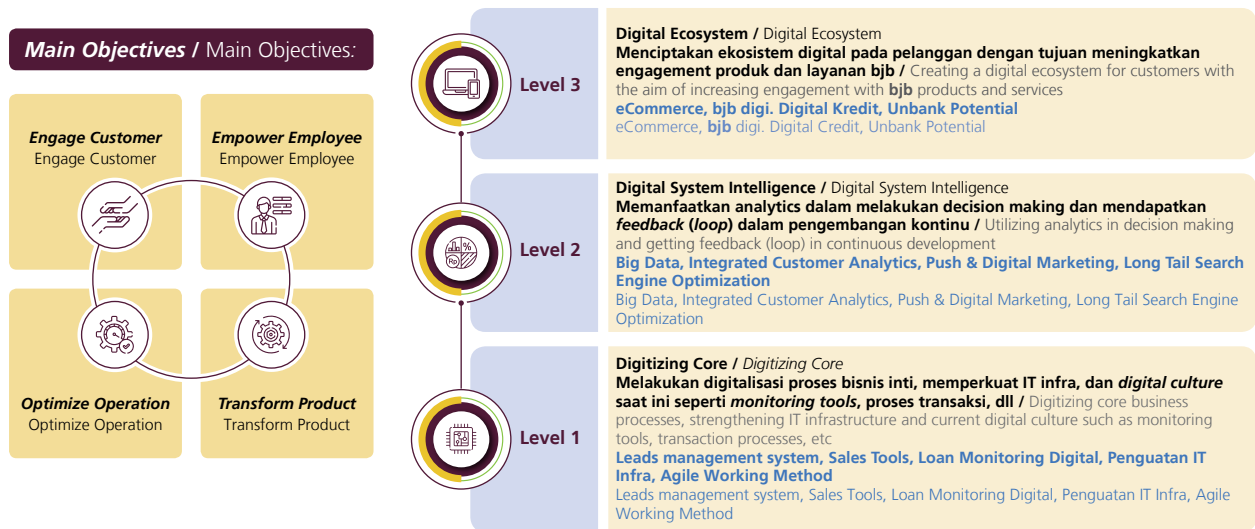

Pada pilar *digital transformation*, bank **bjb** memiliki empat tujuan utama yang ingin dicapai pada tahun 2025 yaitu: (i) meningkatkan engagement kepada nasabah; (ii) memperkuat kinerja pegawai; (iii) transformasi produk dan layanan digital; dan (iv) optimalisasi operasional. Dalam mencapai empat tujuan tersebut bank **bjb** perlu melakukan *digital transformation* yang terdiri dari tiga level transformasi, digitalisasi *core*, menciptakan *system intelligence* (*analytics*), dan menciptakan *digital ecosystem*. Ilustrasi terkait *digital transformation* dapat dilihat pada gambar di bawah ini.

Bank **bjb**'s corporate strategy consists of 3 (three) business strategy pillars and 2 (two) enabler strategy foundations. Each explanation regarding the strategy pillars is as follows:

Pillar I – Digital Transformation

In the digital transformation pillar, bank **bjb** has four main goals to be achieved by 2025, namely: (i) increasing engagement with customers; (ii) strengthening employee performance; (iii) digital product and service transformation; and (iv) operational optimization. In achieving these four goals, bank **bjb** needs to carry out digital transformation which consists of three levels of transformation, core digitalization, creating an intelligence system (*analytics*), and creating a digital ecosystem. An illustration related to digital transformation can be seen in the image below.

Gambar Level Digital Transformation bjb

Pilar II – One Stop Solution Banking

Pada pilar *one stop solution banking*, bank **bjb** perlu untuk meningkatkan potensi *cross selling* baik ke nasabah turunan melalui *value chain* maupun ke produk turunannya. Dalam menjalankan *one stop solution banking*, bank **bjb** perlu menerapkan 4 (empat) inisiatif:

1. Menjalankan System Account Planning

Account planning merupakan kegiatan rutin yang bertujuan untuk mengidentifikasi peluang potensi *cross selling* melalui *wallet size analysis* dan *value chain analysis*. Umumnya *account planning* terdiri dari empat kegiatan utama:

- Data collection*: Pengumpulan data *cross* divisi untuk memetakan overall relationship dan profitability nasabah.
- wallet sizing dan value chain analysis*: melakukan analisa peluang *cross selling* baik secara vertikal maupun horizontal.
- Penentuan target dan rencana aksi: melakukan penetapan target dan lintas divisi.
- Monitoring dan engagement*: melakukan implementasi rencana dan *monitoring*.

2. Membentuk Unit Kerja Account Solution

Dalam memastikan keberjalanan sistem *account planning*, diperlukan sebuah unit/divisi yang bertugas dalam mengakomodir dan mengkordinir kegiatan *account planning* yang bersifat lintas divisi. Unit *account solution* akan berperan dalam mengkordinir kegiatan *account planning* dan *supporting* dalam pengumpulan data, *wallet sizing*, *value chain analysis*, dan *monitoring* rencana aksi. Berdasarkan kondisi **bjb** saat ini, unit kerja *account solution* diusulkan didirikan dalam bentuk unit kerja yang berada pada Direktorat Komersial dan UMKM.

3. Menerapkan Model Sales Hunter – Farmer Melalui AO Senior dan AO Junior

Dengan berjalannya *system one stop solution*, diperlukan sebuah peran *sales* yang mampu menjaga *overall relationship* dalam memahami kebutuhan nasabah dan turunannya serta

Pillar II – One Stop Solution Banking

In the *one stop solution banking* pillar, bank **bjb** needs to increase the potential for *cross selling* both to derivative customers through the value chain and to derivative products. In implementing *one stop solution banking*, bank **bjb** needs to implement 4 (four) initiatives:

1. Executing System Account Planning

Account planning is a routine activity that aims to identify potential *cross selling* opportunities through *wallet size analysis* and *value chain analysis*. Generally, *account planning* consists of four main activities:

- Data collection*: Collecting *cross*-division data to map overall customer relationships and profitability.
- Wallet sizing and value chain analysis*: analyzing *cross selling* opportunities both vertically and horizontally.
- Determining targets and action plans: carrying out target setting and *cross*-divisional work.
- Monitoring and engagement*: implementing plans and *monitoring*.

2. Establishing an Account Solution Work Unit

To ensure the operation of the *account planning* system, a unit/division is needed to take a responsibility for accommodating and coordinating *cross*-divisional *account planning* activities. The *account solution* unit will play role in coordinating *account planning* and *supporting* activities in data collection, *wallet sizing*, *value chain analysis*, and *monitoring* action plans. Based on the current conditions of bank **bjb**, the *account solution* work unit is proposed to be established in the form of a work unit under the Commercial and MSME Directorate.

3. Implementing the Hunter – Farmer Sales Model through AO Senior and AO Junior

With the running of *one stop solution* system, a *sales* role is required to be able to maintain the *overall relationship* in understanding customer needs and their derivatives and

mampu menawarkan produk atau layanan melalui *cross selling*. Munculnya kebutuhan tersebut mendorong perlunya penerapan model *sales hunter – farmer*. Dimana peran *farmer* akan dimiliki oleh *Junior AO* yang nantinya akan didukung langsung oleh unit *account solution* dalam memberikan gambaran mengenai kebutuhan dan *overall relationship* maupun *profitability* seorang nasabah

4. Penyesuaian *Shared KPI Product Holding*

Salah satu faktor kunci keberhasilan menjadi *one stop solution banking* adalah dengan terlibat aktifnya semua peran baik dari *top management level* hingga *working level* dan baik dari direktorat bisnis maupun *supporting*. Oleh karena itu dalam menuju satu tujuan bersama, *sharing KPI product holding* merupakan *key enabler* keberhasilan *one stop solution banking bjb*.

Pilar III – Kolaborasi dan Anorganik

Dalam menunjang target pertumbuhan aset dan bisnis, bank **bjb** perlu melakukan kolaborasi dengan pihak ketiga serta akuisisi anak usaha.

1. Kolaborasi

Terdapat beberapa peluang kolaborasi yang dapat meningkatkan sinergi bisnis bank **bjb** seperti kolaborasi dengan perusahaan *fintech* dalam rangka perluasan kanal, BPR, dan *asset management company* serta *debt collection agency* dalam rangka penyelesaian kredit hapus buku.

2. Akuisisi Anak Usaha

Berdasarkan kondisi saat ini dan kebutuhan bisnis bank **bjb**, akuisisi anak usaha modal ventura *digital* dan pialang asuransi merupakan opsi strategi anorganik yang sesuai bank **bjb** dalam mencapai target keuangan maupun bisnis di tahun 2025.

Fondasi I – Menciptakan *Best in Class Employee*

Terdapat empat pilar penguatan *human capital* yang bank **bjb** perlu lakukan yaitu: (i) *Capacity fulfillment strategy*; (ii) *capability development*; (iii) *performance management*; dan (iv) struktur organisasi.

able to offer products or services through cross selling. The emergence of this need encourages the implementation of the hunter - farmer sales model in which the role of farmer will be run by Junior AO. Then, the Junior AO will later be supported directly by the account solution unit in providing an overview of the needs and overall relationship and profitability of a customer.

4. Adjustment of *Shared KPI Product Holding*

One of the key success factors in becoming a one stop banking solution is the active involvement of all roles, from top management level to working level and from both business and supporting directorates. Therefore, in achieving one common goal, sharing product holding KPIs is a key enabler for the success of **bjb's** one stop banking solution.

Pillar III – Collaboration and Inorganic

To support the growth of asset and business targets, bank **bjb** needs to collaborate with third parties and acquires subsidiaries.

1. Collaboration

There are several collaboration opportunities that can increase bank **bjb's** business synergy, such as collaboration with *fintech* companies for channel expansion, BPR, and asset management companies as well as debt collection agencies for settling write-off credits.

2. Acquisition of Subsidiaries

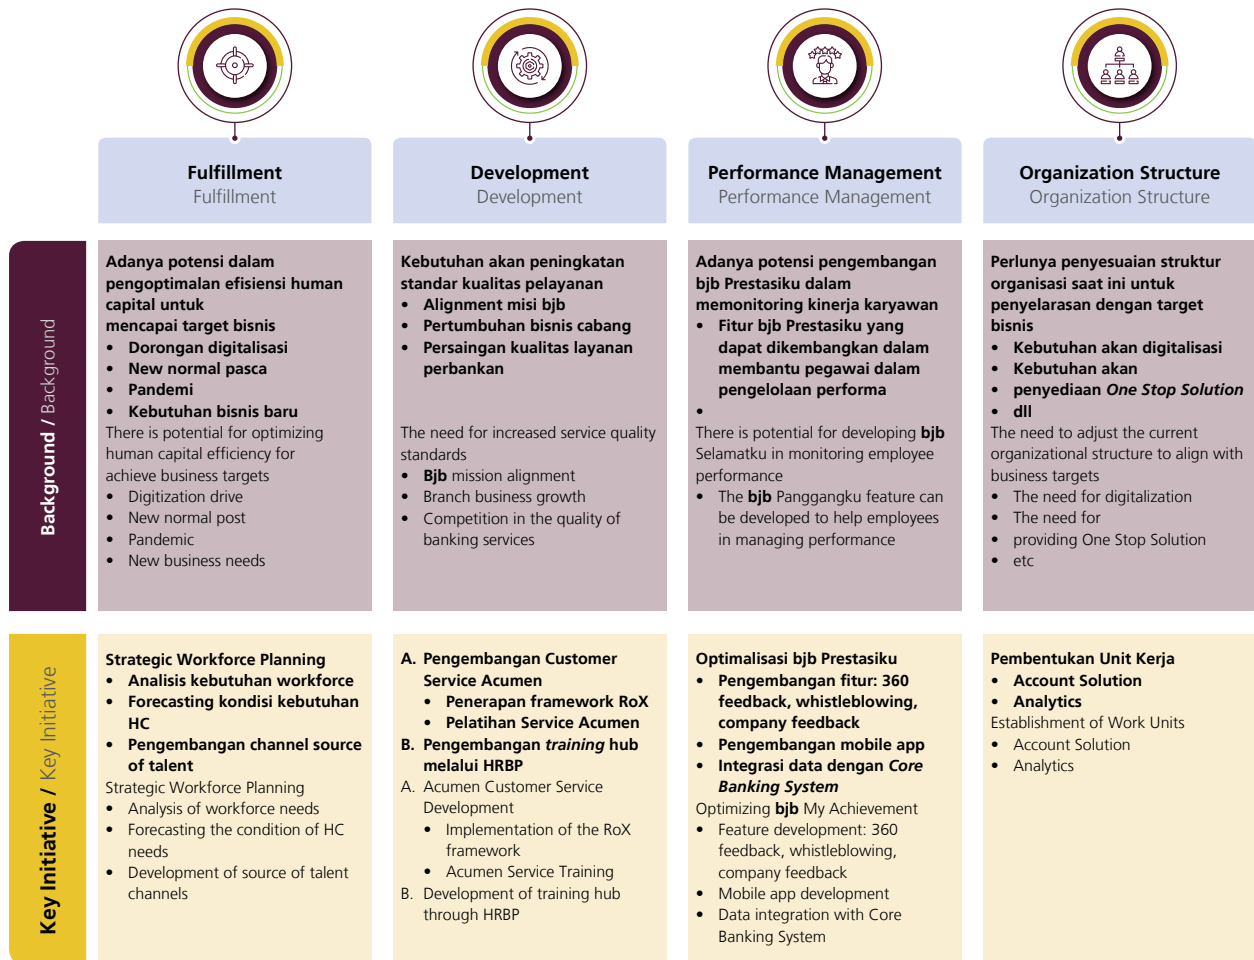

Based on current conditions and bank **bjb's** business needs, the acquisition of digital venture capital subsidiaries and insurance brokers is an inorganic strategy option that is suitable for bank **bjb** in achieving its financial and business targets in 2025.

Foundation I – Creating *Best in Class Employee*

There are four pillars of strengthening human capital that bank **bjb** needs to do, namely: (i) *Capacity fulfillment strategy*; (ii) *capability development*; (iii) *performance management*; and (iv) organizational structure.

A Figure of the Foundation of the bjb Human Capital Strategy

Fondasi II – Penguatan Keuangan dan Permodalan

Dalam mendukung target pertumbuhan aset bank **bjb** di tahun 2025 dan pemenuhan kebutuhan rasio keuangan yang sehat, **bjb** perlu melakukan strategi permodalan yang terdiri dari beberapa opsi: (i) *right issue* dan (ii) *sub-debt* (obligasi subordinasi).

Perselisihan Internal

Selama tahun 2023 tidak terdapat perselisihan internal antar pegawai.

Penyediaan Dana Besar dan Penyediaan Dana Kepada Pihak Terkait

Penyediaan dana menjadi salah satu kegiatan usaha utama yang dilaksanakan oleh Perseroan untuk menghindari kegagalan usaha Bank sebagai akibat konsentrasi penyediaan dana dan meningkatkan independensi Direksi dan Dewan Komisaris

Foundation II – Strengthening Finance and Capital

In supporting bank **bjb**'s asset growth target in 2025 and meeting the need for healthy financial ratios, **bjb** needs to carry out a capital strategy consisting of several options: (i) rights issue and (ii) sub-debt (subordinated bonds).

Internal Disputes

During 2023 there will be no internal disputes between employees.

Provision of Large Funds and Provision of Funds to Related Parties

Provision of funds is one of the main business activities carried out by the Bank to avoid the failure of the Bank's business as a result of the concentration of the provision of funds and increase the independence of the Directors and the Board of Commissioners of

terhadap potensi intervensi dari pihak terkait, Bank menerapkan prinsip kehati-hatian dan manajemen risiko dalam memberikan penyediaan dana, khususnya penyediaan dana kepada pihak terkait dan/atau penyediaan dana besar (*large exposures*) berpedoman pada ketentuan yang mengatur mengenai batas maksimum pemberian kredit bank umum.

Direksi menetapkan kebijakan penyediaan dana, khususnya penyediaan dana besar untuk melakukan pengendalian serta pemantauan risiko di dalam proses penyediaan dana kepada pihak ketiga sehingga risiko yang timbul atas kegiatan penyediaan dana tersebut tidak akan memberikan dampak secara signifikan terhadap Perseroan.

potential interventions from related parties. The Bank applies the principle of prudence and risk management in providing funds, particularly the provision of funds to related parties and/or the provision of large exposures based on the provisions governing the maximum lending limit for commercial banks.

The Directors sets the policy for providing funds, especially the provision of large funds to control and monitor risks in the process of providing funds to third parties so that the risks arising from the provision of these funds will not have a significant impact on the Company.

	<p>Recommendation 5: The Public Company disclosed the Public Company's communication policies with shareholders or investors on the Website.</p> <p>Explanation: Disclosure of communication policies was a form of transparency on the commitment of the Public Company in providing equality to all shareholders or investors in the implementation of communications. Disclosure of information also aimed to increase the participation and role of shareholders or investors in the implementation of the Public Company communication program.</p>	<p>Comply The Company has a communication policy in the context of transparency and providing equality to Shareholders or Investors which can be accessed on the company's official website www.bankbjb.co.id</p>
B.	ASPEK 2: FUNGSI DAN PERAN DEWAN KOMISARIS ASPECT 2: FUNCTION AND ROLE OF THE BOARD OF COMMISSIONERS	
B.1.	Prinsip 3: Memperkuat Keanggotaan dan Komposisi Dewan Komisaris. Principle 3: Strengthening the Membership and Composition of the Board of Commissioners.	
B.1.1.	<p>Rekomendasi 6: Penentuan jumlah anggota Dewan Komisaris mempertimbangkan kondisi Perusahaan Terbuka.</p> <p>Penjelasan: Jumlah anggota Dewan Komisaris dapat mempengaruhi efektivitas pelaksanaan tugas dari Dewan Komisaris. Penentuan jumlah anggota Dewan Komisaris Perusahaan Terbuka wajib mengacu kepada ketentuan peraturan perundang-undangan yang berlaku, yang paling kurang terdiri dari 2 orang berdasarkan ketentuan Peraturan Otoritas Jasa Keuangan Nomor 33/POJK.04/2014 tentang Direksi dan Dewan Komisaris Emiten atau Perusahaan Publik. Selain itu, perlu juga mempertimbangkan kondisi Perusahaan Terbuka yang antara lain yang meliputi karakteristik, kapasitas, dan ukuran, serta pencapaian tujuan dan pemenuhan kebutuhan bisnis yang berbeda diantara Perusahaan Terbuka. Namun demikian, jumlah anggota Dewan Komisaris yang terlalu besar berpotensi dapat mengganggu efektivitas pelaksanaan fungsi Dewan Komisaris.</p> <p>Recommendation 6: The determination of the number of members of the Board of Commissioners considered the conditions of the Public Company.</p> <p>Explanation: The number of members of the Board of Commissioners could affect the effectiveness of the implementation of the duties of the Board of Commissioners. Determination of the number of members of the Board of Commissioners of a Public Company had to refer to the provisions of the applicable laws and regulations, which consists of at least 2 people based on the provisions of the Financial Services Authority Regulation Number 33/ POJK.04/2014 concerning the Directors and Board of Commissioners of Issuers or Public Companies. In addition, it was also necessary to consider the condition of the Public Company which includes the characteristics, capacity, and size, as well as the achievement of goals and fulfillment of different business needs among Public Companies. However, the number of members of the Board of Commissioners that was too large has the potential to interfere with the effectiveness of the implementation of the functions of the Board of Commissioners.</p>	<p>Comply Penentuan jumlah Dewan Komisaris serta pemilihan anggota Dewan Komisaris telah mempertimbangkan kondisi Perseroan.</p> <p>Comply The determination of number of the Board of Commissioners and the selection of members of the Board of Commissioners has taken into account the condition of the Company.</p>
B.1.2.	<p>Rekomendasi 7: Penentuan komposisi anggota Dewan Komisaris memperhatikan keberagaman keahlian, pengetahuan, dan pengalaman yang dibutuhkan.</p> <p>Penjelasan: Komposisi Dewan Komisaris merupakan kombinasi karakteristik baik dari segi organ Dewan Komisaris maupun anggota Dewan Komisaris secara individu, sesuai dengan kebutuhan Perusahaan Terbuka. Karakteristik tersebut dapat tercermin dalam penentuan keahlian, pengetahuan, dan pengalaman yang dibutuhkan dalam pelaksanaan tugas pengawasan dan pemberian nasihat oleh Dewan Komisaris Perusahaan Terbuka. Komposisi yang telah memperhatikan kebutuhan Perusahaan Terbuka merupakan suatu hal yang positif, khususnya terkait pengambilan keputusan dalam rangka pelaksanaan fungsi pengawasan yang dilakukan dengan mempertimbangkan berbagai aspek yang lebih luas.</p>	<p>Comply Komposisi anggota Dewan Komisaris telah memperhatikan keberagaman keahlian, pengetahuan dan pengalaman yang dibutuhkan oleh Perseroan.</p>

	<p>Recommendation 7: The determination of the composition of the members of the Board of Commissioners considered the diversity of expertise, knowledge, and experience required.</p> <p>Explanation: The composition of the Board of Commissioners was a combination of characteristics, both in terms of the organs of the Board of Commissioners and individual members of the Board of Commissioners, in accordance with the needs of the Public Company. These characteristics could be reflected in the determination of the expertise, knowledge, and experience required in carrying out the supervisory duties and providing advice by the Board of Commissioners of a Public Company. The composition that has considered the needs of the Public Company was a positive thing, especially regarding decision making in the context of implementing the supervisory function carried out by considering various broader aspects.</p>	<p>Comply The composition of members of the Board of Commissioners has taken into account the diversity of expertise, knowledge, and experience required by the Company.</p>
B.2.	Prinsip 4: Meningkatkan Kualitas Pelaksanaan Tugas dan Tanggung Jawab Dewan Komisaris. Principle 4: Improving the Quality of Implementation of the Duties and Responsibilities of the Board of Commissioners.	
B.2.1.	<p>Rekomendasi 8: Dewan Komisaris mempunyai kebijakan penilaian sendiri (self assessment) untuk menilai kinerja Dewan Komisaris.</p> <p>Penjelasan: Kebijakan penilaian sendiri (self assessment) Dewan Komisaris merupakan suatu pedoman yang digunakan sebagai bentuk akuntabilitas atas penilaian kinerja Dewan Komisaris secara kolegal. Self assessment atau penilaian sendiri dimaksud dilakukan oleh masing-masing anggota untuk menilai pelaksanaan kinerja Dewan Komisaris secara kolegal, dan bukan menilai kinerja individual masing-masing anggota Dewan Komisaris. Dengan adanya self assessment ini diharapkan masing-masing anggota Dewan Komisaris dapat berkontribusi untuk memperbaiki kinerja Dewan Komisaris secara berkesinambungan.</p> <p>Dalam kebijakan tersebut dapat mencakup kegiatan penilaian yang dilakukan beserta maksud dan tujuannya, waktu pelaksanaannya secara berkala, dan tolok ukur atau kriteria penilaian yang digunakan sesuai dengan dengan rekomendasi yang diberikan oleh fungsi nominasi dan remunerasi Perusahaan Terbuka, dimana adanya fungsi tersebut telah diwajibkan dalam Peraturan Otoritas Jasa Keuangan Nomor 34/POJK.04/2014 tentang Komite Nominasi dan Remunerasi Emiten atau Perusahaan Publik.</p> <p>Recommendation 8: The Board of Commissioners had a self-assessment policy to assess the performance of the Board of Commissioners.</p> <p>Explanation: The Board of Commissioners' self-assessment policy was a guideline used as a form of accountability for collegially assessing the performance of the Board of Commissioners. The self-assessment was meant to be carried out by each member to assess the performance of the Board of Commissioners in a collegial manner, and not to assess the individual performance of each member of the Board of Commissioners. With this self-assessment, it was hoped that each member of the Board of Commissioners could contribute to improving the performance of the Board of Commissioners on an ongoing basis.</p> <p>The policy might include assessment activities carried out along with their aims and objectives, periodic implementation times, and benchmarks or assessment criteria used in accordance with the recommendations given by the nomination and remuneration function of a Public Company, where the existence of this function had been required in the Authority Regulation. Financial Services Number 34/POJK.04/2014 concerning the Nomination and Remuneration Committee for Issuers or Public Companies.</p>	<p>Comply Dewan Komisaris telah mempunyai kebijakan penilaian sendiri (self assessment) untuk menilai kinerja Dewan Komisaris melalui Komite Nominasi dan Remunerasi yang telah disahkan melalui Surat Keputusan Dewan Komisaris Nomor 03/SK/DKO/2022 tanggal 4 Januari 2022 tentang Pedoman dan Tata Tertib Kerja Komite Nominasi dan Remunerasi PT Bank Pembangunan Daerah Jawa Barat dan Banten Tbk.</p> <p>Comply The Board of Commissioners has a self-assessment policy to assess the performance of the Board of Commissioners through the Nomination and Remuneration Committee, which has been ratified by the Decree of the Board of Commissioners Number SK/DKO/2022 dated January 4, 2022 concerning Guidelines and Work Rules of the Nomination and Remuneration Committee of PT Bank Pembangunan Daerah Jawa Barat dan Banten Tbk.</p>

B.2.2.	<p>Rekomendasi 9: Kebijakan penilaian sendiri (<i>self assessment</i>) untuk menilai kinerja Dewan Komisaris, diungkapkan melalui Laporan Tahunan Perusahaan Terbuka.</p> <p>Penjelasan: Pengungkapan kebijakan self assessment atas kinerja Dewan Komisaris dilakukan tidak hanya untuk memenuhi aspek transparansi sebagai bentuk pertanggungjawaban atas pelaksanaan tugasnya, namun juga untuk memberikan keyakinan khususnya kepada para pemegang saham atau investor atas upaya-upaya yang perlu dilakukan dalam meningkatkan kinerja Dewan Komisaris. Dengan adanya pengungkapan tersebut pemegang saham atau investor mengetahui mekanisme check and balance terhadap kinerja Dewan Komisaris.</p> <p>Recommendation 9: The self-assessment policy to assess the performance of the Board of Commissioners is disclosed through the Public Company Annual Report.</p> <p>Explanation: Disclosure of the self-assessment policy on the performance of the Board of Commissioners is carried out not only to fulfill the transparency aspect as a form of accountability for the implementation of its duties, but also to provide confidence, especially to shareholders or investors, on the efforts that need to be made to improve the performance of the Board of Commissioners. With this disclosure, shareholders or investors know the mechanism of checks and balances on the performance of the Board of Commissioners.</p>	<p>Comply Hasil penilaian sendiri (<i>self assessment</i>) Dewan Komisaris telah diungkapkan Perseroan melalui Laporan Tahunan Perusahaan Terbuka.</p> <p>Comply The Company has disclosed the results of the Board of Commissioners' self-assessment through the Public Company Annual Report.</p>
B.2.3.	<p>Rekomendasi 10: Dewan Komisaris mempunyai kebijakan terkait pengunduran diri anggota Dewan Komisaris apabila terlibat dalam kejahatan keuangan.</p> <p>Penjelasan: Kebijakan pengunduran diri anggota Dewan Komisaris yang terlibat dalam kejahatan keuangan merupakan kebijakan yang dapat meningkatkan kepercayaan para pemangku kepentingan terhadap Perusahaan Terbuka, sehingga integritas perusahaan akan tetap terjaga. Kebijakan ini diperlukan untuk membantu kelancaran proses hukum dan agar proses hukum tersebut tidak mengganggu jalannya kegiatan usaha. Selain itu, dari sisi moralitas, kebijakan ini membangun budaya beretika di lingkungan Perusahaan Terbuka. Kebijakan tersebut dapat tercakup dalam Pedoman ataupun Kode Etik yang berlaku bagi Dewan Komisaris.</p> <p>Selanjutnya, yang dimaksud dengan terlibat dalam kejahatan keuangan merupakan adanya status terpidana terhadap anggota Dewan Komisaris dari pihak yang berwenang. Kejahatan keuangan dimaksud seperti manipulasi dan berbagai bentuk penggelapan dalam kegiatan jasa keuangan serta Tindakan Pidana Pencucian Uang sebagaimana dimaksud dalam Undang-Undang Nomor 8 Tahun 2010 tentang Pencegahan dan Pemberantasan Tindak Pidana Pencucian Uang.</p> <p>Recommendation 10: The Board of Commissioners has a policy regarding the resignation of members of the Board of Commissioners if they are involved in financial crimes.</p> <p>Explanation: The policy of resigning members of the Board of Commissioners who are involved in financial crimes is a policy that can increase the confidence of stakeholders in a Public Company, so that the integrity of the company will be maintained. This policy is needed to help smooth the legal process and so that the legal process does not interfere with the running of business activities. In addition, from a morality point of view, this policy builds an ethical culture within the Public Company. These policies can be included in the Guidelines or Code of Ethics applicable to the Board of Commissioners.</p> <p>Furthermore, what is meant by being involved in a financial crime is the convict status of a member of the Board of Commissioners from the authorized party. The financial crimes referred to are manipulation and various forms of embezzlement in financial service activities as well as the Criminal Action of Money Laundering as referred to in Law Number 8 of 2010 concerning Prevention and Eradication of the Crime of Money Laundering.</p>	<p>Comply Kebijakan pengunduran diri Dewan Komisaris telah diatur pada Anggaran Dasar Perseroan.</p> <p>Comply The policy for the resignation of the Board of Commissioners has been regulated in the Company's Articles of Association.</p>

C.1.2.	<p>Rekomendasi 13: Penentuan komposisi anggota Direksi memperhatikan, keberagaman keahlian, pengetahuan, dan pengalaman yang dibutuhkan.</p> <p>Penjelasan: Seperti halnya Dewan Komisaris, keberagaman komposisi anggota Direksi merupakan kombinasi karakteristik yang diinginkan baik dari segi organ Direksi maupun anggota Direksi secara individu, sesuai dengan kebutuhan Perusahaan Terbuka. Kombinasi tersebut ditentukan dengan cara memperhatikan keahlian, pengetahuan dan pengalaman yang sesuai pada pembagian tugas dan fungsi jabatan Direksi dalam mencapai tujuan Perusahaan Terbuka. Dengan demikian, pertimbangan kombinasi karakteristik dimaksud akan berdampak dalam ketepatan proses pencalonan dan penunjukan individual anggota Direksi ataupun Direksi secara kolegial.</p> <p>Recommendation 13: The determination of the composition of the members of the Directors takes into account the diversity of expertise, knowledge, and experience required.</p> <p>Explanation: Like the Board of Commissioners, the diversity of the composition of the members of the Directors is a combination of desirable characteristics both in terms of organs of the Directors and individual members of the Directors, in accordance with the needs of a Public Company. The combination is determined by taking into account the appropriate expertise, knowledge and experience in the division of duties and functions of the Directors in achieving the objectives of the Public Company. Thus, the consideration of the combination of these characteristics will have an impact on the accuracy of the nomination process and the appointment of individual members of the Directors or the Directors collegially.</p>	<p>Comply Penentuan komposisi anggota Direksi telah memperhatikan, keberagaman keahlian, pengetahuan dan pengalaman yang dibutuhkan oleh Perseroan.</p> <p>Comply The determination of the composition of the members of the Directors has taken into account the diversity of expertise, knowledge, and experience required by the Company</p>
C.1.3.	<p>Rekomendasi 14: Anggota Direksi yang membawahi bidang akuntansi atau keuangan memiliki keahlian dan/atau pengetahuan di bidang akuntansi.</p> <p>Penjelasan: Laporan Keuangan merupakan laporan pertanggungjawaban manajemen atas pengelolaan sumber daya yang dimiliki oleh Perusahaan Terbuka, yang wajib disusun dan disajikan sesuai dengan Standar Akuntansi Keuangan yang berlaku umum di Indonesia dan juga peraturan OJK terkait, antara lain peraturan perundang-undangan di sektor Pasar Modal yang mengatur mengenai penyajian dan pengungkapan Laporan Keuangan Perusahaan Terbuka. Berdasarkan peraturan perundang-undangan di sektor Pasar Modal yang mengatur mengenai tanggung jawab Direksi atas Laporan Keuangan, Direksi secara tanggung renteng bertanggung jawab atas Laporan Keuangan, yang ditandatangani Direktur Utama dan anggota Direksi yang membawahi bidang akuntansi atau keuangan.</p> <p>Dengan demikian, pengungkapan dan penyusunan informasi keuangan yang disajikan dalam laporan keuangan akan sangat tergantung pada keahlian, dan/atau pengetahuan Direksi, khususnya anggota Direksi yang membawahi bidang akuntansi atau keuangan. Adanya kualifikasi keahlian dan/atau pengetahuan di bidang akuntansi yang setidaknya dimiliki anggota Direksi dimaksud dapat memberikan keyakinan atas penyusunan Laporan Keuangan, sehingga Laporan Keuangan tersebut dapat diandalkan oleh para pemangku kepentingan (stakeholders) sebagai dasar pengambilan keputusan ekonomi terkait Perusahaan Terbuka dimaksud. Keahlian dan/atau pengetahuan tersebut dapat dibuktikan dengan latar belakang pendidikan, sertifikasi pelatihan, dan/atau pengalaman kerja terkait.</p>	<p>Comply Anggota Direksi yang membawahi bidang akuntansi atau keuangan telah memiliki keahlian dan/atau pengetahuan di bidang akuntansi.</p>

Penilaian Tata Kelola Perusahaan yang Baik

Good Corporate Governance Assessment

Dalam rangka evaluasi penerapan GCG, Perseroan melaksanakan GCG *Assessment* yang dilaksanakan secara periodik dan konsisten setiap tahun yang terdiri dari *Self Assessment* sesuai ketentuan OJK. Berdasarkan Peraturan Otoritas Jasa Keuangan No. 55/POJK.03/2016 tentang Penerapan Tata Kelola Bagi Bank Umum, Surat Edaran OJK No. 13/SEOJK.03/2017 tentang Penerapan Tata Kelola Bagi Bank Umum, Peraturan Otoritas Jasa Keuangan No. 21/POJK.04/2015 tentang Penerapan Pedoman Tata Kelola Perusahaan Terbuka, Surat Edaran Otoritas Jasa Keuangan No. 32/SEOJK.04/2015 tentang Pedoman Tata Kelola Perusahaan Terbuka serta POJK No. 4/POJK.03/2016 tentang Penilaian Tingkat Kesehatan Bank Umum, Peraturan Otoritas Jasa Keuangan tentang penilaian Tingkat Kesehatan Bank, salah satu poin penilaian tingkat kesehatan Bank adalah penilaian sendiri (*self assessment*) atas pelaksanaan prinsip-prinsip Tata Kelola Perusahaan yang Baik (GCG) pada Bank.

Self Assessment

Kriteria Penilaian

Pelaksanaan *Self Assessment* tersebut dilakukan secara periodik setiap semester yaitu pada bulan Juni dan Desember pada tahun berjalan. Penilaian sendiri ini dimaksudkan untuk memetakan kekuatan (*strength*) dan Kelemahan pelaksanaan GCG di bank **bjb** yang ditinjau dari tiga aspek yaitu:

1. *Governance Structure*
Penilaian *governance structure* bertujuan untuk menilai kecukupan struktur dan infrastruktur tata kelola Perseroan agar proses pelaksanaan prinsip GCG menghasilkan *outcome* yang sesuai dengan harapan *stakeholders* Perseroan. Yang termasuk dalam struktur tata kelola Perseroan adalah Dewan Komisaris, Direksi, Komite dan satuan kerja pada Perseroan. Adapun yang termasuk infrastruktur tata kelola Perseroan antara lain adalah kebijakan dan prosedur, sistem informasi manajemen serta tugas pokok dan fungsi masing-masing struktur organisasi.
2. *Governance Process*
Penilaian *governance process* bertujuan untuk menilai efektivitas proses pelaksanaan prinsip GCG yang didukung oleh kecukupan struktur dan infrastruktur tata kelola Perseroan sehingga menghasilkan *outcome* yang sesuai dengan harapan *stakeholders*.

To evaluate the implementation of GCG, the Company carries out a GCG Assessment which is carried out periodically and consistently every year, consisting of Self Assessment following OJK regulations. Hasil Penilaian Sendiri (*Self Assessment*) Penerapan Tata Kelola Results of Self-Assessment Implementation of Governance

12. Bank telah menetapkan kebijakan umum yang terdiri dari Kebijakan Tata Kelola Bank, Kebijakan Manajemen Risiko serta Kebijakan Pengendalian Internal guna menunjang kegiatan usaha yang dijalankannya sehingga setiap kegiatan yang dilaksanakan dapat mencerminkan suatu tata kelola yang baik;
13. Bank telah memiliki kebijakan prosedur mengenai tata cara pelaksanaan transparansi kondisi keuangan;
14. Bank telah menyusun Laporan Pelaksanaan Tata Kelola periode tahun 2021 dimana cakupan Laporan Pelaksanaan Tata Kelola tersebut telah sesuai dengan Peraturan Otoritas Jasa Keuangan;
15. Direksi telah menyusun Rencana Bisnis Bank secara realistis, komprehensif, terukur (*achievable*) atas dasar kajian yang komprehensif dengan memperhatikan peluang bisnis dan kekuatan yang dimiliki oleh Bank serta mengidentifikasi kelemahan dan ancaman dan telah sesuai dengan visi dan misi serta rencana korporasi (*corporate plan*) Bank.

Faktor negatif aspek *governance structure* adalah:

Kegiatan Operasional Bank telah diatur dalam kebijakan, sistem, dan prosedur Bank, namun demikian masih terdapat beberapa ketentuan internal yang masih dalam proses pengkinian sehingga dapat berpotensi risiko adanya kondisi perkembangan bisnis yang belum sesuai dengan ketentuan yang ada, Hal tersebut dikarenakan dalam pelaksanaan proses pengkinian mengutamakan skala prioritas dari kebutuhan Bank.

B. *Governance Process*

Faktor positif aspek *governance process* adalah:

1. Pengangkatan anggota Komite dilakukan oleh Direksi berdasarkan keputusan rapat Dewan Komisaris dengan mempertimbangkan rekomendasi Komite Nominasi dan Remunerasi;
2. Direksi telah bertanggung jawab penuh atas pelaksanaan kepengurusan Bank yang telah dijalankan selama tahun buku 2022 yang tercantum dalam Laporan Tahunan yang disampaikan kepada pemegang saham pada RUPS Tahunan;
3. Direksi telah menindaklanjuti temuan dan rekomendasi dari hasil pemeriksaan Satuan Kerja Audit Internal, auditor eksternal, hasil pengawasan otoritas yang berwenang melalui pemberian arahan terkait temuan dan rekomendasi tersebut kepada seluruh unit kerja terkait;
4. Dalam melaksanakan tugas pengawasan, Dewan Komisaris telah mengarahkan, memantau dan mengevaluasi pelaksanaan kebijakan strategis Bank melalui rapat gabungan antara Dewan Komisaris dan Direksi serta pelaksanaan pemantauan oleh Komite - Komite sebagai alat kelengkapan Dewan Komisaris dengan memberikan rekomendasi kepada Direksi. Rapat tersebut dilakukan antara lain untuk memastikan terselenggaranya pelaksanaan prinsip-prinsip tata kelola yang baik dalam setiap kegiatan usaha Bank pada seluruh jenjang organisasi;
5. Seluruh kegiatan rapat Dewan Komisaris telah didokumentasikan secara lengkap sebagai dasar evaluasi pelaksanaan hasil keputusan rapat;
6. Dalam melakukan tugas pengawasan, Dewan Komisaris telah mengarahkan, memantau dan mengevaluasi pelaksanaan kebijakan strategis Bank melalui mekanisme rapat Dewan Komisaris yang pada periode Januari - Juni 2023 telah dilaksanakan sebanyak 12 kali, dan rapat gabungan Dewan Komisaris dan Direksi sebanyak 16 kali;
7. Dewan Komisaris telah membentuk Komite Audit, Komite Pemantau Risiko, Komite Nominasi dan Remunerasi serta Komite Tata Kelola Terintegrasi. Dan seluruh komite yang dibentuk sebagai alat kelengkapan Dewan Komisaris telah menjalankan tugasnya secara independen dan telah memberikan analisis yang memadai serta rekomendasi kepada Dewan Komisaris;

12. The Bank has established general policies consisting of Bank Governance Policies, Risk Management Policies and Internal Control Policies to support the business activities it carries out so that every activity carried out can reflect a good governance;
13. The Bank has a procedural policy regarding procedures for implementing transparency in financial conditions;

15. The Directors has prepared a realistic, comprehensive, measurable (*achievable*) Bank Business Plan based on a comprehensive study by taking into account the business opportunities and strengths of the Bank as well as identifying weaknesses and threats and in accordance with the vision and mission as well as the corporate plan) Banks.

The negative factors in the *governance structure* aspect are:

The Bank's operational activities have been regulated in the Bank's policies, systems and procedures, however there are still several internal provisions which are still in the process of being updated so there is a potential risk of business development conditions not being in accordance with existing provisions. This is because the implementation of the updating process prioritizes priority scale of Bank needs.

B. *Governance Process*

Positive factors aspects of *governance process* are:

1. The appointment of members of the Committee is carried out by the Directors based on the decision of the meeting of the Board of Commissioners taking into account the recommendations of the Nomination and Remuneration Committee;

29. Bank telah menerapkan ISO 37001: 2016 Sistem Manajemen Anti Penyuapan (SMAP), ISO 37301: 2021 Sistem Manajemen Kepatuhan (SMK), ISO 20000: 2018 dan ISO 27000: 2013 Sistem Keamanan Teknologi Informasi dan ISO 9001: 2015 *Trade Processing Service fot Export Import*.

Faktor negatif aspek governance process adalah:

1. Pelaksanaan supervise/pengawasan atasan terhadap pegawai yang menjadi kewenangannya dalam hal melaksanakan fungsi dan tugas masing-masing pegawai kiranya perlu melakukan penguatan kualitas guna mencegah adanya pelanggaran-pelanggaran terhadap ketentuan internal maupun eksternal.
2. Tingkat literasi pegawai dalam membaca ketentuan-ketentuan yang berlaku guna mencegah terjadinya pelanggaran-pelanggaran terhadap ketentuan internal maupun eksternal harus ditingkatkan, mengingat masih terdapat pelanggaran-pelanggaran kegiatan operasional yang belum sesuai dengan ketentuan internal maupun eksternal.

C. Governance Outcome

Faktor positif aspek governance outcome adalah:

1. Direksi telah mempertanggungjawabkan pelaksanaan tugasnya kepada pemegang saham melalui Rapat Umum Pemegang Saham (RUPS) dan seluruh pelaksanaan tugas dan tanggung jawab Direksi untuk tahun buku 2022 telah diterima oleh RUPS;
2. Dewan Komisaris beserta komite-komite dibawahnya telah melaksanakan tugas dan tanggung jawabnya dalam melakukan fungsi pengawasan dengan baik. Hal ini dapat terlihat dari nasihat dan saran yang disampaikan Dewan Komisaris terhadap pelaksanaan proses kegiatan usaha yang terdapat di Bank;
3. Komite-Komite yang berada di bawah Dewan Komisaris telah memberikan analisis dan rekomendasi kepada Dewan Komisaris. Analisis dan Rekomendasi tersebut menjadi pertimbangan Dewan Komisaris dalam rangka melaksanakan fungsi pengawasan terhadap fungsi pengurusan Bank yang dilaksanakan oleh Direksi;

Laporan Auditor Independen/ Independent Auditor's Report

Pemegang Saham, Dewan Komisaris dan Direksi/
The Shareholders, Board of Commissioners and Directors

PT Bank Pembangunan Daerah Jawa Barat dan Banten Tbk

Opini

Kami telah mengaudit laporan keuangan konsolidasian PT Bank Pembangunan Daerah Jawa Barat dan Banten Tbk dan entitas anaknya ("Grup") terlampir, yang terdiri dari laporan posisi keuangan konsolidasian tanggal 31 Desember 2023, serta laporan laba rugi dan penghasilan komprehensif lain konsolidasian, laporan perubahan ekuitas konsolidasian dan laporan arus kas konsolidasian untuk tahun yang berakhir pada tanggal tersebut, serta catatan atas laporan keuangan konsolidasian, termasuk ikhtisar kebijakan akuntansi material.

Menurut opini kami, laporan keuangan konsolidasian terlampir menyajikan secara wajar, dalam semua hal yang material, posisi keuangan konsolidasian Grup tanggal 31 Desember 2023, serta kinerja keuangan konsolidasian dan arus kas konsolidasiannya untuk tahun yang berakhir pada tanggal tersebut, sesuai dengan Standar Akuntansi Keuangan di Indonesia.

Basis Opini

Kami melaksanakan audit kami berdasarkan Standar Audit yang ditetapkan oleh Institut Akuntan Publik Indonesia. Tanggung jawab kami menurut standar tersebut diuraikan lebih lanjut dalam paragraf Tanggung Jawab Auditor terhadap Audit atas Laporan Keuangan Konsolidasian pada laporan kami. Kami independen terhadap Grup berdasarkan ketentuan etika yang relevan dalam audit kami atas laporan keuangan konsolidasian di Indonesia, dan kami telah memenuhi tanggung jawab etika yang relevan dalam audit kami atas laporan

Opinion

We have audited the consolidated financial statements of PT Bank Pembangunan Daerah Jawa Barat dan Banten Tbk and its subsidiaries ("the Group"), which comprise the consolidated statement of financial position as of December 31, 2023, and the consolidated statements of profit or loss and other comprehensive income, consolidated statement of changes in equity, and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of material accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2023, and its consolidated financial performance and consolidated cash flows for the year then ended, in accordance with Indonesian Financial Accounting Standards.

Basis for Opinion

We conducted our audit in accordance with Standards on Auditing established by the Indonesian Institute of Certified Public Accountants. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements paragraph of our report. We are independent of the Group in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Indonesia, and we have fulfilled our other ethical responsibilities in

keuangan konsolidasian di Indonesia, dan kami telah memenuhi tanggung jawab etika lainnya berdasarkan ketentuan tersebut. Kami yakin bahwa bukti audit yang telah kami peroleh adalah cukup dan tepat untuk menyediakan suatu basis bagi opini audit kami.

Hal Audit Utama

Hal audit utama adalah hal-hal yang, menurut pertimbangan profesional kami, merupakan hal yang paling signifikan dalam audit kami atas laporan keuangan konsolidasian periode kini. Hal-hal tersebut disampaikan dalam konteks audit kami atas laporan keuangan konsolidasian secara keseluruhan, dan dalam merumuskan opini kami atas laporan keuangan konsolidasian terkait, kami tidak menyatakan suatu opini terpisah atas hal audit utama tersebut.

Cadangan Kerugian Penurunan Nilai atas Kredit yang Diberikan, dan Pembiayaan dan Piutang Syariah

Pada tanggal 31 Desember 2023, total kredit yang diberikan sebesar Rp116.300.069 juta dan Grup telah membentuk cadangan kerugian penurunan nilai sebesar Rp1.913.951 juta. Pada tanggal 31 Desember 2023, total pembiayaan dan piutang syariah sebesar Rp8.778.114 juta dan Grup telah membentuk cadangan kerugian penurunan nilai sebesar Rp216.946 juta.

Berdasarkan Standar Akuntansi Keuangan di Indonesia, seperti yang dijelaskan pada Catatan 2.m, cadangan kerugian penurunan nilai atas kredit yang diberikan ditentukan berdasarkan kerangka kerugian kredit ekspektasian (KKE) yang memperhitungkan informasi bersifat perkiraan masa depan untuk mencerminkan perkiraan kondisi ekonomi masa depan. Cadangan kerugian penurunan nilai piutang murabahah ditentukan oleh Grup berdasarkan sesuai PSAK No. 102 "Akuntansi Murabahah" dengan kerangka *incurred loss*. Untuk selain murabahah, Grup membentuk cadangan kerugian penurunan nilai berdasarkan estimasi kerugian aset produktif yang tidak dapat ditagih sebagaimana diatur dalam PSAK yang berlaku dan kebijakan akuntansi Grup.

Kami fokus pada area ini karena total kredit yang diberikan, pembiayaan dan piutang syariah mewakili 65,29% dari total aset Grup dan total cadangan kerugian penurunan nilai yang dibentuk nilainya signifikan terhadap laporan keuangan konsolidasian Grup, serta dalam menghitung cadangan kerugian penurunan nilai, Grup menerapkan model yang bergantung pada data internal dan eksternal serta membutuhkan pertimbangan manajemen yang

accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Allowance for Impairment Losses of Loans, and Sharia Financing and Receivables

As of December 31, 2023, total loans amounted to Rp116,300,069 million and the Group has provided allowance for impairment losses amounted to Rp1,913,951 million. As of December 31, 2023, total sharia financing and receivables amounted to Rp8,778,114 million and the Group has provided allowance for impairment losses amounted to Rp216.946 million.

Based on Indonesian Financial Accounting Standards, as described in Note 2.m, the allowance for impairment of loans is determined based on the expected credit loss (ECL) framework which consider forward-looking information to reflect estimated future economic conditions. For sharia receivables and financing, allowance for impairment losses was determined by considering the provisions of applicable sharia business regulations. The allowance for impairment losses of murabahah receivables was determined by the Group based on SFAS No.102 "Accounting of Murabahah" using incurred loss framework. For other than murabahah receivables, the Group provides the allowance for impairment losses based on the estimated losses from the uncollectible amount of earning assets as stipulated in the applicable SFAS and the Group's accounting policies.

We focused on this area as the total loans, and sharia financing and receivables represent 65.29% of the total assets of the Group and total allowance for impairment losses is significant to the Group's consolidated financial statements, and in calculating the allowance for impairment losses, the Group utilizes models which are reliant on internal and external data and involves subjective management judgement and is subject to a high degree of

mempertimbangkan pertimbangan manajemen yang subjektif dan melibatkan penggunaan estimasi dengan tingkat ketidakpastian yang tinggi.

Pertimbangan-pertimbangan signifikan yang digunakan dalam menentukan KKE antara lain:

- Menentukan apakah telah terjadi peningkatan risiko kredit yang signifikan atau terdapat bukti objektif penurunan nilai;
- Mengembangkan model penilaian kolektif yang tepat untuk menghitung KKE. Model secara inheren adalah kompleks dan melibatkan pertimbangan manajemen dalam menentukan dan mempersiapkan model tersebut;
- Mengestimasi skenario perkiraan makroekonomi masa depan;
- Mengidentifikasi dan menentukan penyesuaian *post model* atas model KKE;
- Mengestimasi proyeksi arus kas masa depan dalam menghitung KKE individual; dan
- Menentukan beberapa skenario probabilitas tertimbang dalam menghitung KKE individual.

Pengungkapan Grup mengenai cadangan kerugian penurunan nilai kredit yang diberikan, pembiayaan dan piutang syariah dijelaskan pada Catatan 2.m, 12 dan 13 atas laporan keuangan konsolidasian.

Bagaimana Audit Kami Merespons Hal Audit Utama

Kami melakukan prosedur-prosedur audit berikut untuk merespons hal audit utama ini:

1. Kami memahami dan menguji pengendalian yang relevan atas cadangan kerugian penurunan nilai. Pengendalian tersebut meliputi:
 - Reviu dan persetujuan atas informasi bersifat perkiraan masa depan yang digunakan dalam model KKE;
 - Penggunaan elemen data penting yang andal dan akurat dalam model KKE;
 - Reviu dan persetujuan atas hasil KKE, termasuk penyesuaian model setelahnya yang diterapkan;
2. Kami memeriksa permodelan dan menilai kewajaran pertimbangan dan asumsi utama yang dibuat oleh manajemen dalam model dan parameter yang digunakan.
3. Kami memahami dan menguji pengendalian yang relevan atas identifikasi aset keuangan yang mengalami peningkatan risiko kredit secara signifikan atau bukti objektif penurunan nilai, melalui pengujian atas pengendalian penetapan kolektibilitas kredit yang diberikan, pembiayaan dan piutang syariah dan melakukan pemeriksaan secara uji petik atas dokumen

judgement and is subject to a high degree of estimation uncertainty.

The significant judgements involved in determining ECL include the following:

- *Determining whether a significant increase in credit risk has occurred or objective evidence of impairment was identified;*
- *Developing appropriate collective assessment models used to calculate ECL. The models are inherently complex, and management's judgement is applied in determining and preparing the models;*
- *Estimating forward-looking macroeconomic scenarios;*
- *Identifying and determining post model adjustments to the ECL model;*
- *Estimating future cash flow projection in the calculation of individual ECL; and*
- *Determining probability-weighted scenarios in assessing individual ECL.*

The Group's disclosures regarding allowance for impairment losses of loans, and sharia financing and receivables are described in Notes 2.m, 12 and 13 to the consolidated financial statements.

How Our Audit Addressed the Key Audit Matters

We have performed the following audit procedures to address in this key audit matters:

1. *We obtained understanding and tested the relevant controls over allowance for impairment losses of loans. These controls include:*
 - *Review and approval of forward-looking information used in the ECL model;*
 - *Use of reliable and accurate critical data elements in the ECL model;*
 - *Review and approval of the ECL results, including post model adjustments applied;*
2. *We examined the modelling and assessed the reasonableness of key judgements and assumptions made by management in the model and parameters used.*
3. *We obtained understanding and tested the relevant controls over the identification of financial assets that have experienced a significant increase in credit risk or objective evidence of impairment by performing control testing over the collectability of loans, sharia financing and receivables and examining the credit files on a sampling basis. We examined*

kredit yang diberikan, pembiayaan dan piutang syariah. Kami memeriksa sampel kredit yang diberikan, pembiayaan dan piutang syariah, yang diidentifikasi oleh Grup memiliki kualitas kredit yang lebih rendah, kredit yang direstrukturisasi, dan membuat penilaian independen kami apakah ada peningkatan risiko kredit secara signifikan atau terdapat bukti objektif penurunan nilai.

4. Kami menilai kecukupan cadangan kerugian penurunan nilai yang dihitung secara individual dengan memeriksa baik jumlah dan waktu dari arus kas masa depan yang digunakan oleh Grup dalam perhitungan cadangan kerugian penurunan nilai, menguji rata-rata probabilitas tertimbang yang digunakan dalam menyusun arus kas, termasuk membandingkan jadwal pembayaran kembali dengan perjanjian kredit dan memeriksa ketepatan penggunaan faktor diskonto.
5. Kami menilai dan menguji metodologi dan asumsi pemodelan signifikan yang digunakan dalam model KKE kolektif, termasuk penentuan *probability of default*, *loss given default* dan *exposure at default*, yang mencakup: evaluasi model dan metodologi yang digunakan dalam perhitungan; evaluasi prakiraan makroekonomi Indonesia dengan membandingkan prakiraan dengan informasi yang tersedia untuk umum tentang prospek makroekonomi Indonesia; dan menguji kelengkapan dan keakuratan data yang digunakan dalam model dengan data aktual yang tersedia di Grup dan menguji keakuratan perhitungan KKE kolektif.
6. Kami menilai kecukupan cadangan kerugian penurunan nilai atas pembiayaan dan piutang syariah berdasarkan persentase tertentu untuk masing-masing kualitas pembiayaan dan piutang syariah dan menguji keakuratan perhitungannya.

Informasi Lain

Manajemen bertanggung jawab atas informasi lain. Informasi lain terdiri dari informasi yang tercantum dalam Laporan Tahunan, tetapi tidak termasuk laporan keuangan dan laporan auditor kami. Laporan Tahunan diharapkan akan tersedia bagi kami setelah tanggal laporan auditor ini.

Opini kami atas laporan keuangan tidak mencakup Laporan Tahunan, dan oleh karena itu, kami tidak menyatakan bentuk keyakinan apapun atas Laporan Tahunan tersebut.

sampled loans, sharia financing and receivables identified by the Group as having lower credit quality, restructured loans, and formed our own independent judgement as to whether there was a significant increase in credit risk or any objective evidence of impairment.

4. *We assessed the adequacy of individual allowance for impairment losses by examining both the quantum and timing of future cash flows used by the Group in the allowance for impairment loss calculation, testing the probability-weighted scenarios used in preparing the cash flows, including comparing the repayment schedule to the credit agreement and checking the appropriateness of discount factor used.*
5. *We assessed and tested the methodologies and significant modelling assumptions within the collective ECL models, which include determination of probability of default, loss given default and exposure at default, which involved evaluating the models and methodologies used in the calculations; evaluating the forecasts of Indonesia macroeconomics by comparing forecasts with publicly available information on the Indonesia macroeconomic outlook; and testing the completeness and accuracy of data used in the model with the actual data available within the Group and accuracy the calculation of the collective ECL.*
6. *We assessed the adequacy of allowance for impairment losses of sharia financing and receivables based on specific percentage for each collectability and tested the accuracy of the calculation.*

Other Information

Management is responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the financial statements and our auditors' report thereon. The Annual Report is expected to be made available to us after the date of this auditors' report.

Our opinion on the financial statements does not cover the Annual Report and we will not express any form of assurance on the Annual Report.

Sehubungan dengan audit kami atas laporan keuangan, tanggung jawab kami adalah untuk membaca Laporan Tahunan yang teridentifikasi di atas, jika tersedia dan, dalam melaksanakannya, mempertimbangkan apakah Laporan Tahunan mengandung ketidakkonsistensian material dengan laporan keuangan atau pemahaman yang kami peroleh selama audit, atau mengandung kesalahan penyajian material.

Ketika kami membaca Laporan Tahunan, jika kami menyimpulkan bahwa terdapat suatu kesalahan penyajian material di dalamnya, kami diharuskan untuk mengomunikasikan hal tersebut kepada pihak yang bertanggung jawab atas tata kelola dan mengambil tindakan tepat berdasarkan peraturan perundang-undangan yang berlaku atau Standar Audit yang ditetapkan oleh Institut Akuntan Publik Indonesia.

Tanggung Jawab Manajemen dan Pihak yang Bertanggung Jawab atas Tata Kelola terhadap Laporan Keuangan Konsolidasian

Manajemen bertanggung jawab atas penyusunan dan penyajian wajar laporan keuangan konsolidasian tersebut sesuai dengan Standar Akuntansi Keuangan di Indonesia, dan atas pengendalian internal yang dianggap perlu oleh manajemen untuk memungkinkan penyusunan laporan keuangan konsolidasian yang bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan.

Dalam penyusunan laporan keuangan konsolidasian, manajemen bertanggung jawab untuk menilai kemampuan Grup dalam mempertahankan kelangsungan usahanya, mengungkapkan, sesuai dengan kondisinya, hal-hal yang berkaitan dengan kelangsungan usaha, dan menggunakan basis akuntansi kelangsungan usaha, kecuali manajemen memiliki intensi untuk melikuidasi Grup atau menghentikan operasi, atau tidak memiliki alternatif yang realistis selain melaksanakannya.

Pihak yang bertanggung jawab atas tata kelola bertanggung jawab untuk mengawasi proses pelaporan keuangan konsolidasian Group.

Tanggung Jawab Auditor terhadap Audit atas Laporan Keuangan Konsolidasian

Tujuan kami adalah untuk memperoleh keyakinan memadai tentang apakah laporan keuangan konsolidasian secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, tetapi bukan merupakan suatu jaminan bahwa audit yang dilaksanakan

In connection with our audit of the financial statements, our responsibility is to read the Annual Report identified above when it becomes available and, in doing so, consider whether the Annual Report is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Annual Report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take appropriate actions based on the applicable laws and regulations or Standards on Auditing established by the Indonesian Institute of Certified Public Accountants.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with Indonesian Financial Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's consolidated financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists.

berdasarkan Standar Audit akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun secara agregat, dapat diekspektasikan secara wajar akan mempengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan konsolidasian tersebut.

Sebagai bagian dari suatu audit berdasarkan Standar Audit, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

- Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan konsolidasian, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memperoleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian pengendalian internal.
- Memperoleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektifitasan pengendalian internal Grup.
- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh manajemen.
- Menyimpulkan ketepatan penggunaan basis akuntansi atas kelangsungan usaha oleh manajemen dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Grup untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor kami ke pengungkapan terkait dalam laporan keuangan konsolidasian atau, jika pengungkapan tersebut tidak memadai, harus menentukan apakah perlu untuk memodifikasi opini kami. Kesimpulan kami didasarkan pada bukti audit yang diperoleh hingga tanggal laporan auditor kami. Namun, peristiwa atau kondisi masa depan dapat menyebabkan Grup tidak dapat mempertahankan kelangsungan usaha.

Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Standards on Auditing, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- *Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.*
- *Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.*
- *Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.*
- *Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.*

- Mengevaluasi penyajian, struktur, dan isi laporan keuangan konsolidasian secara keseluruhan, termasuk pengungkapannya, dan apakah laporan keuangan konsolidasian mencerminkan transaksi dan peristiwa yang mendasarinya dengan suatu cara yang mencapai penyajian wajar.
 - Memperoleh bukti audit yang cukup dan tepat terkait informasi keuangan entitas atau aktivitas bisnis dalam Grup untuk menyatakan opini atas laporan keuangan konsolidasian. Kami bertanggung jawab atas arahan, supervisi, dan pelaksanaan audit atas laporan keuangan konsolidasian Grup. Kami tetap bertanggung jawab sepenuhnya atas opini audit kami.
- *Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.*
 - *Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of audit of the Group's consolidated financial statement. We remain solely responsible for our audit opinion.*

Kami mengomunikasikan kepada pihak yang bertanggung jawab atas tata kelola mengenai, antara lain, ruang lingkup dan saat yang direncanakan atas audit, serta temuan audit signifikan, termasuk setiap defisiensi signifikan dalam pengendalian internal yang teridentifikasi oleh kami selama audit.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Kami juga memberikan suatu pernyataan kepada pihak yang bertanggung jawab atas tata kelola bahwa kami telah mematuhi ketentuan etika yang relevan mengenai independensi, dan mengomunikasikan seluruh hubungan, serta hal-hal lain yang dianggap secara wajar berpengaruh terhadap independensi kami, dan, jika relevan, pengamanan terkait.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Dari hal-hal yang dikomunikasikan kepada pihak yang bertanggung jawab atas tata kelola, kami menentukan hal tersebut yang paling signifikan dalam audit atas laporan keuangan konsolidasian periode kini dan oleh karenanya menjadi hal audit utama. Kami menguraikan hal audit utama dalam laporan auditor kami, kecuali peraturan perundang-undangan melarang pengungkapan publik tentang hal tersebut atau ketika, dalam kondisi yang sangat jarang terjadi, kami menentukan bahwa suatu hal tidak boleh dikomunikasikan dalam laporan kami karena konsekuensi merugikan dari mengomunikasikan hal tersebut akan diekspektasikan secara wajar melebihi manfaat kepentingan publik atas komunikasi tersebut.

From the matters communicated with those charged with governance, we determine such matter that was of most significance in the audit of the consolidated financial statements of the current period and is therefore the key audit matter. We describe the matter in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

1. Informasi Umum

a. Pendirian dan informasi umum Bank

PT Bank Pembangunan Daerah Jawa Barat dan Banten Tbk ("Bank") didirikan berdasarkan Peraturan Pemerintah No. 33 tahun 1960 tentang penentuan perusahaan milik Belanda di Indonesia yang dikenakan nasionalisasi. Salah satu perusahaan milik Belanda yang berkedudukan di Bandung yaitu N.V. Denis (*De Eerste Nederlandsche Indische Shareholding*) terkena ketentuan tersebut dan diserahkan kepada Pemerintah Daerah Provinsi Daerah Tingkat I Jawa Barat. Bank telah mulai beroperasi secara komersial pada tanggal 20 Mei 1961.

Sebagai tindak lanjut dari Peraturan Pemerintah No. 33 tahun 1960, Pemerintah Daerah Provinsi Daerah Tingkat I Jawa Barat mendirikan Bank Karya Pembangunan, dengan Akta Notaris Noezar No. 152 tanggal 21 Maret 1961 dan No. 184 tanggal 13 Mei 1961 yang kemudian dikukuhkan dengan Surat Keputusan Gubernur Provinsi Jawa Barat No. 7/GKDN/BPD/61 tanggal 20 Mei 1961 dengan nama PD Bank Karya Pembangunan Daerah Jawa Barat. Berdasarkan Peraturan Daerah Provinsi Jawa Barat No. 11/PD-DPRD/72 tanggal 27 Juni 1972, kedudukan hukum PD Bank Karya Pembangunan Daerah Jawa Barat dikukuhkan sebagai Perusahaan Daerah yang berusaha di bidang perbankan. Selanjutnya, melalui Peraturan Daerah Provinsi Jawa Barat No. 1/DP-40/PD/1978 tanggal 27 Juni 1978, nama PD Bank Karya Pembangunan Daerah Jawa Barat diubah menjadi Bank Pembangunan Daerah Jawa Barat. Bank Pembangunan Daerah Jawa Barat mendapat sebutan "Bank Jabar" dan logo baru berdasarkan Peraturan Daerah No. 11 tahun 1995.

Berdasarkan Surat Keputusan Direksi Bank Indonesia No. 25/84/KEP/DIR tanggal 2 November 1992, Bank memperoleh status sebagai bank devisa.

Penyesuaian bentuk badan hukum Bank menjadi Perseroan Terbatas dinyatakan dalam Akta Notaris No. 4 tanggal 8 April 1999 yang dibuat di hadapan Notaris Popy Kuntari Sutresna, S.H., M. Hum., yang telah mendapatkan pengesahan dari Menteri Kehakiman dengan Surat Keputusan No. C2-7103.HT.01.01.TH.99 tanggal 16 April 1999 dan diumumkan dalam Berita Negara Republik Indonesia No. 39 tanggal 14 Mei 1999.

1. General Information

a. Establishment and general information about the Bank

PT Bank Pembangunan Daerah Jawa Barat dan Banten Tbk (the "Bank") was established based on the Government Regulation No. 33 year 1960 regarding the nationalization of a Dutch-owned company domiciled in Indonesia. The regulation applied to a Dutch - owned company, N.V. Denis (De Eerste Nederlandsche Indische Shareholding), which was then handed over to the Regional Government of West Java Province Level I. The Bank started its commercial operations on May 20, 1961.

Following the Government Regulation No. 33 year 1960, the Regional Government of West Java Province Level I established Bank Karya Pembangunan, as covered by Notarial Deeds No. 152 dated March 21, 1961 and No. 184 dated May 13, 1961 of Noezar which was approved based on Decision Letter of the Governor of West Java Province No. 7/GKDN/BPD/61 dated May 20, 1961, using the name of PD Bank Karya Pembangunan Daerah Jawa Barat. Based on Provincial Government Regulation No. 11/PD-DPRD/72 dated June 27, 1972 of West Java Province, the legal status of PD Bank Karya Pembangunan Daerah Jawa Barat was changed to become a Regional Enterprise engaged in a banking business. Subsequently, based on Provincial Government Regulation No. 1/DP-40/PD/1978 dated June 27, 1978 of West Java Province, PD Bank Karya Pembangunan Daerah Jawa Barat changed its name to Bank Pembangunan Daerah Jawa Barat. Bank Pembangunan Daerah Jawa Barat obtained its trade name of "Bank Jabar" and a new logo based on Provincial Government Regulation No. 11 year 1995.

Based on the Decision Letter No. 25/84/KEP/DIR dated November 2, 1992 of the Directors of Bank Indonesia, the Bank obtained the status of a foreign exchange bank.

The change in the Bank's legal status to a Limited Liability Corporation was stated under Notarial Deed No. 4 dated April 8, 1999 of Popy Kuntari Sutresna, S.H., M. Hum., which was approved by the Minister of Justice in its Decision Letter No. C2-7103.HT.01.01.TH.99 dated April 16, 1999 and was published in the State Gazette No. 39 dated May 14, 1999 of the Republic of Indonesia.

Laporan keuangan disusun dan disajikan sesuai dengan Pernyataan Standar Akuntansi Keuangan ("PSAK"), yaitu PSAK 101 (Revisi 2019) tentang "Penyajian Laporan Keuangan Syariah", PSAK 102 (Revisi 2019) tentang "Akuntansi Murabahah", PSAK 104 tentang "Akuntansi Istishna", PSAK 105 tentang "Akuntansi Mudharabah", PSAK 106 tentang "Akuntansi Musyarakah", PSAK 107 (Revisi 2016) tentang "Akuntansi Ijarah", PSAK 110 (Revisi 2020) tentang "Akuntansi Sukuk", PSAK 111 tentang "Akuntansi Wa'ad", Pedoman Akuntansi Perbankan Syariah Indonesia (PAPSI Revisi 2013. Bank juga menerapkan Standar Akuntansi Keuangan di Indonesia ("SAK"), yang ditetapkan Ikatan Akuntan Indonesia (IAI).

Laporan keuangan konsolidasian telah disajikan berdasarkan nilai historis, kecuali untuk beberapa akun yang dinilai menggunakan dasar pengukuran lain sebagaimana dijelaskan pada kebijakan akuntansi dari akun tersebut. Laporan keuangan konsolidasian disusun dengan dasar akrual, kecuali pendapatan dari istishna dan bagi hasil dari pembiayaan mudharabah dan musyarakah serta laporan arus kas konsolidasian.

Laporan arus kas konsolidasian disusun menggunakan metode langsung dan arus kas dikelompokkan atas dasar aktivitas operasi, investasi dan pendanaan. Kas dan setara kas terdiri dari kas, giro pada Bank Indonesia dan giro pada bank lain, penempatan pada Bank Indonesia dan bank lain yang jatuh tempo dalam waktu 3 (tiga) bulan sejak tanggal perolehan, sepanjang tidak digunakan sebagai jaminan atas pinjaman yang diterima serta tidak dibatasi penggunaannya.

Mata uang penyajian yang digunakan dalam laporan keuangan konsolidasian adalah Rupiah, yang merupakan mata uang fungsional. Angka-angka yang disajikan dalam laporan keuangan, kecuali bila dinyatakan secara khusus adalah dibulatkan dalam jutaan Rupiah.

b. Prinsip konsolidasian

Laporan keuangan konsolidasian mencakup laporan keuangan Bank dan entitas anak seperti disebutkan pada Catatan 1.g.

Entitas anak adalah entitas yang dikendalikan oleh Bank, yakni Bank terekspos, atau memiliki hak atas imbal hasil variabel dari keterlibatannya dengan entitas dan memiliki kemampuan untuk mempengaruhi imbal hasil tersebut melalui kemampuan kini untuk mengarahkan aktivitas relevan dari entitas (kekuasaan atas *investee*).

The financial statements have been prepared and presented in accordance with the Statement of Financial Accounting Standards ("SFAS"), namely: SFAS 101 (Revised 2019), "Presentation of Sharia Financial Statements", SFAS 102 (Revised 2019), "Accounting for Murabahah", SFAS 104 "Accounting for Istishna", SFAS 105, "Accounting for Mudharabah", SFAS 106, "Accounting for Musyarakah", SFAS 107 (Revised 2016), "Accounting for Ijarah", SFAS 110 (Revised 2020) "Accounting for Sukuk", SFAS No. 111 "Accounting for Wa'ad", Indonesia Sharia Banking Accounting Guidelines (PAPSI Revised 2013). The Bank also applied Indonesian Financial Accounting Standards (FAS) issued by the Institute of Indonesia Chartered Accountants (IAI).

The consolidated financial statements have been prepared on a historical cost basis, except for some accounts that were assessed using another measurement basis as explained in the accounting policies of the account. The consolidated financial statements have been prepared on accrual basis, except for the revenue from istishna and the profit sharing from the mudharabah and musyarakah financing and the consolidated statement of cash flow.

The consolidated statement of cash flows has been prepared using the direct method and the cash flows have been classified based on operating, investing, and financing activities. Cash and cash equivalents consist of cash, current accounts with Bank Indonesia and other banks, placements with Bank Indonesia and other banks maturing within 3 (three) months or less from the acquisition date, provided they are not used as collateral for borrowings nor restricted.

The presentation currency used in the consolidated financial statements is Indonesian Rupiah, which is the Bank and its subsidiaries' functional currency. Unless otherwise stated, all figures presented in the consolidated financial statements are rounded off to millions of Rupiah.

b. Principles of consolidation

The consolidated financial statements incorporate the financial statements of the Bank and its subsidiaries as described in Note 1.g.

A subsidiary is an entity controlled by the Bank, the Bank is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its current ability to direct the entity's relevant activities (power over the investee).

Keberadaan dan dampak dari hak suara potensial dimana Bank memiliki kemampuan praktis untuk melaksanakan (yakni hak substantif) dipertimbangkan saat menilai apakah Bank mengendalikan entitas lain.

Laporan keuangan konsolidasian Bank dan entitas anak mencakup hasil usaha, arus kas, aset dan liabilitas dari Bank dan seluruh entitas anak yang, secara langsung dan tidak langsung, dikendalikan oleh Bank. Entitas anak dikonsolidasikan sejak tanggal efektif akuisisi, yaitu tanggal dimana Bank dan entitas anak secara efektif memperoleh pengendalian atas bisnis yang diakuisisi, sampai tanggal pengendalian berakhir.

Entitas induk menyusun laporan keuangan konsolidasian dengan menggunakan kebijakan akuntansi yang sama untuk transaksi dan peristiwa lain dalam keadaan yang serupa. Seluruh transaksi, saldo, penghasilan, beban, dan arus kas dalam intra kelompok usaha terkait dengan transaksi antar entitas dalam kelompok usaha dieliminasi secara penuh.

Bank dan entitas anak mengatribusikan laba rugi dan setiap komponen dari penghasilan komprehensif lain kepada pemilik entitas induk dan kepentingan non-pengendali meskipun hal tersebut mengakibatkan kepentingan non-pengendali memiliki saldo defisit. Bank dan entitas anak menyajikan kepentingan non-pengendali di ekuitas dalam laporan posisi keuangan konsolidasian, terpisah dari ekuitas pemilik entitas induk.

Perubahan dalam bagian kepemilikan entitas induk pada entitas anak yang tidak mengakibatkan hilangnya pengendalian adalah transaksi ekuitas (yaitu transaksi dengan pemilik dalam kapasitasnya sebagai pemilik). Ketika proporsi ekuitas yang dimiliki oleh kepentingan non-pengendali berubah, Bank dan entitas anak menyesuaikan jumlah tercatat kepentingan pengendali dan kepentingan non-pengendali untuk mencerminkan perubahan kepemilikan relatifnya dalam entitas anak. Selisih antara jumlah tercatat kepentingan non-pengendali yang disesuaikan dan nilai wajar dari jumlah yang diterima atau dibayarkan diakui langsung dalam ekuitas dan diatribusikan pada pemilik dari entitas induk.

Jika Bank dan entitas anak kehilangan pengendalian, maka Bank dan entitas anak akan:

- a) Menghentikan pengakuan aset (termasuk *goodwill*) dan liabilitas entitas anak pada jumlah tercatatnya ketika pengendalian hilang;

The existence and effect of substantive potential voting rights that the Bank has the practical ability to exercise (ie substantive rights) are considered when assessing whether the Bank controls another entity.

The Bank and its subsidiaries' consolidated financial statements incorporate the results, cash flows, assets, and liabilities of the Bank and all of its directly and indirectly controlled subsidiaries. Subsidiaries are consolidated from the effective date of acquisition, which is the date on which the Bank effectively obtains control of the acquired business, until that control ceases.

A parent prepares consolidated financial statements using uniform accounting policies for like transactions and other events in similar circumstances. All intra-group transactions, balances, income, expenses, and cash flows relating to transactions between entities of the group are eliminated in full.

The Bank and its subsidiaries attributed the profit or loss and each component of other comprehensive income to the owners of the parent and non-controlling interest even though this results in the non-controlling interests having a deficit balance. The Bank and its subsidiaries presents non-controlling interest in equity in the consolidated statement of financial position, separately from the equity owners of the parent.

Changes in the parent's ownership interest in a subsidiary that do not result in loss of control are equity transactions (ie transactions with owners in their capacity as owners). When the proportion of equity held by non-controlling interest change, the Bank and its subsidiaries adjusted the carrying amounts of the controlling interest and non-controlling interest to reflect the changes in their relative interest in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to the owners of the parent.

If the Bank and its subsidiaries loses control, so Bank and its subsidiaries will:

- (a) Derecognise the assets (including goodwill) and liabilities of the subsidiary at their carrying amounts at the date when control is lost;*

- e) Mengakui perbedaan apapun yang dihasilkan sebagai keuntungan atau kerugian dalam laba rugi yang diatribusikan kepada entitas induk.

c. Penjabaran mata uang asing

Transaksi dalam mata uang asing dijabarkan ke mata uang rupiah dengan menggunakan kurs yang berlaku pada tanggal transaksi. Pada tanggal laporan posisi keuangan konsolidasian, aset dan liabilitas moneter dalam mata uang asing dijabarkan dengan menggunakan kurs yang berlaku pada tanggal laporan posisi keuangan konsolidasian.

Keuntungan dan kerugian selisih kurs yang timbul dari transaksi dalam mata uang asing dan dari penjabaran aset dan liabilitas moneter dalam mata uang asing diakui dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian tahun berjalan.

Laba atau rugi kurs valuta asing atas aset dan liabilitas moneter merupakan selisih antara biaya perolehan diamortisasi dalam rupiah pada awal tahun, disesuaikan dengan tingkat suku bunga efektif dan pembayaran selama tahun berjalan, dan biaya perolehan diamortisasi dalam valuta asing yang dijabarkan ke dalam rupiah dengan menggunakan kurs pada akhir tahun.

Aset dan liabilitas non-moneter dalam mata uang asing dijabarkan dengan menggunakan kurs pada tanggal transaksi.

Berikut ini adalah kurs mata uang asing utama yang digunakan untuk penjabaran dalam rupiah pada 31 Desember 2023 dan 2022 yang menggunakan kurs tengah berdasarkan *Reuters* (pukul 16.00 Waktu Indonesia Barat) (dalam Rupiah penuh).

c. Foreign currency translation

Transactions denominated in foreign currencies are converted into rupiah at the exchange rates prevailing at the dates of the transactions. At the consolidated statement of financial position, monetary assets and liabilities denominated in foreign currencies are translated at the exchange rates prevailing at such date.

Exchange gains and losses arising from transactions denominated in foreign currencies and from the translation of monetary assets and liabilities denominated in foreign currencies are recognized in the consolidated statement of profit and loss and other comprehensive income for the current year.

The foreign currency gains or losses on monetary assets and liabilities are the difference between amortized cost in rupiah at the beginning of the year, adjusted for effective interest rate and payments during the year, and the amortized cost in foreign currency translated into rupiah using the exchange rate at the end of the year.

Non-monetary assets and liabilities denominated in foreign currencies are translated using the exchange rates prevailing at the transaction date.

Model bisnis merefleksikan bagaimana kelompok aset keuangan dikelola untuk mencapai tujuan bisnis tertentu.

Bank dan entitas anak melakukan pengujian karakteristik arus kas kontraktual dari aset keuangan yang dikelola untuk mengetahui karakteristik arus kas kontraktual berasal hanya dari pembayaran pokok dan bunga dari jumlah pokok terutang (*Solely Payment of Principal and Interest* atau *Pass SPPI*) yang konsisten dengan pengaturan pinjaman dasar (*Basic Lending Agreement*). Dalam melakukan penilaian, Bank dan entitas anak mempertimbangkan:

- Imbalan untuk nilai waktu dari uang;
- *Leverage*;
- Variabilitas pada waktu dan jumlah arus kas;
- Instrumen yang terkait secara kontraktual;
- Pembayaran dipercepat;
- Ketentuan kontrak tidak sah dan *de minimis*.

Aset keuangan diukur pada biaya perolehan diamortisasi jika kedua kondisi berikut terpenuhi:

- Aset keuangan yang dikelola dalam model bisnis yang bertujuan untuk memiliki aset keuangan dalam rangka mendapatkan arus kas kontraktual; dan
- Arus kas kontraktual tersebut semata dari pembayaran pokok dan bunga (SPPI).

Aset keuangan diukur pada nilai wajar melalui penghasilan komprehensif lain (FVTOCI) jika kedua kondisi berikut:

- Aset keuangan yang dikelola untuk mendapatkan arus kas kontraktual dan menjual aset keuangan; dan
- Arus kas kontraktual tersebut semata dari pembayaran pokok dan bunga (SPPI).

Aset keuangan diklasifikasikan pada nilai wajar melalui laba rugi (FVTPL) jika tidak memenuhi kondisi yang disyaratkan untuk diukur pada biaya perolehan diamortisasi atau nilai wajar melalui penghasilan komprehensif lain.

Pada saat pengakuan awal, Bank dan entitas anak dapat membuat pilihan yang tidak dapat dibatalkan untuk menyajikan instrumen ekuitas yang bukan dimiliki untuk diperdagangkan pada nilai wajar melalui penghasilan komprehensif lain.

Liabilitas keuangan diklasifikasikan ke dalam kategori sebagai berikut pada saat pengakuan awal:

- I. Liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi, yang memiliki 2 (dua) sub-klasifikasi, yaitu liabilitas keuangan yang ditetapkan demikian pada saat pengakuan awal dan diklasifikasikan dalam kelompok diperdagangkan;

The business model reflects how Bank and its subsidiaries of financial assets are managed to achieve a particular business objective.

The Bank and its subsidiaries assess the contractual cash flow characteristics of financial assets to determine the characteristics of contractual cash flows only from the payment of principal and interest from the outstanding principal (*Solely Payment of Principal and Interest or Pass SPPI*) that is consistent with basic lending agreement. In making the assessment, the Bank and its subsidiaries considers:

- The time value of money element of interest;
- *Leverage*;
- Variability in timing or amount of cash flows;
- Contractually linked instruments;
- Early repayment;
- Non-genuine features and *de minimis*.

Financial assets are measured at amortized cost if both of the following conditions are met:

- Financial assets are managed where the business model objectives in order to collect the contractual cash flows; and
- The contractual cash flows are solely payments of principal and interest (SPPI).

Financial assets are measured at fair value through other comprehensive income (FVTOCI) if both of the following conditions are met:

- Financial assets are managed to collect the contractual cash flows and sell the assets; and
- The contractual cash flows are solely payments of principal and interest (SPPI).

Financial assets are measured at fair value through profit or loss (FVTPL) if do not meet the conditions required to be measured at amortized cost or fair value through other comprehensive income.

At initial recognition, the Bank and its subsidiaries may make an irrevocable choice to present equity instruments that are not held for trading at fair value through other comprehensive income.

Financial liabilities are classified into the following categories at initial recognition:

- I. Financial liabilities at fair value through profit or loss, which has 2 (two) sub-classifications, i.e. those designated as such upon initial recognition and those classified as held for trading;

- b. Aset keuangan dan liabilitas keuangan pada awalnya diukur pada nilai wajarnya. Dalam hal aset keuangan atau liabilitas keuangan tidak diukur pada nilai wajar melalui laporan laba rugi, nilai wajar tersebut ditambah biaya transaksi yang dapat diatribusikan secara langsung. Pengukuran aset keuangan dan liabilitas keuangan setelah pengakuan awal tergantung pada klasifikasinya.

Biaya transaksi hanya meliputi biaya-biaya yang dapat diatribusikan secara langsung untuk perolehan suatu aset keuangan atau penerbitan suatu liabilitas keuangan dan merupakan biaya tambahan yang tidak akan terjadi apabila instrumen keuangan tersebut tidak diperoleh atau diterbitkan. Untuk aset keuangan, biaya transaksi ditambahkan pada jumlah yang diakui pada awal pengakuan aset, sedangkan untuk liabilitas keuangan, biaya transaksi dikurangkan dari jumlah utang yang diakui pada pengakuan awal liabilitas. Biaya transaksi tersebut diamortisasi selama umur instrumen berdasarkan metode suku bunga efektif dan dicatat sebagai bagian dari pendapatan bunga untuk biaya transaksi sehubungan dengan aset keuangan atau sebagai bagian dari beban bunga untuk biaya transaksi sehubungan dengan liabilitas keuangan.

Bank dan entitas anak, pada pengakuan awal, dapat menetapkan aset keuangan dan liabilitas keuangan tertentu sebagai nilai wajar melalui laba rugi (opsi nilai wajar). Opsi nilai wajar dapat digunakan hanya bila memenuhi ketentuan sebagai berikut:

- penetapan sebagai opsi nilai wajar mengurangi atau mengeliminasi ketidak-konsistenan pengukuran dan pengakuan (*accounting mismatch*) yang dapat timbul;
- aset keuangan dan liabilitas keuangan merupakan bagian dari portofolio instrumen keuangan yang risikonya dikelola dan dilaporkan kepada manajemen kunci berdasarkan nilai wajar; atau
- aset keuangan dan liabilitas keuangan terdiri dari kontrak utama dan derivatif melekat yang harus dipisahkan, tetapi tidak dapat mengukur derivatif melekat secara terpisah.

- b. *Financial assets and liabilities are initially recognized at fair value. For those financial assets and liabilities not measured at fair value through profit and loss, plus directly attributable transaction costs. The subsequent measurement of financial assets and liabilities depends on their classification.*

Transaction costs only include costs that are directly attributable to the acquisition of a financial asset or issuance of a financial liability and an additional charge that would not occur if the instrument is not acquired or issued. For financial assets, transaction costs are added to the amount recognized in the initial recognition of the asset, while for financial liabilities, transaction costs are deducted from the amount of debt recognized on initial recognition of a liability. The transaction costs are amortized over the terms of the instrument based on the effective interest rate method and recorded as part of interest income for transaction costs related to the financial asset or as part of interest expense for transaction costs related to financial liabilities.

The Bank and its subsidiaries, upon initial recognition, may designate certain financial assets and liabilities, at fair value through profit or loss (fair value option). The fair value option is only applied when the following conditions are met:

- *the application of the fair value option reduces or eliminates an accounting mismatch that would otherwise arise;*
- *the financial assets and liabilities are part of a portfolio of financial instruments, the risks of which are managed and reported to key management on a fair value basis; or*
- *the financial assets and liabilities consist of a host contract and an embedded derivative that must be bifurcated, but unable to measure the embedded derivative separately.*

- (iii) Pengukuran setelah pengakuan awal
Aset keuangan dalam kelompok aset keuangan yang diukur pada nilai wajar melalui penghasilan komprehensif lain dan aset keuangan dan liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi diukur pada nilai wajarnya.

Aset keuangan kelompok biaya perolehan diamortisasi dan liabilitas keuangan lainnya diukur pada biaya perolehan diamortisasi dengan menggunakan metode suku bunga efektif.

- (iv) Penghentian pengakuan
- a. Aset keuangan dihentikan pengakuannya jika:
- Hak kontraktual atas arus kas yang berasal dari aset keuangan tersebut berakhir; atau
 - Bank dan entitas anak mentransfer hak untuk menerima arus kas yang berasal dari aset keuangan atau menanggung liabilitas untuk membayarkan arus kas yang diterima tersebut secara penuh tanpa penundaan berarti kepada pihak ketiga di bawah kesepakatan pelepasan (*pass-through arrangement*); dan
 - Antara (a) Bank dan entitas anak telah mentransfer secara substansial seluruh risiko dan manfaat atas aset, atau (b) Bank dan entitas anak tidak mentransfer maupun tidak memiliki secara substansial seluruh risiko dan manfaat atas aset, namun telah mentransfer kendali atas aset.

Ketika Bank dan entitas anak telah mentransfer hak untuk menerima arus kas dari aset atau di bawah kesepakatan pelepasan (*pass-through arrangement*), dan tidak mentransfer serta tidak mempertahankan secara substansial seluruh risiko dan manfaat atas aset dan masih memiliki pengendalian atas aset, aset diakui sebesar keterlibatan Bank dan entitas anak yang berkelanjutan atas aset tersebut.

Kredit yang diberikan atau aset keuangan lain dihapusbukukan ketika tidak terdapat prospek yang realistis mengenai pengembalian kredit dalam waktu dekat atau hubungan normal dengan debitur telah berakhir. Kredit yang tidak dapat dilunasi dihapusbukukan dengan mendebit cadangan kerugian penurunan nilai.

Financial assets at fair value through other comprehensive income and financial assets and financial liabilities at fair value through profit or loss are measured at fair value.

Financial assets classified as amortized cost and other financial liabilities measured at amortized cost using the effective interest rate method.

- (iv) *Derecognition*
a. *Financial assets are derecognized when:*

- *The contractual rights to receive cash flows from the financial assets have expired; or*
- *The Bank and its subsidiaries have transferred its rights to receive cash flows from the financial assets or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through arrangement'; and*
- *Either (a) the Bank and its subsidiaries has transferred substantially all the risks and rewards of the asset, or (b) the Bank and its subsidiaries has neither transferred nor retained substantially all the risks and rewards of the asset but has transferred control of the asset.*

When the Bank and its subsidiaries has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement and has neither transferred nor retained substantially all risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Bank and its subsidiaries' continuing involvement in the asset.

Loans or other financial assets are written off when there is no realistic prospect of collection in the near future or the normal relationship with the borrowers has ceased to exist. When a loan is deemed uncollectible, it is written off against the related allowance for impairment losses.

- (viii) Pengukuran biaya diamortisasi
Biaya perolehan diamortisasi dari aset keuangan atau liabilitas keuangan adalah jumlah aset keuangan atau liabilitas keuangan yang diukur pada saat pengakuan awal dikurangi pembayaran pokok pinjaman, ditambah atau dikurangi amortisasi kumulatif menggunakan metode suku bunga efektif yang dihitung dari selisih antara nilai pengakuan awal dan nilai jatuh temponya, dan dikurangi penurunan nilai.

- (ix) Pengukuran nilai wajar
Nilai wajar adalah harga yang akan diterima untuk menjual suatu aset atau harga yang akan dibayar untuk mengalihkan suatu liabilitas dalam transaksi teratur antara pelaku pasar pada tanggal pengukuran.

Pengukuran nilai wajar mengasumsikan bahwa transaksi untuk menjual aset atau mengalihkan liabilitas terjadi:

- di pasar utama untuk aset dan liabilitas tersebut; atau
- jika tidak terdapat pasar utama, di pasar yang paling menguntungkan untuk aset atau liabilitas tersebut.

Nilai wajar suatu aset atau liabilitas diukur menggunakan asumsi yang akan digunakan pelaku pasar ketika menentukan harga aset dan liabilitas tersebut dengan asumsi bahwa pelaku pasar bertindak dalam kepentingan ekonomi terbaiknya.

Pengukuran nilai wajar aset non-keuangan memperhitungkan kemampuan pelaku pasar untuk menghasilkan manfaat ekonomi dengan menggunakan aset dalam penggunaan tertinggi dan terbaiknya atau dengan menjualnya kepada pelaku pasar lain yang akan menggunakan aset tersebut dalam penggunaan tertinggi dan terbaiknya.

Bank dan entitas anak menggunakan teknik penilaian yang sesuai dalam keadaan dan dimana data yang memadai tersedia untuk mengukur nilai wajar, memaksimalkan penggunaan input yang dapat diobservasi yang relevan dan meminimalkan penggunaan input yang tidak dapat diobservasi.

Pada saat nilai wajar dari *unlisted equity instruments* tidak dapat ditentukan dengan andal, instrumen tersebut dinilai sebesar biaya perolehan dikurangi dengan penurunan nilai. Nilai wajar atas pinjaman yang diberikan dan piutang, serta liabilitas kepada bank dan nasabah ditentukan menggunakan nilai berdasarkan arus kas kontraktual, dengan mempertimbangkan kualitas kredit, likuiditas, dan biaya.

- (viii) *Amortized cost measurement*
The amortized cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortization using the effective interest rate method of any difference between the initial amount recognized and the maturity amount, minus any reduction for impairment.

- (ix) *Fair value measurement*
Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value measurement is based on the presumption that the transaction to sell an asset or paid to transfer a liability takes place either:

- *in the principal market for the assets and liabilities; or*
- *in the absence of a principal market, in the most advantageous market for the asset or liability.*

The fair value of an asset or a liability is measured using the assumptions that market participants would use when determining the price of the asset and liability assuming that market participants act in their own economic best interest.

A fair value measurement of non-financial assets considers a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to other market participants that would use the asset in its highest and best use.

The Bank and its subsidiaries use valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

In cases when the fair value of unlisted equity instruments cannot be determined reliably, the instruments are carried at cost less impairment value. The fair value for loans and receivables as well as liabilities to banks and customers are determined using a present value model on the basis of contractually agreed cash flows, taking into account credit quality, liquidity and costs.

Semua aset dan liabilitas dimana nilai wajar diukur atau diungkapkan dalam laporan keuangan konsolidasian dapat dikategorikan pada level hierarki nilai wajar, berdasarkan tingkatan input terendah yang signifikan atas pengukuran nilai wajar secara keseluruhan:

- Level 1: harga kuotasian (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik yang dapat diakses pada tanggal pengukuran;
- Level 2: input selain harga kuotasian yang termasuk dalam level 1 yang dapat diobservasi untuk aset dan liabilitas, baik secara langsung atau tidak langsung;
- Level 3: input yang tidak dapat diobservasi untuk aset dan liabilitas.

Untuk aset dan liabilitas yang diakui pada laporan keuangan konsolidasian secara berulang, Bank dan entitas anak menentukan apakah terjadi transfer antara level di dalam hierarki dengan cara mengevaluasi kategori (berdasarkan input level terendah yang signifikan dalam pengukuran nilai wajar) setiap akhir periode pelaporan.

Untuk tujuan pengungkapan nilai wajar, Bank dan entitas anak telah menentukan kelas aset dan liabilitas berdasarkan sifat, karakteristik, risiko aset dan liabilitas, dan level hierarki nilai wajar (Catatan 40).

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are classified within fair value hierarchy, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1: quoted (unadjusted) market prices in active markets for identical assets or liabilities accessible at the measurement date;
- Level 2: inputs other than quoted prices included in level 1 for the asset and liability, which is directly or indirectly observable;
- Level 3: unobservable inputs for the asset and liability.

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, Bank and its subsidiaries determine whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the fair value disclosures purposes, Bank and its subsidiaries has determined classes of assets and liabilities based on the nature, characteristics, risks of the asset and liability, and the level of the fair value hierarchy (Note 40).

j. Derivatives receivable and payable

All derivative instruments (including foreign currency transactions for funding and trading) are recorded in the statement of financial position at fair value. Fair value is determined based on market value using Reuters rate at reporting date or discounted cash flow method.

Derivatives receivables are presented for unrealized gains from derivatives contracts, net of allowance for impairment losses. Derivatives payables are presented for unrealized losses from derivatives contracts.

Gains or losses on derivatives contracts are presented in the consolidated financial statements based on its purpose on the transaction, as (1) a hedge of the fair value, (2) a cash flow hedge, (3) a hedge of a net investment in foreign operations and (4) trading instruments, as follows:

- *Gains or losses on derivatives contracts that are designated and qualify as hedging instruments in the fair value and the gains or losses on changes in fair value of assets and liabilities that are protected, recognized as a gain or loss may be offset in the same accounting period. Any difference representing hedge ineffectiveness is recognized as profit or loss for the current year;*
- *The effective portions of gains or losses on derivative contracts designated as cash flow hedge are reported as other comprehensive income. The ineffective portions of the hedge are reported as profit or loss for the current year;*
- *Gains or losses on derivative contracts designated as hedges of a net investment in a foreign operation are reported as other comprehensive income to the extent it is effective as a hedge;*
- *Gains or losses on derivative contracts not designated as a hedging instrument (or derivative contract that does not qualify as a hedging instrument) is recognized as profit or loss for the current year.*

k. Kredit yang diberikan

Kredit yang diberikan merupakan penyediaan uang atau tagihan yang dapat disamakan dengan itu, berdasarkan kesepakatan dengan pihak penerima kredit dan mewajibkan pihak penerima kredit untuk melunasi setelah jangka waktu tertentu dengan imbalan bunga.

Kredit yang diberikan pada awalnya diukur pada nilai wajar ditambah dengan biaya transaksi yang dapat diatribusikan secara langsung dan biaya tambahan untuk memperoleh aset keuangan tersebut. Setelah pengakuan awal diukur pada biaya perolehan diamortisasi menggunakan metode suku bunga efektif dikurangi dengan cadangan kerugian penurunan nilai.

Kredit yang diberikan diklasifikasikan sebagai biaya perolehan diamortisasi. Kredit yang diberikan dalam pinjaman sindikasi ataupun penerusan kredit dinyatakan sebesar pokok kredit sesuai dengan porsi risiko yang ditanggung oleh Bank dan entitas anak.

Kredit yang direstrukturisasi disajikan sebesar nilai yang lebih rendah antara nilai tercatat kredit pada tanggal restrukturisasi atau nilai tunai penerimaan kas masa depan setelah restrukturisasi. Kerugian akibat selisih antara nilai tercatat kredit pada tanggal restrukturisasi dengan nilai tunai penerimaan kas masa depan setelah restrukturisasi diakui dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian. Setelah restrukturisasi, semua penerimaan kas masa depan yang ditetapkan dalam persyaratan baru dicatat sebagai pengembalian pokok kredit yang diberikan dan pendapatan bunga sesuai dengan syarat-syarat restrukturisasi.

Kredit yang diberikan dihapusbukkan ketika tidak terdapat prospek yang realistis mengenai pengembalian kredit atau hubungan antara Bank dan entitas anak dengan debitur telah berakhir. Kredit yang tidak dapat dilunasi dihapusbukkan dengan mendebit cadangan kerugian penurunan nilai.

k. Loans

Loans represent the lending of money or equivalent receivables under contracts with borrowers, where the borrowers are required to repay their debts with interest after a specified period of time.

Loans are initially measured at fair value plus transaction cost that are directly attributable and additional cost to obtain the financial assets. Subsequently measured at their amortized cost using the effective interest rate method, net of allowance for impairment losses.

Loans are classified as amortized cost. Loans under syndication or channeling are stated at the principal amount equal to the risk portion assumed by the Bank and its subsidiaries.

Restructured loans are stated at the lower of carrying value on the date of restructuring or value of the future cash receipts after the restructuring. Losses resulting from the difference between the carrying value on the date of restructuring the present value of future cash receipts after the restructuring is recognized in the consolidated statement of profit or loss and other comprehensive income. After the restructuring, all future cash receipts specified by the new terms are recorded as a return of principal loans and interest income in accordance with the terms of the restructuring.

Loans are written off when there is no realistic prospect of collection or when the Bank and its subsidiaries relationship with the borrowers has ended. Loans that cannot be repaid are written-off by debiting the allowance for impairment losses.

I. Pembiayaan dan piutang syariah

Pembiayaan dan piutang berdasarkan prinsip syariah adalah penyediaan uang atau tagihan yang dapat disamakan dengan itu, yang timbul dari transaksi berdasarkan prinsip jual beli dan bagi hasil antara Bank dan entitas anak dengan pihak lain selama jangka waktu tertentu.

Piutang tersebut meliputi piutang murabahah, piutang istishna dan qardh, untuk pembiayaan meliputi pembiayaan mudharabah dan pembiayaan musyarakah.

Murabahah adalah akad jual beli antara nasabah dengan Bank dan entitas anak, dimana Bank dan entitas anak membiayai kebutuhan investasi dan modal kerja nasabah yang dijual dengan harga pokok ditambah dengan keuntungan yang diketahui dan disepakati bersama. Pembayaran atas pembiayaan ini dilakukan dengan cara mengangsur dalam jangka waktu yang ditentukan.

Piutang murabahah pada awalnya diukur pada nilai wajar ditambah dengan biaya transaksi yang dapat diatribusikan secara langsung dan merupakan biaya tambahan untuk memperoleh aset keuangan tersebut dan setelah pengakuan awal diukur pada biaya perolehan diamortisasi menggunakan metode margin efektif dikurangi dengan cadangan kerugian penurunan nilai.

Mudharabah merupakan pembiayaan kerja sama antara Bank dan entitas anak sebagai pemilik dana (*shahibul maal*) dengan nasabah sebagai pelaksana usaha (*mudharib*) selama jangka waktu tertentu. Pembagian hasil keuntungan dari proyek atau usaha tersebut ditentukan sesuai dengan nisbah (*pre-determined ratio*) yang telah disepakati bersama. Pada tanggal laporan posisi keuangan konsolidasian, pembiayaan mudharabah dinyatakan sebesar saldo pembiayaan dikurangi dengan saldo cadangan kerugian penurunan nilai yang dibentuk berdasarkan hasil revidu oleh manajemen terhadap kualitas pembiayaan yang ada.

Musyarakah adalah akad kerja sama yang terjadi diantara para pemilik modal (mitra musyarakah) untuk menggabungkan modal dan melakukan usaha secara bersama dalam suatu kemitraan dengan nisbah pembagian hasil sesuai dengan kesepakatan, sedangkan kerugian ditanggung secara proporsional sesuai dengan kontribusi modal.

Pada tanggal laporan posisi keuangan konsolidasian, pembiayaan musyarakah dinyatakan sebesar saldo pembiayaan dikurangi dengan saldo cadangan kerugian penurunan nilai yang dibentuk berdasarkan hasil revidu oleh manajemen terhadap kualitas pembiayaan yang ada.

I. Sharia financing and receivables

Sharia financing and receivables is receivables from providing funds or other similar form of receivables arising from transactions carried out based on sale or purchase arrangements and profit sharing between Bank and its subsidiaries and other parties for a certain period of time.

Such receivables consist of receivables arising from murabahah transactions, istishna transactions and qardh transactions, for financing consist of mudharabah financing and musyarakah financing.

Murabahah is a sale or purchase contract between the customer and Bank and its subsidiaries, whereby Bank and its subsidiaries finances the investment and working capital needs of the customer sold with a principal price plus a certain margin that is mutually informed and agreed upon. Repayment on this financing is made in installments within a specified period.

Murabahah receivables initially measured at fair value plus directly attributable transaction cost and is an additional cost to obtain the respective financial assets, and after the initial recognition murabahah receivables are measured at amortized cost using the effective margin method less any allowance for impairment losses.

Mudharabah represents scheme financing between Bank and its subsidiaries as the owner of the fund (*shahibul maal*) and the customer as the business executor (*mudharib*), during a certain period. Distribution of profit sharing on a project or other business activity is determined in accordance with the mutually agreed nisbah (*pre-determined ratio*). At consolidated statements of financial position date, mudharabah financing is stated at the outstanding financing balance less allowance for impairment losses which is provided based on the management's review on the financing quality.

Musyarakah is a partnership contract among fund owners (*musyarakah partners*) to contribute funds and conduct business on a joint basis through partnership with nisbah profit sharing based on a predetermined ratio, while loss is shouldered proportionally based on the capital contribution.

At consolidated statement of financial position date, musyarakah financing is stated at the outstanding balance of the financing less allowance for impairment losses based on the management's review on the financing quality.

m. Identifikasi dan pengukuran penurunan nilai atas aset keuangan

Bank dan entitas anak mengakui penyisihan kerugian kredit ekspektasian pada instrumen keuangan yang tidak diukur pada nilai wajar melalui laba rugi.

Tidak ada penyisihan kerugian kredit ekspektasian pada investasi instrumen ekuitas.

Bank dan entitas anak mengukur cadangan kerugian sejumlah kerugian kredit ekspektasian sepanjang umurnya, kecuali untuk hal berikut, diukur sejumlah kerugian kredit ekspektasian 12 bulan:

- i. Instrumen utang yang memiliki risiko kredit rendah pada tanggal pelaporan; dan
- ii. Instrumen keuangan lainnya yang risiko kreditnya tidak meningkat secara signifikan sejak pengakuan awal.

Bank dan entitas anak menganggap instrumen utang memiliki risiko kredit yang rendah ketika peringkat risiko kreditnya setara dengan definisi *investment grade* yang dipahami secara global.

Kerugian kredit ekspektasian 12 bulan adalah bagian dari kerugian kredit ekspektasian sepanjang umurnya yang merepresentasikan kerugian kredit ekspektasian yang timbul dari peristiwa gagal bayar instrumen keuangan yang mungkin terjadi dalam 12 bulan setelah tanggal pelaporan.

Istishna is a purchase agreement between an al-mustashni (buyer) and an al-shani (manufacturer also acting as the seller). Based on the contract, the buyer orders the manufacturer to make or to supply al-mashnu (goods ordered) according to the specifications required by the buyer and to sell them at an agreed price.

Istishna receivables are presented based on the outstanding billings to the final buyer less allowance for impairment losses. Deferred istishna margin is present as contra account of istishna receivable.

Qardh is the provision of funds or equivalent claims based on agreement between the borrower and the lender that requires the borrower to repay the debts after a certain period of time. Qardh are stated at outstanding balance less allowance for impairment losses based on the management's review on the financing quality.

Refer to note 2d for the accounting policies of financial assets and liabilities.

m. Identification and measurement of impairment for financial assets

The Bank and its subsidiaries recognize the allowance for expected credit losses on financial instruments that are not measured at fair value through profit or loss.

There is no allowance for expected credit losses on investment in equity instruments.

The Bank and its subsidiaries measure the allowance for losses for the lifetime of an expected credit losses, except for the following, which are measured according to 12 months expected credit losses:

- i. Debt instruments that have low credit risk at the reporting date; and*
- ii. Other financial instruments for which credit risk has not increased significantly since initial recognition.*

The Bank and its subsidiaries consider debt instruments to have low credit risk when the credit risk rating is at par with the globally understood definition of investment grade.

The 12-month expected credit loss is part of the expected credit loss throughout its lifetime that represents an expected credit loss arising from a default on financial instruments that might occur within 12 months after reporting date.

Pengukuran kerugian kredit ekspektasian

Kerugian kredit ekspektasian adalah estimasi probabilitas tertimbang dari kerugian kredit yang diukur sebagai berikut:

- i. aset keuangan yang tidak memburuk pada tanggal pelaporan, kerugian kredit ekspektasian diukur sebesar selisih antara nilai kini dari seluruh kekurangan kas (yaitu selisih antara arus kas yang terutang kepada Bank dan entitas anak sesuai dengan kontrak dan arus kas yang diperkirakan akan diterima oleh Bank dan entitas anak);
- ii. aset keuangan yang memburuk pada tanggal pelaporan, kerugian kredit ekspektasian diukur sebesar selisih antara jumlah tercatat bruto dan nilai kini arus kas masa depan yang diestimasi;
- iii. komitmen pinjaman yang belum ditarik, kerugian kredit ekspektasian diukur sebesar selisih antara nilai kini jumlah arus kas jika komitmen ditarik dan arus kas yang diperkirakan akan diterima oleh Bank dan entitas anak;
- iv. kontrak jaminan keuangan, kerugian kredit ekspektasian diukur sebesar selisih antara pembayaran yang diperkirakan untuk mengganti pemegang atas kerugian kredit yang terjadi dikurangi jumlah yang diperkirakan dapat dipulihkan.

Aset keuangan yang direstrukturisasi

Jika ketentuan aset keuangan dinegosiasikan ulang atau dimodifikasi atau aset keuangan yang ada diganti dengan yang baru karena kesulitan keuangan peminjam, maka dilakukan penilaian apakah aset keuangan yang ada harus dihentikan pengakuannya dan kerugian kredit ekspektasian diukur sebagai berikut:

- i. Jika restrukturisasi tidak mengakibatkan penghentian pengakuan aset yang ada, maka arus kas yang diperkirakan yang timbul dari aset keuangan yang dimodifikasi dimasukkan dalam perhitungan kekurangan kas dari aset yang ada;
- ii. Jika restrukturisasi akan menghasilkan penghentian pengakuan aset yang ada, maka nilai wajar aset baru diperlakukan sebagai arus kas akhir dari aset keuangan yang ada pada saat penghentian pengakuannya. Jumlah ini dimasukkan dalam perhitungan kekurangan kas dari aset keuangan yang ada yang didiskontokan dari tanggal penghentian pengakuan ke tanggal pelaporan menggunakan suku bunga efektif awal dari aset keuangan yang ada.

Measurement of expected credit losses

Expected credit loss is an estimate of the weighted probability of a credit loss measured as follows:

- i. financial assets that do not deteriorate at the reporting date, the expected credit loss is measured at the difference between the present value of all cash shortages (i.e. the difference between the cash flows owed to the Bank and its subsidiaries in accordance with the contract and the cash flows expected to be received by the Bank and its subsidiaries);
- ii. financial assets that deteriorate at the reporting date, the expected credit loss is measured at the difference between the gross carrying amount and the present value of estimated future cash flows;
- iii. for undisbursed loan commitments, expected credit losses are measured at the difference between the present value of the amount of cash flow if the commitments is withdrawn and the cash flow expected to be received by the Bank and its subsidiaries;
- iv. for financial guarantee contracts, expected credit losses are measured at the difference between the estimated payments to replace the holder for the credit losses incurred less the amount estimated to be recoverable.

Restructured financial assets

If the terms of the financial assets are renegotiated or modified or the existing financial assets are replaced with new ones due to the borrower's financial difficulties, an assessment is made whether recognition of existing financial assets must be derecognized and expected credit losses measured as follows:

- i. If the restructuring does not result in the termination of recognition of existing assets, then the estimated cash flows arising from the modified financial assets are included in the calculation of cash shortages of existing assets;
- ii. If the restructuring will result in a derecognition of the existing assets, the fair value of the new asset is treated as the final cash flow of the existing financial assets at the time of derecognition. This amount is included in the calculation of cash shortages from existing financial assets which are discounted from the date of derecognition to the reporting date using the initial effective interest rate of the existing financial assets.

Aset keuangan yang memburuk

Pada setiap tanggal pelaporan, Bank dan entitas anak menilai apakah aset keuangan yang dicatat pada biaya perolehan diamortisasi dan aset keuangan instrumen utang yang dicatat pada nilai wajar melalui penghasilan komprehensif lain mengalami penurunan nilai kredit (memburuk). Aset keuangan memburuk ketika satu atau lebih peristiwa yang memiliki dampak merugikan atas estimasi arus kas masa depan dari aset keuangan telah terjadi.

Bukti objektif bahwa aset keuangan mengalami penurunan nilai meliputi wanprestasi atau tunggakan pembayaran oleh debitur, restrukturisasi kredit atau tagihan oleh Bank dan entitas anak dengan persyaratan yang tidak mungkin diberikan jika debitur tidak mengalami kesulitan keuangan, indikasi bahwa debitur atau penerbit akan dinyatakan pailit, hilangnya pasar aktif dari aset keuangan akibat kesulitan keuangan, atau data yang dapat diobservasi lainnya yang terkait dengan kelompok aset keuangan, seperti memburuknya status pembayaran debitur atau penerbit dalam kelompok tersebut, atau kondisi ekonomi yang berkorelasi dengan wanprestasi atas aset dalam kelompok tersebut.

Aset keuangan yang dibeli atau yang berasal dari aset keuangan memburuk

Aset keuangan dikategorikan sebagai POCI apabila terdapat bukti objektif penurunan nilai pada saat pengakuan awal. Pada saat pengakuan awal, tidak ada penyisihan kerugian kredit yang diakui karena harga pembelian atau nilainya telah termasuk estimasi kerugian kredit sepanjang umurnya. Selanjutnya, perubahan kerugian kredit sepanjang umurnya, apakah positif atau negatif, diakui dalam laporan laba rugi sebagai bagian dari cadangan kerugian penurunan nilai.

Penyajian penyisihan kerugian kredit ekspektasian dalam laporan posisi keuangan konsolidasian

Penyisihan kerugian kredit ekspektasian disajikan dalam laporan posisi keuangan konsolidasian sebagai berikut:

- i. Aset keuangan yang diukur pada biaya perolehan diamortisasi, penyisihan kerugian kredit ekspektasian disajikan sebagai pengurang dari jumlah tercatat bruto aset;
- ii. Komitmen pinjaman dan kontrak jaminan keuangan, penyisihan kerugian kredit ekspektasian disajikan sebagai provisi;
- iii. Instrumen utang yang diukur pada nilai wajar melalui penghasilan komprehensif lain, penyisihan kerugian kredit ekspektasian tidak diakui dalam laporan posisi keuangan konsolidasian karena jumlah tercatat dari aset-aset ini adalah nilai wajarnya. Namun demikian penyisihan kerugian kredit ekspektasian diungkapkan dan diakui dalam penghasilan komprehensif lain.

Credit-impaired financial assets

At each reporting date, the Bank and its subsidiaries assesses whether the financial assets recorded at amortized cost and the financial assets of debt instruments which are recorded at fair value through other comprehensive income are credit impaired (worsening). Financial assets deteriorate when one or more events that have an adverse effect on the estimated future cash flows of the financial assets have occurred.

Objective evidence that financial assets are impaired can include default or payment arrears by a borrower, restructuring of a loan or receivable by the Bank and its subsidiaries on terms that the Bank and its subsidiaries would not otherwise consider, indications that a borrower or issuer will enter bankruptcy, the disappearance of an active market for a security due to financial difficulties, or other observable data relating to a Bank and its subsidiaries of assets, such as adverse changes in the payment status of borrowers or issuers in the Bank and its subsidiaries, or economic conditions that correlate with defaults in the Bank and its subsidiaries.

Purchased or originated credit impaired financial assets – POCI

Financial assets are categorized as POCI if there is objective evidence of impairment at initial recognition. At initial recognition, no allowance for credit losses is recognized because the purchase price or value has included lifetime estimated credit losses. Furthermore, changes in lifetime credit losses, whether positive or negative, are recognized in the statement of profit or loss as part of the allowance for impairment losses.

Presentation of allowance for expected credit losses in the consolidated statements of financial position

Allowance for expected credit losses is presented in the consolidated statement of financial positions as follows:

- i. Financial assets measured at amortized cost, allowance for expected credit losses is presented as a deduction from the gross carrying amount of the asset;
- ii. Loan commitments and financial guarantee contracts, allowance for expected credit losses is presented as a provision;
- iii. Debt instruments measured at fair value through other comprehensive income, allowance for expected credit losses are not recognized in the consolidated statement of financial position because the carrying amounts of these assets are at their fair values. However, allowance for expected credit losses is disclosed and recognized in other comprehensive income.

Penerimaan kembali atas aset keuangan yang telah dihapusbukukan

Ketika kredit yang diberikan tidak tertagih, pinjaman yang diberikan tersebut dihapusbuku dengan menjurnal balik cadangan kerugian penurunan nilai. Kredit yang diberikan tersebut dapat dihapus buku setelah semua prosedur yang diperlukan telah dilakukan dan jumlah kerugian telah ditentukan.

Penerimaan kembali atas aset keuangan yang telah dihapusbukukan pada tahun berjalan dikreditkan dengan menyesuaikan akun cadangan kerugian penurunan nilai. Penerimaan kembali atas aset keuangan yang telah dihapusbukukan pada tahun sebelumnya dicatat sebagai pendapatan operasional selain pendapatan bunga.

Bank dan entitas anak menggunakan nilai wajar agunan sebagai dasar arus kas masa datang apabila memenuhi salah satu kondisi berikut:

1. Kredit bersifat *collateral dependent*, yaitu jika pelunasan kredit hanya bersumber dari agunan;
2. Pengambilalihan agunan kemungkinan besar terjadi dan didukung dengan perjanjian legal pengikatan agunan.

Kerugian penurunan nilai atas aset keuangan yang dicatat pada biaya perolehan diamortisasi diukur sebesar selisih antara nilai tercatat aset keuangan dengan nilai kini estimasi arus kas masa datang yang didiskonto menggunakan suku bunga efektif awal dari aset keuangan tersebut. Jika kredit yang diberikan atau surat-surat berharga dimiliki hingga jatuh tempo memiliki suku bunga variabel, maka tingkat diskonto yang digunakan untuk mengukur setiap kerugian penurunan nilai adalah suku bunga efektif terkini.

Sebagai panduan praktis, Bank dan entitas anak dapat mengukur penurunan nilai berdasarkan nilai wajar instrumen dengan menggunakan harga pasar yang dapat diobservasi, dimana perhitungan nilai kini dari estimasi arus kas masa datang atas aset keuangan dengan agunan (*collateralized financial asset*) mencerminkan arus kas yang dapat dihasilkan dari pengambilalihan agunan dikurangi biaya-biaya untuk memperoleh dan menjual agunan, terlepas apakah pengambilalihan tersebut berpeluang terjadi atau tidak.

Kerugian penurunan nilai yang terjadi diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian dan dicatat pada akun "Cadangan kerugian penurunan nilai" sebagai pengurang terhadap aset keuangan yang dicatat pada biaya perolehan diamortisasi.

Pendapatan bunga atas aset keuangan yang mengalami penurunan nilai tetap diakui atas dasar suku bunga yang digunakan untuk mendiskonto arus kas masa datang dalam pengukuran kerugian penurunan nilai.

Recoveries of written-off financial assets

When a loan is uncollectible, it is written off against the related allowance for impairment loss. Such loans are written off after all the necessary procedures have been completed and the amount of the loss has been determined.

The recoveries of written-off financial assets in the current year are credited by adjusting the allowance for impairment losses accounts. Recoveries of written-off financial assets from previous years are recorded as operational income other than interest income.

The Bank and its subsidiaries use the fair value of collateral as the basis for the future cash flow if one of the following conditions is met:

1. *Loans are collateral dependent, i.e., if the source of loans repayment is only from collateral;*
2. *Foreclosure of collateral is most likely to occur and supported by legally binding collateral agreement.*

Impairment losses on financial assets carried at amortized cost are measured as the difference between the carrying amount of the financial assets and present value of estimated future cash flows discounted at the financial assets original effective interest rate. If loans or held-to-maturity marketable securities have variable interest rate, the discount rate used to measure loss on impairment is the current effective interest rate.

As a practical guidance, the Bank and its subsidiaries can measure the impairment based on the instrument's fair value by using observable market price, where the calculation of present value of estimated future cash flows on collateralized financial assets reflects the generated cash flow from the foreclosure of collateral net of costs to acquire and sell the collateral, regardless whether such acquisition occurs or not.

Impairment losses are recognized in the consolidated statement of profit or loss and other comprehensive income and reflected in an "Allowance for impairment losses" account as a deduction from financial assets carried at amortized cost.

Interest income on the impaired financial assets continues to be recognized using the rate of interest used to discount the future cash flow for the purpose of measuring the impairment loss.

Ketika peristiwa yang terjadi setelah tanggal laporan posisi keuangan konsolidasian menyebabkan jumlah kerugian penurunan nilai berkurang, kerugian penurunan nilai yang sebelumnya diakui harus dipulihkan dan pemulihan tersebut diakui dalam laba rugi pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

Untuk aset keuangan yang tersedia untuk dijual, pada setiap tanggal laporan posisi keuangan konsolidasian, Bank dan entitas anak mengevaluasi apakah terdapat bukti objektif bahwa aset keuangan atau kelompok aset keuangan mengalami penurunan nilai. Penurunan yang signifikan atau penurunan jangka panjang atas nilai wajar investasi dalam instrumen ekuitas di bawah biaya perolehannya merupakan bukti objektif terjadinya penurunan nilai dan menyebabkan pengakuan kerugian penurunan nilai. Kerugian penurunan nilai atas efek-efek yang tersedia untuk dijual diakui dengan mengeluarkan kerugian kumulatif yang telah diakui secara langsung dalam ekuitas ke dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

Jumlah kerugian kumulatif yang dikeluarkan dari ekuitas dan diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian merupakan selisih antara biaya perolehan (setelah dikurangi dengan nilai pelunasan pokok dan amortisasi) dengan nilai wajar kini, dikurangi kerugian penurunan nilai aset keuangan yang sebelumnya telah diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

When subsequent event causes the amount of impairment loss to decrease, the impairment loss is reversed through profit or loss in the consolidated statements of profit or loss and other comprehensive income.

For financial assets classified as available for sale, Bank and its subsidiaries assess on each consolidated statement of financial position reporting date whether there is objective evidence that a financial asset or a Bank and its subsidiaries of financial assets is impaired. In the case of equity instruments, a significant or prolonged decline in the fair value of the equity instruments below its cost is an objective evidence of impairment resulting in the recognition of an impairment loss. Impairment losses on available for sale marketable securities are recognized by transferring the cumulative loss that has been recognized directly in equity to the consolidated statement of profit or loss and other comprehensive income.

The cumulative loss that has been removed from equity and recognized in the consolidated statement of profit or loss and other comprehensive income is the difference between the acquisition cost (net of any principal repayment and amortization) and the current fair value, less any impairment loss previously recognized in the consolidated statement of profit or loss and other comprehensive income.

Impairment losses recognized in the consolidated statement of profit or loss and other comprehensive income on available for sale equity instruments should not be recovered through a reversal of a previously recognized impairment loss in the current year consolidated statement of profit or loss and other comprehensive income.

If in a subsequent period, the fair value of a fair value through other comprehensive income marketable securities increased and the increase can be objectively related to an event occurring after the impairment loss was recognized in the consolidated statement of profit or loss and other comprehensive income, the impairment loss is reversed, with the amount of reversal recognized in the year it occurred.

Tanah awalnya dinyatakan sebesar biaya perolehan dan tidak disusutkan. Setelah pengakuan awal, tanah diukur pada nilai wajar pada tanggal revaluasi dikurangi akumulasi rugi penurunan nilai setelah tanggal revaluasi. Penilaian terhadap tanah dilakukan oleh penilai yang memiliki kualifikasi profesional, dan dilakukan secara berkala untuk memastikan bahwa jumlah tercatat tanah tidak berbeda secara material dengan jumlah yang ditentukan dengan menggunakan nilai wajarnya pada akhir periode pelaporan.

Kenaikan nilai tercatat yang timbul dari revaluasi dicatat sebagai "Surplus Revaluasi Aset Tetap", dan disajikan dalam penghasilan komprehensif lain. Namun, kenaikan tersebut diakui dalam laba rugi hingga sebesar jumlah penurunan nilai aset yang sama akibat revaluasi yang pernah dilakukan sebelumnya dalam laba rugi. Penurunan nilai tercatat yang timbul dari revaluasi diakui dalam laba rugi.

Revaluasi akan dilakukan dengan keteraturan yang cukup reguler untuk memastikan bahwa jumlah tercatat tidak berbeda secara material dari jumlah yang ditentukan dengan menggunakan nilai wajar pada akhir periode pelaporan. Jika perubahan nilai wajar tidak berbeda secara signifikan, aset tersebut akan direvaluasi paling kurang setiap 3 (tiga) atau 5 (lima) tahun sekali.

Aset tetap yang diperoleh dalam pertukaran aset nonmoneter atau kombinasi aset moneter dan nonmoneter diukur dalam nilai wajar, kecuali:

- (i) transaksi pertukaran tidak memiliki substansi komersial, atau
- (ii) nilai wajar dari aset yang diterima dan diserahkan tidak dapat diukur secara andal.

Penyusutan aset dimulai pada saat aset tersebut siap untuk digunakan sesuai maksud penggunaannya dan dihitung dengan menggunakan metode garis lurus, berdasarkan taksiran masa manfaat ekonomis aset tetap yang bersangkutan, sebagai berikut:

	<u>Tahun/Years</u>	
Bangunan	20	Buildings
Kendaraan	4 - 8	Vehicles
Perlengkapan	4 - 8	Office equipment

Pada setiap akhir tahun buku, manajemen melakukan pengkajian ulang atas nilai residu, masa manfaat dan metode penyusutan dan disesuaikan secara prospektif, jika diperlukan.

Land is initially recognized at cost and not depreciated. Subsequent to initial recognition, land is measured at fair value at the revaluation date less any subsequent accumulated impairment losses. Valuation of land are performed by appraisers with professional qualification and is done in regular basis to ensure that the carrying amount does not differ materially from its fair value at the end of reporting period.

Increase in the carrying amount arising from revaluation is recorded in "Revaluation Surplus of Fixed Assets" and presented in other comprehensive income. However, the increase is recognized in profit or loss, up to the amount of impairment of the same assets due to revaluation previously recognised in profit or loss. A decrease in carrying value arising as a result of a revaluation should be recognised in profit or loss.

Revaluation is carried out with fairly regular regularity to ensure that the carrying amount does not differ materially from the amount determined using the fair value at the end of the reporting period. If the changes in fair value is insignificant, the asset will be revaluated at least between 3 (three) or 5 (five) years.

Fixed assets acquired in exchange for a non-monetary asset or for a combination of monetary and non-monetary assets are measured at fair values, unless:

- (i) the exchange transaction lacks commercial substance, or*
- (ii) the fair value of neither the assets received, nor the assets given up can be measured reliably.*

Depreciation of an asset starts when it is available for use and is computed using the straight-line method, based on the estimated useful lives of the assets, as follows:

At the year end, management conducts a re-assessment of the residual value, useful life and depreciation method and adjusted prospectively, if needed.

Aset hak guna dan liabilitas sewa

PSAK 73 memperkenalkan model akuntansi penyewa tunggal dan mensyaratkan penyewa untuk mengakui aset dan liabilitas untuk semua sewa dengan pengecualian sewa jangka pendek dan aset dengan nilai rendah. Penyewa diharuskan untuk mengakui aset hak-guna yang mewakili haknya untuk menggunakan aset sewaan dan liabilitas sewa yang mewakili kewajibannya untuk melakukan pembayaran sewa. PSAK 73 secara substansial masih menggunakan persyaratan akuntansi atas pesewa (*lessor*) sesuai PSAK 30 "Sewa". Oleh karena itu, penyewa masih akan menggunakan klasifikasi sewa dalam sewa operasi atau pembiayaan, dan perlakuan atas kedua tipe sewa tersebut.

Dampak penerapan PSAK 73 adalah Bank dan entitas anak sebagai penyewa atas kontrak sewa properti dan kendaraan. Bank dan entitas anak telah memilih *simplified approach* dalam melakukan transisi dan tidak melakukan penyajian kembali untuk informasi komparatif. Dengan demikian, informasi komparatif tetap dilaporkan sesuai dengan PSAK 30, "Sewa".

Kebijakan sewa

Bank dan entitas anak mengakui liabilitas sewa, sebagai pembayaran sewa yang tersisa termasuk atas opsi perpanjangan dimana perpanjangan hampir dapat dipastikan, didiskontokan menggunakan tingkat bunga pinjaman inkremental pada tanggal penerapan awal. Sedangkan aset hak guna mencakup jumlah liabilitas sewa yang diakui, biaya langsung awal yang dibayarkan, biaya pemulihan dan pembayaran sewa yang dilakukan pada atau sebelum tanggal mulai sewa, dikurangi insentif sewa yang diterima. Aset hak guna disusutkan dengan metode garis lurus selama jangka waktu yang lebih pendek antara masa sewa dengan estimasi masa manfaat aset.

The carrying amount of an item of fixed assets is derecognized upon disposal or when no future economic benefits are expected from its use or disposal.

Any gain or loss arising from the derecognition of the asset is directly included in the consolidated statement of profit or loss and other comprehensive income when the item is derecognized.

Repairs and maintenance is charged to the profit or loss as incurred. The cost of major renovation and restoration is capitalized to the carrying amount of the related fixed assets when it is probable that future economic benefits in excess of the originally assessed standard of performance of the existing asset and is depreciated over the remaining useful life of the related asset.

Right-of-use assets and lease liabilities

SFAS 73 introduces a single lessee accounting model and requires a lessee to recognise assets and liabilities for all leases with the exemptions of short-term leases and the underlying asset is of low value. A lessee is required to recognize a right-of-use asset representing its right to use the underlying leased asset and a lease liability representing its obligation to make lease payments. SFAS 73 substantially carries forward the lessor accounting requirements in SFAS 30 "Leases". Accordingly, a lessor continues to classify its leases as operating leases or finance leases, and to account for those two types of leases differently.

The impact of SFAS 73 at the Bank and its subsidiaries is where the Bank and its subsidiaries is a lessee in property and vehicle lease contracts. The Bank and its subsidiaries has elected the simplified approach of transition and did not restate comparative information. Therefore, the comparative information continues to be reported under SFAS 30, "Leases".

Leases policy

The Bank and its subsidiaries recognised a lease liability, being the remaining lease payments including extensions options where renewal is reasonably certain, discounted using the incremental borrowing rate at the date of initial application. Meanwhile, rights of use assets include the amount of lease liabilities recognized, initial direct costs paid, recovery costs and lease payments made on or before the start date of the lease, less rental incentives received. Rights of use assets are depreciated using the straight-line method over the shorter period between the lease term and the estimated useful life of the asset.

Beban keuangan dicatat dalam laporan laba rugi konsolidasian. Aset sewa (disajikan sebagai bagian aset tetap) disusutkan selama jangka waktu yang lebih pendek antara umur manfaat aset sewa dan periode masa sewa, jika tidak ada kepastian yang memadai bahwa Bank dan entitas anak akan mendapatkan hak kepemilikan pada akhir masa sewa.

Aset dalam penyelesaian

Aset tetap dalam penyelesaian dicatat sebesar biaya perolehan, yang mencakup kapitalisasi beban pinjaman dan biaya-biaya lainnya yang terjadi sehubungan dengan pendanaan aset tetap dalam penyelesaian tersebut. Akumulasi biaya perolehan akan direklasifikasi ke akun "Aset Tetap" yang bersangkutan pada saat aset tetap tersebut telah selesai dikerjakan dan siap untuk digunakan. Aset tetap dalam penyelesaian tidak disusutkan karena belum tersedia untuk digunakan.

Biaya pengurusan legal hak atas tanah dalam bentuk Hak Guna Usaha ("HGU"), Hak Guna Bangunan ("HGB") dan Hak Pakai ("HP") ketika tanah diperoleh pertama kali diakui sebagai bagian dari biaya perolehan tanah pada akun "Aset Tetap". Biaya pengurusan perpanjangan atau pembaruan legal hak atas tanah diakui sebagai aset tidak berwujud dan diamortisasi sepanjang umur hak hukum atau umur ekonomi tanah, mana yang lebih pendek.

q. Penurunan nilai aset non-keuangan

Pada setiap akhir tahun periode pelaporan, Bank dan entitas anak menilai apakah terdapat indikasi suatu aset mengalami penurunan nilai. Jika terdapat indikasi tersebut, maka Bank dan entitas anak akan membuat estimasi atas jumlah terpulihkan aset tersebut.

Jumlah terpulihkan yang ditentukan untuk aset individual adalah jumlah yang lebih tinggi antara nilai wajar aset atau Unit Penghasil Kas (UPK) dikurangi biaya untuk menjual dan nilai pakainya, kecuali aset tersebut tidak menghasilkan arus kas masuk yang sebagian besar independen dari aset atau kelompok aset lain.

Jika nilai tercatat aset lebih besar daripada nilai terpulihkannya, maka aset tersebut dianggap mengalami penurunan nilai dan nilai tercatat aset diturunkan menjadi sebesar nilai terpulihkannya. Rugi penurunan nilai dari operasi yang berkelanjutan diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian sebagai "rugi penurunan nilai".

Finance expense is recorded in the consolidated statement of profit or loss. Leased assets (presented under fixed assets) are depreciated over the shorter of the estimated useful life of the assets and the lease term, if there is no reasonable certainty that Bank and its subsidiaries will obtain ownership by the end of the lease term.

Construction in progress

Constructions in progress are stated at cost, including capitalized borrowing costs and other charges incurred in connection with the financing of construction in progress. The accumulated costs will be reclassified to the appropriate "Premises and Equipment" account when the construction is completed and available for intended use. Construction in progress are not depreciated as these are not yet available for use.

The legal cost of land rights in the form of Business Usage Rights ("Hak Guna Usaha" or "HGU"), Building Usage Right ("Hak Guna Bangunan" or "HGB") and Usage Rights ("Hak Pakai" or "HP") when the land was initially acquired are recognized as part of the cost of the land under the "Fixed Assets". The extension or the legal renewal costs of land rights were recognized as intangible assets and were amortized over the shorter of the rights' legal life or land's economic life.

q. Impairment of non-financial assets

At the end of each reporting year the Bank and its subsidiaries assesses at each annual reporting period whether there is an indication that an asset may be impaired. If any such indication exists, Bank and its subsidiaries makes an estimate of the asset's recoverable amount.

The recoverable amount determined for an individual asset is the higher of an asset's fair value or Cash Generating Unit (CGU) less costs to sell and its value in use, unless the asset does not generate cash inflows that are largely independent of those from other assets or Bank and its subsidiaries of assets.

Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. Impairment losses of continuing operations are recognized in the consolidated statement of profit or loss and other comprehensive income as "impairment losses".

Simpanan dari bank lain diklasifikasikan sebagai liabilitas keuangan lainnya dan diukur pada biaya perolehan diamortisasi menggunakan suku bunga efektif, kecuali simpanan yang didasarkan pada prinsip perbankan syariah dan dana syirkah temporer yang dinyatakan sebesar kewajiban BJBS kepada bank lain. Biaya tambahan yang dapat diatribusikan secara langsung kepada perolehan simpanan nasabah, dikurangkan dari jumlah simpanan yang diterima.

Simpanan dari bank lain terdiri dari liabilitas terhadap bank lain dalam bentuk giro, tabungan, *interbank call money*, *deposit on call* dan deposito berjangka.

Di dalam simpanan dari bank lain termasuk simpanan syariah dalam bentuk giro wadiah.

Simpanan dari bank lain diklasifikasikan sebagai liabilitas keuangan dan diukur pada biaya perolehan diamortisasi menggunakan suku bunga efektif kecuali simpanan syariah yang dinyatakan sebesar nilai liabilitas Bank dan entitas anak kepada nasabah.

Biaya tambahan yang dapat diatribusikan secara langsung dengan perolehan simpanan dari bank lain dikurangkan dari total simpanan yang diterima.

Lihat catatan 2d untuk kebijakan akuntansi atas aset dan liabilitas keuangan.

w. Efek utang yang diterbitkan

Surat berharga yang diterbitkan Bank adalah obligasi. Surat berharga yang diterbitkan diakui sebesar nilai wajar pada awalnya dan selanjutnya diukur sebesar biaya perolehan diamortisasi dengan menggunakan metode suku bunga efektif. Biaya perolehan diamortisasi dihitung dengan memperhitungkan adanya diskonto atau premi terkait dengan pengakuan awal dan biaya transaksi yang tidak terpisah dari suku bunga efektif.

Lihat Catatan 2d untuk kebijakan akuntansi atas aset dan liabilitas keuangan.

x. Pinjaman yang diterima

Pinjaman yang diterima merupakan dana yang diterima oleh Bank dan entitas anak dari Bank Indonesia, pemerintah dan lembaga pembiayaan lain dengan kewajiban pembayaran berdasarkan perjanjian pinjaman.

v. Deposits from other banks

Deposits from other banks are classified as other financial liabilities and measured at amortized cost using the effective interest method, except for sharia deposits and temporary syirkah fund which are stated at the BJBS' liability to the other banks. Incremental costs that can be attributed directly to the acquisition of deposits from customers are deducted from total deposits received.

Deposits from other banks represent liabilities to other banks, in the form of current accounts, savings, interbank call money, deposit on call and time deposits.

Deposits from other banks include sharia deposits in the form of wadiah current accounts.

Deposits from other banks are classified as financial liabilities and measured at amortized cost using the effective interest rate except for sharia deposits which are stated at the Bank and its subsidiaries liability amount to the customer.

Incremental costs that can be attributed directly to the acquisition of deposits from other banks are deducted from the total deposits received.

Refer to note 2d for the accounting policies of financial assets and liabilities.

w. Debt securities issued

Securities issued by Bank consist of bonds. The securities issued are recognized initially at fair value and subsequently measured at amortized cost using the effective interest rate method. Amortized cost is calculated by taking into account any discount or premium related to the initial recognition and transaction costs that are an integral part of the effective interest rate.

Refer to Note 2d for the accounting policies of financial assets and liabilities.

x. Borrowings

Borrowings are funds received by the Bank and its subsidiaries from Bank Indonesia, the Government and other financing institutions with payment obligation based on borrowing agreements.

Pinjaman yang diterima diakui sebesar nilai wajar pada awalnya dan selanjutnya diukur sebesar biaya perolehan diamortisasi dengan menggunakan metode suku bunga efektif. Biaya perolehan diamortisasi dihitung dengan memperhitungkan adanya diskonto atau premi terkait dengan pengakuan awal dan biaya transaksi yang tidak terpisah dari suku bunga efektif.

Lihat catatan 2d untuk kebijakan akuntansi atas aset dan liabilitas keuangan.

y. Pendapatan bunga, beban bunga dan bagi hasil syariah

Konvensional

Pendapatan dan beban bunga diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian dengan menggunakan metode suku bunga efektif.

Suku bunga efektif adalah suku bunga yang secara tepat mendiskontokan estimasi pembayaran atau penerimaan kas di masa datang selama perkiraan umur dari aset keuangan atau liabilitas keuangan (atau, jika lebih tepat, digunakan periode yang lebih singkat) untuk memperoleh nilai tercatat bersih dari aset keuangan atau liabilitas keuangan.

Pada saat menghitung suku bunga efektif, Bank dan entitas anak mengestimasi arus kas di masa datang dengan mempertimbangkan seluruh persyaratan kontraktual dalam instrumen keuangan tersebut, tetapi tidak mempertimbangkan kerugian kredit di masa mendatang.

Perhitungan ini mencakup seluruh komisi, provisi dan bentuk lain yang diterima oleh para pihak dalam kontrak yang merupakan bagian tak terpisahkan dari suku bunga efektif, biaya transaksi, dan seluruh premi atau diskon lainnya.

Jika aset keuangan atau kelompok aset keuangan serupa telah diturunkan nilainya sebagai akibat kerugian penurunan nilai, maka pendapatan bunga setelahnya diakui berdasarkan suku bunga yang digunakan untuk mendiskonto arus kas masa datang dalam menghitung kerugian penurunan nilai.

Syariah

Pendapatan operasi syariah utama terdiri dari pendapatan dari transaksi murabahah dan istishna, pendapatan bagi hasil dari pembiayaan mudharabah dan musyarakah, pendapatan dari transaksi *ijarah muntahiyah bittamlik* dan pendapatan lainnya.

Borrowings are recognized initially at fair value and subsequently measured at amortized cost using the effective interest rate method. Amortized cost is calculated by taking into account any discount or premium related to the initial recognition and transaction costs that are an integral part of the effective interest rate.

Refer to note 2d for the accounting policies of financial assets and liabilities.

y. Interest income, interest expense and sharia profit sharing

Conventional

Interest income and expenses are recognized in the consolidated statement of profit or loss and other comprehensive income using the effective interest method.

The effective interest rate is the rate that exactly discounts the estimated future cash payments or receipts through the expected life of the financial assets or liabilities (or, where appropriate, a shorter period) to the net carrying amount of the financial asset or financial liability.

When calculating the effective interest rate, Bank and its subsidiaries estimates future cash flows considering all contractual terms of the financial instruments except future credit losses.

This calculation includes all commissions, provision fees and other forms received by the parties in the contract that are inseparable from the effective interest rate, transaction costs and all other premiums or discounts.

If a financial asset or group of similar financial assets has been impaired as a result of an impairment loss, the subsequent interest income is recognized based on the interest rate used to discount future cash flows in calculating the impairment loss.

Sharia

*The main sharia operating income consists of income from murabahah and istishna transactions, income from revenue sharing of mudharabah and musyarakah financing, income from *ijarah muntahiyah bittamlik* and other income.*

Pendapatan dari transaksi ijarah murabahah dan istishna diakui dengan menggunakan metode akrual. Pendapatan bagi hasil dari pembiayaan mudharabah dan musyarakah diakui dalam periode terjadinya hak bagi hasil. Beban berdasarkan prinsip syariah terdiri dari beban bagi hasil mudharabah dan beban bonus wadiah.

Pendapatan atas piutang murabahah menggunakan metode setara tingkat imbal hasil efektif (margin efektif).

Margin efektif adalah margin yang secara tepat mendiskontokan estimasi pembayaran atau penerimaan kas di masa datang selama perkiraan umur dari piutang murabahah. Pada saat menghitung margin efektif, BJBS mengestimasi arus kas di masa datang dengan mempertimbangkan seluruh persyaratan kontraktual dalam instrumen keuangan tersebut, tetapi tidak mempertimbangkan kerugian piutang di masa mendatang.

Perhitungan ini mencakup seluruh komisi, provisi dan bentuk lain yang diterima oleh para pihak dalam kontrak yang merupakan bagian tak terpisahkan dari margin efektif, biaya transaksi, dan seluruh premi atau diskon lainnya.

z. Pendapatan provisi dan komisi

Pendapatan provisi dan komisi yang berkaitan langsung dengan kegiatan pinjaman, atau pendapatan provisi dan komisi yang berhubungan dengan jangka waktu tertentu, diamortisasi sesuai dengan jangka waktu kontrak menggunakan metode suku bunga efektif dan diklasifikasikan sebagai bagian dari pendapatan bunga pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

Pendapatan provisi dan komisi yang tidak berkaitan dengan kegiatan pemberian kredit atau suatu jangka waktu dan/atau terkait dengan pemberian suatu jasa, diakui sebagai pendapatan pada saat terjadinya transaksi dan dicatat pada akun pendapatan operasional lainnya.

aa. Sewa operasi

Kontrak sewa yang tidak mengalihkan secara substansial seluruh risiko dan manfaat kepemilikan aset tetap berada di tangan perusahaan sewamenyewa (*lessor*), maka sewa tersebut diklasifikasikan sebagai sewa operasi. Pembayaran sewa operasi dibebankan ke laporan laba rugi dan penghasilan komprehensif lain konsolidasian menggunakan metode garis lurus selama masa sewa.

Income from ijarah murabahah and istishna revenue sharing is recognized using the accrual method. Income from mudharabah and musyarakah financing are recognized in the period in which the revenue sharing rights occur. Expenses based on Sharia principles consist of mudharabah profit sharing expense and wadiah bonus expense.

Income from murabahah receivables using the effective rate of return method (effective margin).

Effective margin is the margin that precisely discounts the estimated future cash payments or receipts through the expected life of the murabahah receivables. When calculating the effective margin, BJBS estimates the future cash flows considering all contractual terms of the financial instrument, but does not consider the loss of receivables in the future.

This calculation includes all commissions, provision fees and other forms accepted by the parties in the contract that are an inseparable part of the effective margin, transaction costs and all other premiums or discounts.

z. Fees and commission

Fees and commissions directly related to lending activities, or fee and commission which relates to a specific period, is amortized over the term of the contract using the effective interest method and classified as part of interest income in the consolidated statement of profit or loss and other comprehensive income.

Fees and commissions that are not related to the lending activity or a period of time and/or associated with the service provided, are recognized as revenue at the time of the transaction and recorded under other operating income.

aa. Operating lease

Leases, which do not transfer substantially all the risks and rewards of ownership are retained by the lessor, are classified as operating leases. Payments made under operating leases are charged to the consolidated statement of profit or loss and other comprehensive income on a straight-line method over the period of the lease.

bb. Pajak penghasilan

Beban pajak tahun berjalan ditetapkan berdasarkan taksiran penghasilan kena pajak tahun berjalan. Aset dan liabilitas pajak tangguhan diakui atas perbedaan temporer aset dan liabilitas antara pelaporan komersial dan pajak pada setiap tanggal pelaporan.

Aset pajak tangguhan diakui menggunakan metode posisi keuangan untuk seluruh perbedaan temporer yang boleh dikurangkan dan saldo rugi fiskal yang belum dikompensasikan, sepanjang besar kemungkinan perbedaan temporer yang boleh dikurangkan dan saldo rugi fiskal yang belum digunakan tersebut dapat dimanfaatkan untuk mengurangi laba fiskal pada masa yang akan datang.

Jumlah tercatat aset pajak tangguhan ditelaah pada setiap tanggal neraca dan nilai tercatat aset pajak tangguhan tersebut diturunkan apabila tidak lagi terdapat kemungkinan besar bahwa laba fiskal yang memadai akan tersedia untuk mengkompensasi sebagian atau semua manfaat aset pajak tangguhan.

Aset dan kewajiban pajak tangguhan diukur berdasarkan tarif pajak yang akan berlaku pada tahun saat aset direalisasikan atau liabilitas diselesaikan berdasarkan peraturan perpajakan yang berlaku atau yang telah secara substantif telah diberlakukan pada tanggal laporan posisi keuangan konsolidasian.

Pengaruh pajak terkait dengan penyisihan untuk dan/atau pembalikan seluruh perbedaan temporer selama tahun berjalan, termasuk pengaruh perubahan tarif pajak, diakui sebagai "Manfaat/(Beban) Pajak Penghasilan, Tangguhan" dan termasuk dalam laba atau rugi neto tahun berjalan, kecuali untuk transaksi-transaksi yang sebelumnya telah langsung dibebankan atau dikreditkan ke ekuitas.

Perubahan terhadap liabilitas pajak diakui pada saat surat ketetapan pajak diterima, atau apabila diajukan keberatan dan atau banding oleh Bank dan entitas anak, pada saat telah ada keputusan atas banding dan atau keberatan tersebut.

Untuk setiap entitas yang dikonsolidasi, pengaruh pajak atas perbedaan temporer dan akumulasi rugi pajak, yang masing-masing dapat berupa aset atau liabilitas, disajikan dalam jumlah neto untuk masing-masing entitas tersebut.

bb. Income tax

Current tax expense is provided based on the estimated taxable income for the current year. Deferred tax assets and liabilities are recognized for temporary differences between the financial and the tax bases of assets and liabilities at each reporting date.

Deferred tax assets are recognized, using the statement of financial position method, for all deductible temporary differences and carry forward of unused tax losses to the extent that it is probable that future taxable profits will be available against which the deductible temporary differences and carry forward of unused tax losses can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to compensate all or part of the benefit of the deferred tax assets.

Deferred tax assets and liabilities are measured at the tax rates that are expected to applied to the year when the asset is realized or the liability is settled based on tax laws that have been enacted or substantively enacted as of the consolidated statement financial position date.

The related tax effects of the provisions for and/or reversals of all temporary differences during the year, including the effect of change in tax rates, are recognized as "Income Tax Benefit (Expense), Deferred" and included in the determination of net profit or loss for the year, except to the extent that they relate to items previously charged or credited to equity.

Amendment to tax obligation is recorded when an assessment letter is received or, if objected to or appealed against by the Bank and its subsidiaries, when the result of such appeal or objection is determined.

For each of the consolidated entity, the tax effects on temporary differences and tax loss carry forward, which can individually be either asset or liability, are shown at the applicable net amounts.

cc. Imbalan kerja

Bank dan entitas anak menerapkan PSAK 24 (Revisi 2018), "Imbalan Kerja".

Imbalan kerja jangka pendek

Imbalan kerja jangka pendek seperti upah, iuran jaminan sosial, cuti jangka pendek, bonus dan imbalan non-moneter lainnya diakui selama periode jasa diberikan. Imbalan kerja jangka pendek dihitung sebesar jumlah yang tidak didiskontokan.

Program pensiun iuran pasti

Berdasarkan berita acara No. 0067/HCA-SKE/BA/2022 tanggal 8 Juli 2022 dilakukan pengalihan pengelolaan dana THT dari YKP Bank BJB ke DPLK Bank BJB dimana merubah program pensiun dari program pensiun manfaat pasti menjadi program pensiun iuran pasti.

Iuran kepada dana pensiun sebesar persentase tertentu gaji pegawai yang menjadi peserta program pensiun iuran pasti Bank dan entitas anak, dicadangkan dan diakui sebagai biaya ketika jasa telah diberikan oleh pegawai-pegawai tersebut. Pembayaran dikurangkan dari utang iuran. Iuran terutang dihitung berdasarkan jumlah yang tidak didiskontokan.

Program imbalan pasti dan imbalan kerja jangka panjang lainnya

Imbalan pasca-kerja dicadangkan dan diakui sebagai biaya ketika jasa telah diberikan oleh pegawai yang menjadi peserta program pensiun Bank dan entitas anak. Bank harus mencadangkan jumlah minimal imbalan pensiun sesuai dengan Undang-Undang No. 11/2020 tentang Cipta Kerja ("UUCK") sebagaimana telah diamendemen dengan Perpu No.2/2022 dan UU No.6/2023 atau Perjanjian Kerja Bersama ("PKB") atau Peraturan Perusahaan ("PP"), mana yang lebih tinggi. Karena UUCK atau PKB atau PP menentukan rumus tertentu untuk menghitung jumlah minimal imbalan pensiun, pada dasarnya, program pensiun berdasarkan UUCK atau PKB atau PP adalah program imbalan pasti.

Imbalan pasca-kerja dan imbalan kerja jangka panjang lainnya secara aktuaris ditentukan berdasarkan metode *Projected Unit Credit*.

Pengukuran kembali atas liabilitas (aset) imbalan pasti neto, yang diakui sebagai penghasilan komprehensif lain, terdiri atas:

- (i) Keuntungan dan kerugian aktuarial;

cc. Employee benefits

Bank and its subsidiaries apply SFAS 24 (Revised 2018), "Employee Benefit".

Short-term employee benefits

Short-term employee benefits such as wages, social security contributions, short-term compensated leaves, bonuses and other non-monetary benefits are recognized during the period when services have been rendered. Short-term employee benefits are measured using undiscounted amounts.

Defined contribution plan

Based on official report No. 0067/HCA-SKE/BA/2022 dated July 8, 2022, there has been a transfer of THT fund management from YKP Bank BJB to DPLK Bank BJB, which transformed the retirement program from defined benefit plan to defined contribution plan.

Contribution payable to a pension fund equivalent to a certain percentage of salaries for qualified employees under the Bank and its subsidiaries' defined contribution plan is accrued and recognized as expense when services have been rendered by qualified employees. Actual payments are deducted from the contribution payable. Contribution payable is measured using undiscounted amounts.

Defined benefit plan and other long-term employee benefits

The post-employment benefits are accrued and recognized as expense when services have been rendered by qualified Bank and its subsidiaries employees. The Bank is required to provide a minimum amount of pension benefit in accordance with Law No. 11/2020 on Job Creation ("JCL") as amended by Perpu No.2/2022 and Law No.6/2023 or the Bank's Collective Labour Agreement (the "CLA") or Company Regulation ("CR"), whichever is higher. Since the JCL or the CLA or the CR sets the formula for determining the minimum amount of benefits, in substance pension plans under the JCL or the CLA or the CR represent defined benefit plans.

The post-employment benefits and other long-term employee benefits are actuarially determined using the *Projected Unit Credit Method*.

Remeasurement of net defined benefit liabilities (assets), which is recognized as other comprehensive income, consist of:

- (i) Actuarial gains and losses;

Pengukuran kembali atas liabilitas (aset) imbalan pasti neto, yang diakui sebagai penghasilan komprehensif lain tidak direklasifikasi ke laba rugi pada periode berikutnya.

Untuk imbalan kerja jangka panjang lain atas biaya jasa kini, biaya bunga neto atas liabilitas (aset) imbalan pasti neto, dan pengukuran kembali liabilitas (aset) imbalan pasti neto langsung diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian periode berjalan.

Biaya jasa lalu diakui sebagai beban pada tanggal yang lebih awal antara ketika amandemen atau kurtailmen program terjadi, dan ketika biaya restrukturisasi atau pesangon diakui, sehingga biaya jasa lalu yang belum *vested* tidak lagi dapat ditangguhkan dan diakui selama periode *vesting* masa depan.

dd. Laba per saham dasar

Labanya per saham dasar dihitung dengan membagi laba tahun berjalan yang dapat diatribusikan kepada pemilik entitas induk dengan rata-rata tertimbang jumlah saham biasa yang beredar selama tahun berjalan.

ee. Transaksi dengan pihak-pihak berelasi

Bank melakukan transaksi dengan pihak berelasi. Sesuai dengan PSAK 7 (revisi 2015) tentang "Pengungkapan Pihak-Pihak Berelasi"

Pihak-pihak berelasi adalah orang atau entitas yang terkait dengan entitas yang menyiapkan laporan keuangannya (dalam Pernyataan ini dirujuk sebagai "entitas pelapor").

- a) Orang atau anggota keluarga dekatnya mempunyai relasi dengan entitas pelapor jika orang tersebut:
 - 1. memiliki pengendalian atau pengendalian bersama atas entitas pelapor;
 - 2. memiliki pengaruh signifikan atas entitas pelapor; atau

For other long-term employee benefits over the current service cost, net interest on net defined benefit liabilities (assets), and the remeasurement of net defined benefit liability (asset) obligations are recognized immediately in the current consolidated statement of profit or loss and other comprehensive income.

All past service costs are recognised at the earlier of when the amendment or curtailment occurs, and when the related restructuring or termination costs are recognized, as a result, unvested past service cost can no longer be deferred and recognised over the future vesting period.

dd. Basic earnings per share

Basic earnings per share amounts are computed by dividing income for the year attributable to equity holders of the parent entity by the weighted average number of shares outstanding during the year.

ee. Transactions with related parties

The Bank has transactions with related parties. In accordance with SFAS 7 (revisi 2015) regarding "Related Party Disclosure".

A related party is a person or entity that is related to the entity that is preparing its financial statements (in this Standard referred to as the 'reporting entity').

- a) A person or a close member of that person's family is related to a reporting entity if that person:
 - 1. has control or joint control of the reporting entity;
 - 2. has significant influence over the reporting entity; or
 - 3. is a member of the key management personnel of the reporting entity or of a parent of the reporting entity.
- b) An entity is related to the reporting entity if any of the following conditions applies:

gg. Informasi segmen usaha

Segmen adalah bagian yang dapat dibedakan dari kelompok usaha yang terlibat baik dalam menyediakan produk tertentu (segmen usaha), maupun dalam menyediakan produk dalam lingkungan ekonomi tertentu (segmen geografis), yang memiliki risiko dan imbalan yang berbeda dengan segmen lainnya.

Pendapatan, beban, hasil, aset dan liabilitas segmen mencakup item-item yang dapat diatribusikan langsung kepada suatu segmen serta hal-hal yang dapat dialokasikan dengan dasar yang sesuai kepada segmen tersebut. Item-item segmen ditentukan sebelum saldo dan transaksi antar kelompok usaha, dieliminasi sebagai bagian dari proses konsolidasi.

Bank dan entitas anak menyajikan segmen usaha berdasarkan laporan internal konsolidasian yang disajikan kepada pengambil keputusan operasional yaitu Direksi.

Bank dan entitas anak telah mengidentifikasi dan mengungkapkan informasi keuangan berdasarkan kegiatan bisnis utama (segmen usaha) yang terbagi atas konvensional dan syariah, juga berdasarkan segmen geografis.

Segmen geografis meliputi penyediaan barang maupun jasa di dalam lingkungan ekonomi tertentu yang memiliki risiko serta tingkat pengembalian yang berbeda dengan segmen operasi lainnya yang berada dalam lingkungan ekonomi lain.

hh. Biaya emisi penerbitan saham

Biaya-biaya emisi yang terjadi sehubungan dengan penawaran saham kepada masyarakat (termasuk penerbitan hak memesan efek terlebih dahulu) dikurangkan langsung dari hasil emisi dan disajikan sebagai pengurang pada akun Tambahan Modal Disetor, sebagai bagian dari Ekuitas pada laporan posisi keuangan konsolidasian.

ii. Modal saham

Modal saham diukur pada nilai nominal untuk semua saham yang diterbitkan.

gg. Business segment information

A segment is a distinguishable component of the business unit that is engaged either in providing certain products (business segment), or in providing products within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments.

Segment revenue, expenses, results, assets and liabilities include items directly attributable to a segment as well as those that can be allocated on a reasonable basis to that segment. They are determined before intra-group balances and transactions are eliminated as part of consolidation process.

The Bank and its subsidiaries present business segments based on a consolidated internal report which is presented to the chief operating decision maker, namely the Board of Directors.

The Bank and its subsidiaries have identified and disclosed financial information based on their main business activities (business segments) which are divided into conventional and sharia, also based on geographical segments.

A geographical segment is engaged in providing products or services within a particular economic environment with risks and different returns compared to other operating segments in other economic environments.

hh. Issuance cost on shares issued

Issuance costs related to offering of shares to the public (including pre-emptive rights issue) are deducted directly from the proceeds and presented as a deduction on Additional Paid in Capital account, as part of Equity in the consolidated statement of financial position.

ii. Capital stock

Capital stock is measured at par value for all shares issued.

jj. Retained earnings

Retained earnings represent the cumulative balance of the Bank and its subsidiaries results of operations, dividend distributions, prior period adjustments, effects of the changes in accounting policy and other capital adjustments.

- Amendemen PSAK 1: Penyajian Laporan Keuangan tentang Pengungkapan Kebijakan Akuntansi;
- Amendemen PSAK 16: Aset Tetap tentang Hasil Sebelum Penggunaan yang Diintensikan;
- Amendemen PSAK 25: Kebijakan Akuntansi, Perubahan Estimasi Akuntansi dan Kesalahan tentang Definisi Estimasi Akuntansi;
- Amendemen PSAK 46: Pajak Penghasilan tentang Pajak Tanggahan Terkait Aset dan Liabilitas Yang Timbul Dari Transaksi Tunggal; dan
- Revisi PSAK 107: Akuntansi Ijarah.

Implementasi standar-standar tersebut tidak memiliki dampak yang signifikan terhadap jumlah yang dilaporkan di periode berjalan atau tahun sebelumnya.

Standar akuntansi dan interpretasi standar yang telah disahkan namun masih belum berlaku efektif

Dewan Standar Akuntansi Keuangan Ikatan Akuntan Indonesia ("DSAK-IAI") telah menerbitkan standar baru, amandemen dan interpretasi berikut, namun belum berlaku efektif untuk tahun buku yang dimulai pada 1 Januari 2024 adalah sebagai berikut:

- Amendemen PSAK 1: "Penyajian Laporan Keuangan" terkait liabilitas jangka panjang dengan kovenan;
- Amendemen PSAK 73: "Sewa" terkait liabilitas sewa pada transaksi jual dan sewa-balik;
- Revisi PSAK 101: "Penyajian Laporan Keuangan Syariah"; dan
- Revisi PSAK 109: "Akuntansi Zakat, Infak, dan Sedekah tentang akuntansi zakat, infak dan sedekah".

Standar baru dan amendemen atas standar yang berlaku efektif untuk periode yang dimulai pada atau setelah 1 Januari 2025, dengan penerapan dini diperkenankan yaitu:

- PSAK 74: Kontrak Asuransi; dan
- Amendemen PSAK 74: Kontrak Asuransi tentang Penerapan Awal PSAK 74 dan PSAK 71 – Informasi Komparatif.

Hingga tanggal laporan keuangan ini diotorisasi, Bank masih mempelajari dampak yang mungkin timbul dari penerapan standar baru dan revisi tersebut serta pengaruhnya pada laporan keuangan Bank.

DSAK-IAI juga mengesahkan perubahan penomoran PSAK dan ISAK yang berlaku efektif pada 1 Januari 2024, dimana perubahan ini tidak memengaruhi substansi pengaturan dalam masing-masing PSAK dan ISAK tersebut.

II. Provisi

Provisi diakui jika Bank dan entitas anak memiliki liabilitas kini (baik bersifat hukum maupun bersifat konstruktif) yang sebagai akibat peristiwa masa lalu, besar kemungkinannya penyelesaian liabilitas tersebut akan mengakibatkan arus keluar sumber daya yang mengandung manfaat ekonomi dan estimasi yang andal mengenai jumlah kewajiban tersebut dapat dibuat.

Provisi ditelaah pada setiap tanggal pelaporan dan disesuaikan untuk mencerminkan estimasi terbaik yang paling kini. Jika arus keluar sumber daya untuk menyelesaikan kewajiban kemungkinan besar tidak terjadi, maka provisi dibatalkan.

mm. Penurunan nilai aset non-keuangan

Nilai tercatat dari aset yang bukan aset keuangan Bank, kecuali aset pajak tangguhan, ditelaah setiap tanggal pelaporan untuk menentukan apakah terdapat indikasi penurunan nilai. Jika indikasi tersebut ada, maka nilai yang dapat dipulihkan dari aset tersebut akan diestimasi.

Nilai yang dapat diperoleh kembali dari suatu aset atau unit penghasil kas adalah sebesar jumlah yang lebih tinggi antara nilai pakainya dan nilai wajar aset atau unit penghasil kas dikurangi biaya untuk menjual. Dalam menilai nilai pakai, estimasi arus kas masa depan didiskontokan ke nilai sekarang dengan menggunakan tingkat diskonto sebelum pajak yang mencerminkan penilaian pasar saat ini terhadap nilai kas kini dan risiko spesifik terhadap aset tersebut.

Cadangan penurunan nilai diakui pada tahun sebelumnya dinilai pada setiap tanggal pelaporan untuk melihat adanya indikasi bahwa kerugian telah menurun atau tidak ada lagi. Kerugian penurunan nilai di jurnal balik jika terdapat perubahan estimasi yang digunakan dalam menentukan nilai yang dapat dipulihkan.

Cadangan kerugian penurunan nilai di jurnal balik hanya hingga nilai tercatat aset tidak melebihi nilai tercatat yang telah ditentukan, dikurangi dengan depresiasi atau amortisasi, jika cadangan penurunan nilai tidak pernah diakui.

Bank tidak diwajibkan lagi untuk membentuk cadangan kerugian penurunan nilai untuk aset non produktif, tetapi Bank tetap harus menghitung cadangan kerugian penurunan nilai mengacu pada standar akuntansi yang berlaku.

nn. Peristiwa setelah periode pelaporan

Setiap peristiwa setelah akhir periode yang menyebabkan tambahan informasi mengenai posisi keuangan Bank dan entitas anak (*adjusting event*) akan disesuaikan dalam laporan keuangan konsolidasian. Peristiwa setelah akhir periode yang

II. Provisions

Provisions are recognized when the Bank and its subsidiaries have a present obligation (legal or constructive) where, as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

mm. Impairment of non-financial assets

The carrying amounts of the Bank's non financial assets, other than deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount will be estimated.

The recoverable amount of an asset or cash generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

If the fair value of the revalued asset change significantly, it is necessary to revalue on an annual basis, whereas if the fair value of the revalued asset does not change significantly, it is necessary to revalue every 3 years, taking the conditions of the related year into considerations.

Allowance for impairment losses is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

The Bank is not required to provide an allowance for impairment losses for non productive assets, but the Bank should still calculate the impairment losses in accordance with the applicable accounting standards.

nn. Events after the reporting period

Any event after the end of the period that causes additional information regarding the financial position of the Bank and its subsidiaries (adjusting event) will be adjusted in the consolidated financial statements. Events after the end of the period

bukan merupakan *adjusting events*, jika ada, akan diungkapkan ketika memiliki dampak material terhadap laporan keuangan konsolidasian.

3. Pertimbangan, Estimasi dan Asumsi Akuntansi yang Signifikan

Penyusunan laporan keuangan konsolidasian mengharuskan manajemen untuk membuat pertimbangan, estimasi dan asumsi yang mempengaruhi jumlah yang dilaporkan dari pendapatan, beban, aset dan liabilitas, dan pengungkapan atas liabilitas kontinjensi pada akhir periode pelaporan.

Ketidakpastian mengenai asumsi dan estimasi tersebut dapat mengakibatkan penyesuaian material terhadap nilai tercatat aset dan liabilitas dalam periode pelaporan berikutnya.

Pertimbangan

Pertimbangan berikut ini dibuat oleh manajemen dalam rangka penerapan kebijakan akuntansi yang memiliki pengaruh paling signifikan atas jumlah yang diakui dalam laporan keuangan konsolidasian:

Usaha yang berkelanjutan

Manajemen telah melakukan penilaian atas kemampuan Bank dan entitas anak untuk melanjutkan kelangsungan usahanya dan berkeyakinan bahwa Bank dan entitas anak memiliki sumber daya untuk melanjutkan usahanya di masa mendatang.

Selain itu, aset dan liabilitas tidak mengetahui adanya ketidakpastian material yang dapat menimbulkan keraguan yang signifikan terhadap kemampuan Bank dan entitas anak untuk melanjutkan usahanya. Oleh karena itu, laporan keuangan konsolidasian telah disusun atas dasar usaha yang berkelanjutan.

Klasifikasi aset dan liabilitas keuangan

Manajemen menetapkan klasifikasi atas aset dan liabilitas tertentu sebagai aset keuangan dan liabilitas keuangan dengan mempertimbangkan bila definisi yang ditetapkan PSAK 71 dipenuhi. Dengan demikian, aset keuangan dan liabilitas keuangan diakui sesuai dengan kebijakan akuntansi seperti diungkapkan pada Catatan 2d.

Nilai wajar atas dan liabilitas keuangan

Semua aset dan liabilitas dimana nilai wajar diukur atau diungkapkan dalam laporan keuangan konsolidasian dapat dikategorikan pada level hierarki nilai wajar, berdasarkan tingkatan input terendah yang signifikan atas pengukuran nilai wajar secara keseluruhan:

which are not adjusting events, if any, will be disclosed when it has a material impact on the consolidated financial statements.

3. Significant Accounting Judgments, Estimates and Assumptions

The preparation of the consolidated financial statement requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period.

Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amounts of the asset and liability affected in future periods.

Judgments

The following judgments are made by management in the process of applying the accounting policies that have the most significant effects on the amounts recognized in the consolidated financial statements:

Going concern

The management has made an assessment of the Bank and its subsidiaries' abilities to continue as a going concern and is satisfied that the Bank and its subsidiaries have the resources to continue its business for the foreseeable future.

Furthermore, the management is not aware of any material uncertainties that may cast significant doubt to the Bank and its subsidiaries' abilities to continue as a going concern. Therefore, the consolidated financial statement continues to be prepared on the going concern basis.

Classification of financial assets and financial liabilities

The Management determines the classifications of certain assets and liabilities as financial assets and financial liabilities by judging if they meet the definition set forth in SFAS 71. Accordingly, the financial assets and financial liabilities are accounted for in accordance with the accounting policies disclosed in Note 2d.

Fair value of financial instruments

All assets and liabilities in which fair value is measured or disclosed in the consolidated financial statements can be classified in fair value hierarchy levels, based on the lowest level of input that is significant on the overall fair value measurement:

- Level 2: input selain harga kuotasian yang termasuk dalam level 1 yang dapat diobservasi untuk aset dan liabilitas, baik secara langsung atau tidak langsung;
- Level 3: input yang tidak dapat diobservasi untuk aset dan liabilitas.

Aset keuangan yang tidak memiliki harga pasar

Bank dan entitas anak mengklasifikasikan aset keuangan dengan mengevaluasi, antara lain, apakah nilai tersebut dikutip atau tidak di pasar aktif. Termasuk dalam evaluasi pada apakah aset keuangan yang dikutip di pasar aktif adalah penentuan apakah harga pasar dapat segera dan secara teratur tersedia, dan apakah mereka mewakili harga aktual dan teratur terjadi transaksi pasar secara *arms-length*.

Kontinjensi

Ketika Bank dan entitas anak sedang terlibat dalam proses hukum, perkiraan biaya kemungkinan bagi penyelesaian klaim telah dikembangkan melalui konsultasi dengan bantuan konsultan hukum Bank dan entitas anak didasarkan pada analisis hasil yang potensial.

Manajemen Bank dan entitas anak tidak berkeyakinan bahwa hasil dari hal ini akan mempengaruhi hasil usaha. Besar kemungkinan, bagaimanapun, bahwa hasil operasi di masa depan dapat secara material terpengaruh oleh perubahan dalam estimasi atau efektivitas dari strategi yang terkait dengan hal tersebut.

Estimasi dan asumsi

Asumsi dan estimasi utama masa depan dan sumber utama estimasi ketidakpastian lain pada tanggal pelaporan yang memiliki risiko untuk dapat menyebabkan penyesuaian yang material terhadap nilai tercatat aset dan liabilitas untuk tahun berikutnya diungkapkan di bawah ini. Bank dan entitas anak mendasarkan asumsi dan estimasi yang digunakan pada parameter yang tersedia pada saat laporan keuangan konsolidasian disusun.

Asumsi dan situasi mengenai perkembangan masa depan dapat berubah akibat perubahan pasar atau situasi yang timbul di luar kendali Bank dan entitas anak. Perubahan tersebut dicerminkan dalam asumsi yang digunakan pada saat terjadinya.

- Level 2: inputs other than quoted prices included in Level 1 for the assets and liabilities, which is directly or indirectly observable;
- Level 3: unobservable inputs for the assets and liabilities.

Financial assets not quoted in an active market

The Bank and its subsidiaries classify financial assets by evaluating, among others, whether the asset is quoted or not in an active market. Included in the evaluation on whether a financial asset is quoted in an active market is the determination on whether quoted prices are readily and regularly available, and whether those prices represent actual and regularly occurring market transactions on an *arm's length* basis.

Contingencies

When the Bank and its subsidiaries are currently involved in legal proceedings, the estimate of the probable cost for the resolution of claims determined in consultation with the aid of the legal counsel of the Bank and its subsidiaries based upon an analysis of potential results.

Management of the Bank and its subsidiaries does not believe that the outcome of this matter will affect the results of operations. It is probable, however, that future results of operations could be materially affected by changes in the estimates or in the effectiveness of the strategies relating to these proceedings.

Estimates and assumptions

The key estimates and assumptions concerning the future and other key sources of estimating uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are disclosed below. The Bank and its subsidiaries based their assumptions and estimates on parameters available when the consolidated financial statements were prepared.

Existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyond the control of the Bank and its subsidiaries. Such changes are reflected in the assumptions when they occur.

Allowance for impairment losses of financial assets

In the calculation of allowance for impairment losses of financial assets, the specific condition of impaired counterparty is individually evaluated based on management's best estimate of the present value of the expected cash flows to be received. In estimating these cash flows,

manajemen membuat pertimbangan tentang situasi keuangan *counterparty* dan nilai realisasi bersih dari setiap agunan. Setiap aset yang mengalami penurunan nilai dinilai sesuai dengan manfaat yang ada, dan strategi penyelesaian serta estimasi arus kas yang diperkirakan dapat diterima.

Bank dan entitas anak menelaah portofolio pinjaman dan piutang setiap tahun untuk menilai penurunan nilai dengan memperbaharui provisi yang dibentuk selama periode yang diperlukan berdasarkan analisis berkelanjutan dan pemantauan terhadap rekening individual oleh petugas kredit.

Dalam menentukan apakah penurunan nilai harus dibentuk dalam laporan laba rugi komprehensif konsolidasian, Bank dan entitas anak membuat penilaian, apakah terdapat data yang dapat diobservasi yang menunjukkan bahwa terdapat penurunan yang dapat diukur dalam laporan perkiraan arus kas masa depan dari portofolio pinjaman sebelum penurunan tersebut dapat diidentifikasi secara individual dalam portofolio tersebut.

Bukti seperti ini dapat termasuk data yang dapat diobservasi yang menunjukkan bahwa telah terjadi perubahan yang merugikan pada status pembayaran kelompok debitur, atau kondisi ekonomi nasional atau lokal yang berkorelasi dengan wanprestasi atas aset dalam kelompok. Bank dan entitas anak menggunakan perkiraan dalam menentukan jumlah dan waktu dari arus kas masa depan ketika menentukan tingkat penyisihan yang diperlukan. Estimasi tersebut didasarkan pada asumsi mengenai sejumlah faktor dan hasil aktual yang dapat berbeda, yang mengakibatkan perubahan terhadap jumlah penyisihan di masa yang akan datang.

Penurunan nilai untuk surat berharga

Bank dan entitas anak menentukan bahwa surat berharga memiliki kriteria penurunan nilai yang sama dengan aset keuangan yang dicatat pada biaya perolehan diamortisasi.

Umur ekonomis dari aset tetap

Bank dan entitas anak memperkirakan masa manfaat aset tetap berdasarkan periode dimana aset diharapkan akan tersedia untuk digunakan. Masa manfaat ekonomis aset tetap ditinjau secara berkala dan diperbarui jika memiliki ekspektasi yang berbeda dari perkiraan sebelumnya, karena kerusakan secara fisik dan teknis, atau keusangan secara komersial dan legal atau batasan lainnya atas penggunaan aset tersebut. Selain hal tersebut, estimasi masa manfaat dari aset tetap didasarkan pada penilaian secara kolektif dengan menggunakan praktik industri, teknik evaluasi internal dan pengalaman dengan aset serupa.

management makes judgements about the counterparty's financial situation and the net realizable value of any underlying collateral. Each impaired asset is assessed on its merits, and the workout strategy and estimated cash flows considered recoverable.

The Bank and its subsidiaries reviews its loan portfolio and receivables to assess impairment on an annual basis with updating provisions made during the intervals as necessary based on the continuing analysis and monitoring of individual accounts by credit officers.

In determining whether an impairment loss should be recorded in the consolidated statements of comprehensive income, the Bank and its subsidiaries make judgments as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with an individual loan in that portfolio.

This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a Bank and its subsidiaries, or national or local economic conditions that correlate with defaults on assets in the Bank and its subsidiaries. The Bank and its subsidiaries use estimates in the amount and timing of future cash flows when determining the level of allowance required. Such estimates are based on assumptions about a number of factors and actual results may differ, resulting to future changes in the allowance.

Impairment of marketable securities

The Bank and its subsidiaries determine that securities are impaired based on the same criteria as financial assets carried at amortized cost.

Useful lives of premises and equipment

The Bank and its subsidiaries estimate the useful lives of premises and equipment based on the period over which the assets are expected to be available for use. The estimated useful lives of premises and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets. In addition, estimation of the useful lives of premises and equipment is based on collective assessment of industry practice, internal technical evaluation and experience with similar assets.

Tetap dimungkinkan, bagaimanapun, bahwa hasil masa depan dapat secara material dipengaruhi oleh perubahan estimasi yang disebabkan oleh perubahan faktor-faktor tersebut di atas.

Jumlah dan saat pencatatan biaya untuk setiap periode akan dipengaruhi oleh perubahan dari faktor dan keadaan saat pencatatan. Pengurangan taksiran masa manfaat dari aset tetap akan meningkatkan beban operasional yang diakui.

Penurunan nilai aset non-keuangan

Bank dan entitas anak mengevaluasi penurunan nilai aset apabila terdapat kejadian atau perubahan keadaan yang mengindikasikan bahwa nilai tercatat aset tidak dapat dipulihkan kembali.

Faktor-faktor penting yang dapat menyebabkan penelaahan penurunan nilai adalah sebagai berikut:

- a) kinerja yang rendah secara signifikan jika dibandingkan dengan ekspektasi dari hasil operasi historis maupun proyeksi hasil operasi di masa yang akan datang;
- b) perubahan yang signifikan dalam cara penggunaan aset atau strategi bisnis secara keseluruhan; dan
- c) industri atau tren ekonomi yang secara signifikan bernilai negatif.

Bank dan entitas anak mengakui kerugian penurunan nilai apabila nilai tercatat aset melebihi nilai yang dapat dipulihkan. Jumlah terpulihkan adalah nilai yang lebih tinggi antara nilai wajar dikurangi biaya untuk menjual dengan nilai pakai aset (atau unit penghasil kas).

Jumlah terpulihkan diestimasi untuk aset individual atau, jika tidak memungkinkan, untuk unit penghasil kas yang mana aset tersebut merupakan bagian daripada unit tersebut.

Pengakuan aset pajak tangguhan

Aset pajak tangguhan diakui untuk seluruh saldo rugi fiskal yang belum digunakan sejauh terdapat kemungkinan bahwa saldo rugi tersebut dapat dikompensasikan terhadap penghasilan kena pajak di masa yang akan datang. Pertimbangan manajemen yang signifikan diperlukan untuk menentukan jumlah aset pajak tangguhan yang dapat diakui, sesuai dengan saat dan jumlah penghasilan kena pajak di masa mendatang seiring dengan strategi perencanaan pajak.

Bank dan entitas anak menelaah aset pajak tangguhan pada setiap tanggal laporan posisi keuangan konsolidasian dan mengurangi jumlah tercatat dalam hal tidak adanya lagi kemungkinan bahwa penghasilan kena pajak yang cukup akan tersedia untuk mengkompensasi sebagian atau seluruh aset pajak tangguhan.

It is possible, however, that future results of operations could be materially affected by changes in estimates brought about by changes in factors mentioned above.

The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances. A reduction in the estimated useful lives of premises and equipment would increase the recorded operating expenses.

Impairment of non-financial assets

The Bank and its subsidiaries assess impairment on assets whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

The factors that which could trigger an impairment review include the following:

- a) significant underperformance relative to expected historical or projected future operating results;*
- b) significant changes in the manner of use of the acquired assets or the strategy for overall business; and*
- c) significant negative industry or economic trends.*

The Bank and its subsidiaries recognize an impairment loss whenever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the higher of an asset's (or Cash Generating Unit's) fair value less costs to sell and its value in use.

Recoverable amounts are estimated for individual assets or, if it is not possible, for the cash generating unit to which the asset belongs.

Recognition of deferred tax assets

Deferred tax assets are recognized for all unused tax losses and credits to the extent that it is probable that taxable income will be available against which the losses can be utilized. Significant management judgment is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and level of future taxable income together with future tax planning strategies.

The Bank and its subsidiaries review their deferred tax assets at each consolidated statement of financial position date and reduce the carrying amount to the extent that it is no longer probable that sufficient taxable income will be available to allow all or part of the deferred tax assets to be utilized.

Pertimbangan signifikan diperlukan dalam menentukan provisi perpajakan

Bank dan entitas anak menentukan provisi perpajakan berdasarkan estimasi atas kemungkinan adanya tambahan beban pajak. Jika hasil akhir dari hal ini berbeda dengan jumlah yang dicatat semula, maka perbedaan tersebut akan berdampak terhadap laba/rugi.

Nilai kini atas kewajiban imbalan pasca kerja dan imbalan jangka panjang lainnya

Biaya atas kewajiban imbalan pasca kerja dan imbalan jangka panjang lainnya ditentukan dengan perhitungan aktuaris. Perhitungan aktuaris melibatkan penggunaan asumsi mengenai tingkat diskonto, tingkat pengembalian yang diharapkan dari aset, kenaikan gaji di masa depan, tingkat kematian dan tingkat kecacatan. Karena program tersebut memiliki sifat jangka panjang, maka perkiraan tersebut memiliki ketidakpastian yang signifikan.

Significant judgement is required in determining the provision for taxes

The Bank and its subsidiaries provides for tax provision based on estimates whether the additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the profit/loss.

Present value of post employment and other long term employment benefits

The cost of post employment and other long term employment benefits is determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and disability rate. Due to the long-term nature of these plans, such estimates are subject to significant uncertainty.

a. PT Bank Pembangunan Daerah Bengkulu (Bank Bengkulu)

Dalam rangka implementasi strategi dalam corporate plan Bank di bidang kolaborasi dan anorganik, Bank berencana untuk melakukan pengembangan struktur Kelompok Usaha Bank yang telah dimiliki. Adanya ketentuan mengenai modal inti minimum pada POJK No 12 Tahun 2020 mengenai Konsolidasi Bank Umum menimbulkan adanya kebutuhan dari beberapa Bank Pembangunan Daerah (BPD) dengan modal inti dibawah 3 Triliun untuk bergabung ke dalam KUB. Dilatarbelakangi oleh dua hal tersebut, Bank selaku BPD terbesar di Indonesia, berinisiasi untuk mengembangkan struktur KUB melalui penyertaan modal pada BPD lain.

a. PT Bank Pembangunan Daerah Bengkulu (Bank Bengkulu)

In order to implement the strategy in The Bank's corporate plan in the field of collaboration and inorganics, The Bank plans to develop the structure of the Bank's Business Group that it already has. The existence of provisions regarding minimum core capital in POJK No. 12 of 2020 concerning Commercial Bank Consolidation has created a need for several Regional Development Banks (BPD) with core capital below 3 trillion to join KUB. Against the background of these two things, The Bank as the largest BPD in Indonesia, took the initiative to develop the KUB structure through capital participation in other BPDs.

c. Penyertaan Modal Tahap I

Realisasi Pengembangan struktur KUB dilakukan dengan melakukan penyertaan modal kepada PT Bank Pembangunan Daerah Bengkulu. Sesuai dengan akta PKS Penyertaan Modal Dalam Rangka Pembentukan Kelompok Usaha Bank antara Bank dan Bank Bengkulu no 135 tanggal 29 Juli 2022, penyertaan modal dilakukan melalui 2 tahap, tahap I senilai maksimal Rp100.000 direalisasikan di tahun 2022 dan penyertaan modal tahap II senilai maksimal Rp150.000 direalisasikan di tahun 2023.

Bank melakukan realisasi setoran modal tahap I pada tanggal 29 Juli 2022 sebesar Rp 100.000. Pengefektifan setoran modal tahap I Bank pada Bank Bengkulu senilai Rp99,969 dilakukan pada tanggal 29 November 2022 atas dasar persetujuan OJK melalui surat no S-49/KR.02/2022 tanggal 28 Oktober 2022 perihal Persetujuan Penyertaan Modal PT Bank Pembangunan Daerah Jawa Barat dan Banten, Tbk. kepada PT Bank Pembangunan Daerah Bengkulu untuk pembelian 2.617 lembar saham seri A baru (right issue) dengan harga kesepakatan senilai Rp.38 / lembar saham Sei A. Atas penyertaan modal tersebut Bank menjadi pemegang saham minoritas dengan presentase kepemilikan 7,15%. Perubahan komposisi pemegang saham dalam anggaran dasar memperoleh persetujuan Kemenkumham AHU-AH.01.03-0318833 di tanggal yang sama dengan penyertaan modal.

d. Penyertaan Modal Tahap II

Bank kembali melakukan realisasi proses penyertaan modal tahap II (subsequent) senilai Rp149.960, di tahun 2023 pada Bank Bengkulu dalam rangka pengembangan struktur Kelompok Usaha Bank (KUB). Harga perlembar saham yang disepakati kedua belah pihak adalah Rp.40,75/ lembar saham Seri A. Penyertaan modal dilakukan dengan membeli saham baru (right issue) dengan proyeksi kepemilikan saham Bank di Bank Bengkulu menjadi 15.57% (pembelian dilakukan untuk 8.45% saham Bank Bengkulu).

Saat ini Bank telah mendapatkan persetujuan OJK atas penyertaan modal tahap II melalui surat OJK no S-57/KR.02/2023 Tanggal 4 September 2023 dan Keputusan Dewan Komisiner OJK no KEP-24/D.03/2024 tanggal 21 Februari 2024 tentang Izin Pembelian 8,45% Saham PT Bank Pembangunan Daerah Bengkulu Oleh PT Bank Pembangunan Daerah Jawa Barat Dan Banten, Tbk.

c. Participation of Phase I Capital

The realization of the development of the KUB structure was carried out by investing capital in PT Bank Pembangunan Daerah Bengkulu. In accordance with the PKS deed of capital participation in the context of the formation of a bank business group between The Bank and bank Bengkulu no. 135 dated 29 July 2022, capital participation is carried out in 2 stages, stage I with a maximum value of Rp.100,000 realized in 2022 and stage capital participation II with a maximum value of Rp150,000 will be released in 2023.

The Bank realized phase I capital deposits on July 29 2022 amounting to Rp.100,000. The effectiveness of The Bank phase I capital deposit at Bank Bengkulu worth Rp99,969 was carried out on November 29 2022 on the basis of OJK approval via letter no S-49/ KR.02/2022 dated 28 October 2022 concerning Approval of Capital Participation in PT Bank Pembangunan Daerah West Java and Banten, Tbk. to PT Bank Pembangunan Daerah Bengkulu for the purchase of 2,617 new series A shares (right issue) with an agreement price of Rp.38/ share Sei A. Due to this capital participation, The Bank became a minority shareholder with an ownership percentage of 7.15%. Changes in the composition of shareholders in the articles of association received approval from the Ministry of Law and Human Rights AHU-AH.01.03-0318833 on the same date as the capital participation.

d. Participation of Phase II Capital

The Bank is again carrying out the process of capital participation in phase II (subsequent) worth Rp.149,960, in 2023 at Bank Bengkulu in the context of developing the structure of the Bank Business Group (KUB). The price per share agreed upon by both parties is Rp.40.75 / Series A share. Capital participation was carried out by purchasing new shares (right issue) with a projection of The Bank share ownership in Bank Bengkulu to be 15.57% (purchase was made for 8.45% of Bank Bengkulu shares).

Currently The Bank has received OJK approval for phase II capital participation through OJK letter no S-57/KR.02/2023 dated 4 September 2023 and OJK Board of Commissioners Decree no KEP-24/D.03/2024 dated 21 February 2024 concerning Permit to Purchase 8.45% of PT Bank Pembangunan Daerah Bengkulu Shares by PT Bank Pembangunan Daerah West Java and Banten, Tbk.

Pengukuran Nilai Wajar (Level 3)

Pada 31 Desember 2023, Bank menghitung nilai wajar atas penyertaan saham pada PT Asuransi Bangun Askrida dengan menggunakan perhitungan metode nilai wajar (Level3) menggunakan pendekatan pasar dengan metode *Guideline Publicly Traded Company Method* (GPTCM) dan pendekatan pendapatan dengan metode discounted cash flow, model arus kas bersih untuk ekuitas

Nilai wajar penyertaan saham pada tanggal 31 Desember 2023 diestimasi berdasarkan penilaian atas nilai pasar oleh KJPP Salam dan Rekan (terdaftar di OJK).

- (i) Nilai wajar aset dan kewajiban keuangan tertentu, kecuali kredit yang diberikan, surat-surat berharga, efek utang yang diterbitkan, dan pinjaman yang diterima mendekati nilai tercatatnya karena mempunyai jangka waktu jatuh tempo yang singkat.

- (i) The fair values of certain financial assets and liabilities, except for loans, marketable securities, marketable securities issued, and borrowings, approximate their carrying values due to their short-term maturities.

Estimasi nilai wajar terhadap aset keuangan tertentu ditetapkan berdasarkan diskonto arus kas dengan menggunakan suku bunga pasar uang yang berlaku untuk utang dengan risiko kredit dan sisa jatuh tempo yang serupa.

The estimated fair values of certain financial assets are determined based on discounted cash flows using money market interest rates for instruments with similar credit risk and remaining maturities.

Estimasi nilai wajar terhadap kewajiban keuangan tertentu yang tidak memiliki kuotasi di pasar aktif ditetapkan berdasarkan diskonto arus kas dengan menggunakan suku bunga utang baru dengan sisa jatuh tempo yang serupa.

The estimated fair values of certain financial obligations which are not quoted in an active market are determined based on discounted cash flows using interest rates of instruments with similar remaining maturities.

- (ii) Kredit yang diberikan
Portofolio kredit secara umum terdiri dari kredit yang diberikan dengan suku bunga mengambang dan kredit yang diberikan dengan suku bunga tetap. Kredit yang diberikan dinyatakan biaya perolehan yang diamortisasi. Nilai wajar dari kredit yang diberikan menunjukkan nilai diskon dari perkiraan arus kas masa depan yang diharapkan akan diterima dengan menggunakan suku bunga pasar.

- (ii) Loans
The credit portfolio generally consists of loans with floating interest rates and short term loan with fixed interest rate. Loans are stated at amortized cost. The fair value of loans shows the estimated value of discounted future cash flows expected to be received using current market interest rates.

Nilai tercatat dari kredit yang diberikan dengan suku bunga mengambang dan pinjaman jangka pendek dengan suku bunga tetap adalah perkiraan yang layak atas nilai wajarnya.

Carrying value of loans with floating interest rates and short-term loans with fixed interest rate are the reasonable estimate of fair values.

- (iii) Surat berharga
Nilai wajar untuk surat-surat berharga biaya perolehan yang diamortisasi ditetapkan berdasarkan harga pasar atau harga kuotasi perantara (*broker*)/pedagang efek (*dealer*). Jika informasi ini tidak tersedia, nilai wajar diestimasi dengan menggunakan harga pasar kuotasi efek yang memiliki karakteristik kredit, jatuh tempo dan *yield* yang serupa atau dengan menggunakan metode penilaian internal.
- (iv) Efek utang yang diterbitkan dan pinjaman yang diterima
Nilai wajar agregat dihitung berdasarkan model diskonto arus kas menggunakan tingkat suku bunga pasar untuk sisa periode jatuh temponya.

- (iii) Marketable securities
The fair value for marketable securities at amortized cost is determined based on market price or quoted price of broker/dealer. If this information is not available, fair value is estimated using quoted market prices of securities with similar credit maturity and yield characteristics or using internal valuation model.

- (iv) Debt securities issued and borrowings

The aggregate fair value is calculated based on discounted cash flow model using current market rate for the remaining period to maturity.

46. Risiko Kredit

Sesuai dengan karakteristiknya, kredit yang ada di Bank dan entitas anak saat ini terbagi dalam kredit produktif dan kredit konsumtif. Untuk mengelola risikonya, Bank dan entitas anak mengukur risiko kredit dari portofolio yang ada baik secara kuantitatif maupun secara kualitatif. Hal ini untuk memastikan kemungkinan kerugian dari tidak dibayarnya pinjaman yang diberikan menjadi seminimal mungkin, baik untuk debitur individual maupun secara keseluruhan.

Sistem dan prosedur kredit Bank dan entitas anak telah dibakukan untuk menjamin diterapkannya kebijakan dan pelaksanaan pemberian pinjaman secara konsisten. Untuk kredit produktif, Bank dan entitas anak menggunakan model *Internal Credit Risk Rating* untuk menganalisis risiko bisnis dan finansial dari debitur secara objektif dan memberikan *rating* kepada nasabahnya. Selain itu, Bank dan entitas anak juga menggunakan *Credit Risk Capital Allocation and Pricing* untuk menguantifikasi risiko kredit dan menentukan harga yang sesuai berdasarkan risiko kredit.

Untuk kredit konsumtif maupun produktif, Bank dan entitas anak menggunakan model *Internal Credit Scoring* untuk menganalisis dan menghitung risiko dari pemberian kredit kepada konsumen.

Dalam rangka menerapkan prinsip pemberian kredit yang sehat, Bank dan entitas anak menerapkan prinsip *Four Eyes* (pengambilan keputusan kredit yang dilakukan oleh dua orang atau lebih) pada setiap kantor cabang dengan penggunaan *Credit Scoring* dan *Credit Reviewer*.

Berikut ini adalah rasio kredit bermasalah/*non-performing loans* (NPL) tidak termasuk pembiayaan syariah dan rasio kualitas aset produktif Bank dan entitas anak (konsolidasian):

	31 Desember/ December 31, 2023	31 Desember/ December 31, 2022	
Rasio NPL-bruto	1.48%	1.25%	<i>NPL ratio - gross</i>
Rasio NPL-neto	0.67%	0.73%	<i>NPL ratio - net</i>
Rasio kualitas aset produktif (tidak diaudit)	0.85%	0.85%	<i>Earnings assets quality ratio (unaudited)</i>

Rasio kualitas aset produktif merupakan rasio aset yang diklasifikasikan sebagai *non-performing* dibandingkan dengan jumlah aset produktif.

46. Credit Risk

In accordance with the loan characteristics, the Bank and its subsidiaries' loan portfolios are classified into productive loans and consumer loans. In order to manage the risk, the Bank and its subsidiaries measure credit risk arising from the existing portfolios quantitatively and qualitatively to ensure that the potential losses from default loans are minimized, both for individual borrowers and the overall portfolio.

The Bank and its subsidiaries' credit system and procedures have been formalized to ensure consistent implementation and policy in credit approval. For productive loans, the Bank and its subsidiaries use the Internal Credit Risk Rating model to analyze the business and financial risks of debtors objectively and to give ratings to debtors. In addition, the Bank and its subsidiaries also use Credit Risk Capital Allocation and Pricing in quantifying credit risk and determining the appropriate pricing.

For both consumer loans and productive loans, the Bank and its subsidiaries uses the internal Credit Scoring model to analyze and calculate the credit risk for consumer.

To implement a healthy credit granting process, the Bank and its subsidiaries apply the Four Eyes Principle (credit decision-making by two persons or more) at each branch office by using Credit Scoring and Credit Reviewer.

The following are the non-performing loans (NPL) ratios not include sharia financing and the earnings asset quality ratio of the Bank and its subsidiaries (consolidated):

Earnings asset quality ratio is the ratio of assets classified as non-performing to total earning assets.

Sistem pengelolaan manajemen risiko kredit Bank dan entitas anak telah dibakukan dalam suatu ketentuan Pedoman Perusahaan (PP) dan dikaji secara periodik.

The Bank and its subsidiaries credit risk management system has been standardized in the Bank's Guidelines and reviewed periodically.

- (i) Analisis eksposur maksimum terhadap risiko kredit setelah memperhitungkan dampak agunan dan mitigasi risiko kredit lainnya:

- (i) *Analysis on maximum exposures against credit risks after considering the impact of collateral and other credit risks mitigation:*

Nilai tercatat dari aset keuangan Bank selain kredit yang diberikan dan efek-efek yang dibeli dengan janji dijual kembali menggambarkan eksposur maksimum atas risiko kredit.

The carrying value of the Bank's financial assets other than loans and marketable securities purchased under agreement to resell represents its maximum exposure to credit risk.

Tabel di bawah ini menunjukkan *net maximum exposure* atas risiko kredit untuk efek-efek yang dibeli dengan janji dijual kembali pada tanggal 31 Desember 2023 dan 2022:

The table below show the net maximum exposure to credit risk of marketable securities purchased under agreement to resell as of December 31, 2023 and 2022:

Bank menetapkan jenis dan nilai agunan yang dijamin sesuai skema kredit dan perkiraan tingkat risiko kredit dari *counterparty* sebagai *second way out* yang ditetapkan. Jenis dari agunan terdiri dari:

The Bank determined the type and value of collateral according to the loan scheme as well as estimated credit risk level from the counterparty as a determined second way out. The types of collateral are as follows:

- Physical collateral*, berupa tanah dan bangunan;
- Financial collateral*, berupa simpanan (tabungan, giro, dan deposito), surat berharga, dan lain-lain;
- Lainnya berupa garansi, lembaga penjamin, dan lain-lain.

- Physical collateral*, such as land and buildings;
- Financial collateral*, such as third party funds (saving deposits, current accounts, and time deposits), securities, etc;
- Others*, such as guarantees, guarantee institution, etc.

Pemberian kredit yang dilaksanakan oleh Bank diatur dalam kebijakan dan prosedur perkreditan dimana untuk setiap jenis atau skema kredit telah ditentukan agunan minimal yang harus dipenuhi.

The loan granting conducted by the Bank is stipulated in the loan policy and procedure in which every loan type or scheme has minimum determinable collaterals that should be fulfilled.

Untuk segmen kredit komersial, sesuai ketentuan perkreditan wajib dijamin oleh agunan yang memadai. Agunan dapat berupa *physical collateral*, *financial collateral* atau lainnya berupa tagihan usaha atau garansi. Untuk seluruh agunan khususnya *physical collateral* akan dilakukan taksasi yang akan dipergunakan dalam menentukan kecukupan nilai agunan (*coverage ratio*).

Selain aspek agunan untuk meminimalkan risiko kredit, pemberian kredit oleh Bank selalu dilakukan berdasarkan evaluasi dan analisis kelayakan sehingga kemampuan pengembalian kredit (*first way out*) dapat dipastikan.

Adanya keharusan bagi debitur untuk memenuhi agunan yang dipersyaratkan, evaluasi atas kelayakan kredit, pengikatan kredit secara legal dan prosedur *pre-screening* akan menurunkan eksposur risiko kredit Bank ke tingkat yang layak dan dapat diterima.

Manajemen yakin akan kemampuan Bank dan entitas anak untuk mengendalikan dan memelihara eksposur risiko kredit yang berasal dari kredit yang diberikan berdasarkan hal-hal sebagai berikut:

- Bank dan entitas anak telah memiliki pedoman tertulis mengenai kebijakan dan proses kredit yang mencakup seluruh aspek pemberian kredit yang dilakukan. Setiap pemberian kredit harus senantiasa mengacu pada kebijakan tersebut;
- Bank dan entitas anak telah memiliki sistem deteksi dini masalah melalui "*early warning system*" dan pemantauan yang disiplin.

For commercial loans segment, according to the loan policy has to be collateralized adequately. The collaterals can be *physical collateral*, *financial collateral* or others such as *accounts receivable* or *guarantees*. All collaterals particularly for *physical collateral* will be assessed in which the collateral's liquidation value will be use in determining the coverage ratio.

In addition collateral aspect to minimize credit risk, loan granting is conducted based on evaluation and feasibility analysis so that the loan repayment ability (*first way out*) can be ascertained.

The necessity for debtors to comply with collaterals requirement, loan feasibility evaluation, notarial agreement and pre screening procedures will decrease the Bank's credit risk exposure to the acceptable level.

Management believes on the Bank and its subsidiaries' abilities to control and maintain their credit risk exposure arising from loans based on the following:

- The Bank and its subsidiaries has written guidelines regarding credit policies and processes that cover all aspects of loans granted. Each granting of credit should always refer to such policy;
- The Bank and its subsidiaries has an early problem detection system through 'early warning system' and disciplined monitoring.

(ii) Concentration of consolidated financial asset risk with credit risk exposure

47. Risiko Nilai Tukar

47. Foreign Exchange Risk

Risiko nilai tukar timbul sebagai kerugian yang ditimbulkan oleh posisi terbuka neto valuta asing pada sisi aktiva, sisi pasiva ataupun rekening administratif akibat perubahan nilai tukar valuta asing. Kegiatan perdagangan mata uang asing meliputi transaksi nilai tukar valuta asing *spot*, *forward*, *swap*, *interest rate swap*, dan *cross currency swap*.

Foreign exchange risk arises as losses arising from net open positions of foreign exchange on assets, liabilities or administrative accounts due to changes in foreign exchange rates. Foreign exchange trading activities include spot, forward, swap, interest rate swaps, and foreign exchange transactions cross currency swap.

Penerapan Manajemen risiko nilai tukar yang dijalankan oleh Bank adalah dengan melakukan pengukuran, pemantauan, dan pengendalian risiko nilai tukar secara berkala baik secara *bankwide* maupun parsial. Secara *bankwide*, bank melakukan pengukuran risiko nilai tukar melalui simulasi *value at risk* (var) dengan berbagai metode (*Variance Covariance & Historical*) yang disesuaikan dengan karakteristik transaksi bank.

Implementation of Forex Risk Management in Bank through a measurement, monitoring, and controlling of foreign exchange risk periodically both partial and comprehensive. comprehensively, bank measure foreign exchange risk through value at risk simulation with several methods (Variance Covariance & Historical) and adjusted to characteristic of transactions.

Pemantauan risiko nilai tukar dilakukan melalui pemantauan Posisi Devisa Neto (PDN) dan sebagai bentuk pengendalian risiko nilai tukar, Bank membuat limit internal PDN baik untuk neraca maupun secara keseluruhan sebagai bentuk *risk tolerance* Bank dalam menghadapi risiko nilai tukar. Sedangkan, penerapan manajemen risiko nilai tukar Bank secara parsial pada aktivitas treasury adalah melalui pengukuran & pengendalian *budget loss limit & open position* untuk setiap transaksi nilai tukar dan sebagai bentuk pemantauan risiko nilai tukar, Bank melakukan pelaporan transaksi treasury sesuai dengan ketentuan secara periodik untuk memastikan bahwa *exposure* yang timbul oleh pergerakan nilai tukar berada pada batas yang telah ditentukan oleh ketentuan internal Bank dan sesuai dengan ketentuan regulasi Bank Indonesia.

Bank monitor foreign exchange risk through monitoring of Net Open Position (NOP) and intraday and for a foreign exchange risk control, bank establish internal limit of NOP both on balance sheet and overall as risk tolerance to foreign exchange risk. Meanwhile, implementation of forex risk management partially on treasury activities is performed through measurement & control of budget loss limit & open position for every transaction and for monitoring, bank create Treasury transactions report periodically to ensure that exposure arise from foreign exchange risk is at the limit which has been specified by the internal Bank dan Bank Indonesia Regulations.

Risiko mata uang adalah kemungkinan kerugian pendapatan yang timbul dari perubahan kurs valuta asing. Bank dan entitas anak mengelola paparan terhadap pengaruh fluktuasi nilai tukar mata uang asing dengan mempertahankan risiko mata uang asing dalam pedoman peraturan yang ada (yaitu menjaga Posisi Devisa Neto sesuai dengan peraturan Bank Indonesia).

Foreign currency risk is the probability of loss to earnings arising from changes in foreign exchange rates. The Bank and its subsidiaries manages exposure to effects of fluctuations in foreign currency exchange rates by maintaining foreign currency exposure within the existing regulatory guidelines (i.e maintaining the Net Open Position based on Bank Indonesia regulations).

48. Risiko Likuiditas

48. Liquidity Risk

Risiko akibat ketidakmampuan Bank dan entitas anak untuk memenuhi kewajiban yang jatuh tempo dari sumber pendanaan arus kas dan/atau dari aset likuid berkualitas tinggi yang dapat diagunkan, tanpa mengganggu aktivitas dan kondisi keuangan Bank dan entitas anak. Besar kecilnya risiko likuiditas ditentukan antara lain:

- Kecermatan dalam perencanaan arus kas atau arus dana berdasarkan prediksi pembiayaan dan prediksi pertumbuhan dana, termasuk mencermati tingkat fluktuasi dana;
- Ketepatan dalam mengatur struktur dana termasuk kecukupan dana;
- Ketersediaan aset yang siap dikonversikan menjadi kas;
- Kemampuan menciptakan akses ke pasar antar bank atau sumber dana lainnya, termasuk fasilitas *lender of last resort*.

Risk due to the inability of the Bank and its subsidiaries to fulfill maturing obligations from cash flow funding sources and/or from high-quality liquid assets that can be pledged, without disrupting the activities and financial condition of the Bank and its subsidiaries. The size of the liquidity risk is determined, among others:

- Accuracy in cash flow or flow of fund planning based on financing and fund growth prediction, include observe the fund rate volatility;*
- The precision in managing the fund structure, including the adequacy of funding;*
- The availability of asset that is ready to be converted into cash;*
- Ability to create access to the interbank market or other funding sources, including the lender of last resort facilities.*

Apabila kesenjangan tersebut cukup besar maka akan menurunkan kemampuan Bank dan entitas anak untuk memenuhi kewajibannya pada saat jatuh tempo. Oleh karena itu untuk mengantisipasi terjadinya risiko likuiditas, maka diperlukan manajemen likuiditas, yang merupakan bagian dari pengelolaan liabilitas.

Kebijakan likuiditas Bank dan entitas anak ditujukan untuk memastikan bahwa kebutuhan dana dapat dipenuhi, baik untuk membayar kewajiban pada saat jatuh tempo atau untuk memenuhi fasilitas kredit yang belum digunakan.

Penerapan manajemen risiko likuiditas diantaranya melalui pengelolaan dan pemantauan posisi likuiditas Bank dan entitas anak berada dalam tanggung jawab Bagian Manajemen ALM & Likuiditas di Divisi *Treasury* sedangkan pengukuran serta analisa terhadap risiko likuiditas menjadi tugas Divisi Manajemen Risiko diantaranya *stress test* likuiditas berdasarkan tiga skenario dan pembuatan profil risiko yang terkait risiko likuiditas, selain itu Bank telah melakukan perhitungan Basel III terkait risiko likuiditas yaitu perhitungan *Net Stable Funding Ratio* (NSFR) dan *Liquidity Coverage Ratio* (LCR).

Pengelolaan kelebihan dana likuiditas yang tidak terserap penyaluran kredit, dioptimalisasi melalui pengelolaan *treasury*.

Sebagian besar kelebihan dana likuiditas tersalurkan melalui instrumen-instrumen yang berjangka pendek dan aman. Umumnya, kondisi likuiditas bank terjaga baik dimana penarikan dana nasabah dapat terpenuhi sekaligus kelebihan dana dioptimalkan dengan imbal hasil yang optimal.

Sumber dana dan waktu jatuh tempo deposito dikelola untuk menghindari adanya dana yang *idle* dan menentukan jumlah serta instrumen aset likuid yang tepat untuk menjamin tingkat likuiditas yang terkendali secara terus menerus.

If the gap is large enough it will reduce the Bank and its subsidiaries' ability to meet its liabilities at maturity. Therefore, liquidity management is needed to anticipate liquidity risk, which is a part of the management liability.

The Bank and its subsidiaries' liquidity policies are aimed to ensuring that fund requirements can be fulfilled, either to pay time deposits at maturity or to fulfill unused loan facility.

The application of liquidity risk management includes managing and monitoring the Bank and its subsidiaries' liquidity position in the responsibility of the ALM Management & Liquidity Division in the Treasury Division while measuring and analyzing liquidity risk is the task of the Risk Management Division including stress test liquidity based on three scenarios and risk-related risk profiles liquidity, in addition banks have made Basel III calculations related to liquidity risk, namely the calculation of Net Stable Funding Ratio (NSFR) and Liquidity Coverage Ratio (LCR).

Managing the excess of liquidity fund, which are not absorbed by loans, disbursement will be optimized through managing treasury.

Most of the excess of liquidity will be placed in short-term and secured instruments. In general, the Bank and its subsidiaries' liquidity condition is well maintained where the customers withdrawal can be fulfilled while the excess fund can be optimized with optimum return.

Sources of funds and maturity dates of time deposits are managed to avoid idle funds and determine the appropriate liquidity level and liquid asset instrument to ensure a sustainable liquidity level.

and liabilities portfolio, based on normal case, specific case, and crisis case scenarios by liquidity stress testing process.

49. Risiko Suku Bunga

Risiko suku bunga merupakan potensi kerugian Bank dan entitas anak yang timbul akibat fluktuasi suku bunga pasar yang berlawanan dengan posisi portofolio Bank dan entitas anak.

Bank dan entitas anak melakukan pengukuran risiko suku bunga meliputi penilaian risiko suku bunga yang melekat pada aset, kewajiban, dan pada posisi *off balance sheet*; penggunaan konsep keuangan yang berlaku secara umum dan teknik-teknik manajemen risiko; asumsi dan parameter yang terdokumentasi dan dievaluasi secara berkala; terintegrasi dengan proses manajemen risiko secara rutin baik dari aspek pengambilan keputusan, struktur *governance* maupun proses alokasi modal internal. Dengan menggunakan metodologi tersebut, Bank dan entitas anak dapat mengidentifikasi risiko suku bunga dari portofolio aset dan kewajiban yang sensitif terhadap perubahan suku bunga serta menentukan besaran risiko terhadap Bank dan entitas anak.

Tabel di bawah ini menyajikan informasi mengenai tingkat suku bunga rata-rata per tahun untuk aset dan liabilitas keuangan yang penting untuk tahun yang berakhir pada tanggal 31 Desember 2023 dan 2022 :

49. Interest Rate Risk

Interest rate risk is the Bank and its subsidiaries' potential losses arising from market interest rates fluctuations as opposed to the position of the Bank and its subsidiaries' portfolios.

The Bank and its subsidiaries conduct measurement of interest rate risk that includes assessing inherent interest rate risk in asset, liabilities, and off balance sheet positions; implementation of the generally applicable financial concept and risk management techniques; assumptions and parameters which are documented and evaluated regularly; integrated with periodic risk management process either from the aspect of decision making, governance structure or internal capital allocation process. By using such methodologies, the Bank and its subsidiaries can identify interest rate risk of asset and liabilities portfolio that are sensitive to interest rate changes and determine the risk scale for the Bank and its subsidiaries.

The following table presents information on the average annual interest rates for significant financial assets and liabilities for the years ended December 31, 2023 and 2022 :

- i. Risiko tingkat suku bunga
Analisis sensitivitas untuk beberapa faktor pasar menunjukkan bagaimana laba rugi dan ekuitas dapat dipengaruhi oleh perubahan dari beberapa faktor risiko sesuai dengan tabel dibawah ini. Secara umum, sensitivitas diestimasi dengan membandingkan suatu nilai awal ke nilai tertentu setelah perubahan tertentu dari faktor pasar, dengan mengasumsikan seluruh variabel lainnya tetap. Sensitivitas atas laporan laba rugi merupakan efek atas perubahan estimasi suku bunga atas laba rugi untuk suatu periode, berdasarkan nilai suku bunga mengambang atas aset dan liabilitas yang diperdagangkan dan tidak diperdagangkan yang dimiliki Bank dan entitas anak. Analisis sensitivitas atas laporan laba rugi komprehensif konsolidasian dihitung dengan menilai kembali perubahan estimasi suku bunga tetap atas aset keuangan yang tersedia untuk dijual. Jumlah sensitivitas atas laporan laba rugi komprehensif konsolidasian didasarkan pada asumsi bahwa terdapat perubahan paralel dalam kurva penghasilan.

Tabel di bawah ini menunjukkan sensitivitas dari laporan laba rugi dan penghasilan komprehensif lain konsolidasian Bank dan entitas anak terhadap kemungkinan perubahan wajar atas suku bunga untuk aset dan liabilitas keuangan dengan suku bunga tetap pada tanggal 31 Desember 2023 dan 2022:

- i. *Interest rate risk*
Sensitivity analysis for several market factors showing how profit or loss and equity could be affected by changes in the relevant risk factor are in the following tables below. In general, sensitivity is estimated by comparing an initial value to the value derived after a specified change in the market factor, assuming all other variables are constant. The sensitivity of the statement of income is the effect of the assumed changes in interest rates on the profit or loss for a period, based on the floating rate trading and non-trading financial assets and liabilities held by the Bank and its subsidiaries. The sensitivity of the consolidated statement of comprehensive income is calculated by revaluing fixed rate available-for-sale financial assets for the effects of the assumed changes in interest rates. The total sensitivity of the consolidated statement of comprehensive income is based on the assumption that there are parallel shifts in the yield curve.

The table below demonstrates the sensitivity of the Bank and its subsidiaries' consolidated statement of profit or loss and other comprehensive income to reasonably possible changes in interest rates for fixed rate financial assets and liabilities as of December 31, 2023 and 2022:
